## INTRODUCTION

### A. PURPOSE

This document is a  policy-level,  project level Initial Study for evaluation of potential environmental impacts resulting from the proposed commercial water well replacement, on APN # 056-470-009-000. The legal description for this parcel is "a Portion of the South Half, of the Southeast Quarter, of Section 21, T16S, R21E, SBBM, located west of the unincorporated Winterhaven town site of the County of Imperial, State of California.

### B. CALIFORNIA ENVIRONMENTAL QUALITY ACT (CEQA) REQUIREMENTS AND THE IMPERIAL COUNTY'S GUIDELINES FOR IMPLEMENTING CEQA

As defined by Section 15063 of the State California Environmental Quality Act (CEQA) Guidelines and Section 7 of the County's "CEQA Regulations Guidelines for the Implementation of CEQA, as amended", an **Initial Study** is prepared primarily to provide the Lead Agency with information to use as the basis for determining whether an Environmental Impact Report (EIR), Negative Declaration, or Mitigated Negative Declaration would be appropriate for providing the necessary environmental documentation and clearance for any proposed project.

According to Section 15065, an **EIR** is deemed appropriate for a particular proposal if the following conditions occur:

- The proposal has the potential to substantially degrade quality of the environment.
- The proposal has the potential to achieve short-term environmental goals to the disadvantage of long-term environmental goals.
- The proposal has possible environmental effects that are individually limited but cumulatively considerable.
- The proposal could cause direct or indirect adverse effects on human beings.

According to Section 15070(a), a **Negative Declaration** is deemed appropriate if the proposal would not result in any significant effect on the environment.

According to Section 15070(b), a **Mitigated Negative Declaration** is deemed appropriate if it is determined that though a proposal could result in a significant effect, mitigation measures are available to reduce these significant effects to insignificant levels.

This Initial Study has determined that the proposed applications will not result in any potentially significant environmental impacts and therefore, a Negative Declaration is deemed as the appropriate document to provide necessary environmental evaluations and clearance as identified hereinafter

This Initial Study and Negative Declaration are prepared in conformance with the California Environmental Quality Act of 1970, as amended (Public Resources Code, Section 21000 et. seq.); Section 15070 of the State & County of Imperial's Guidelines for Implementation of the California Environmental Quality Act of 1970 as amended (California Code of Regulations, Title 14, Chapter 3, Section 15000, et. seq.) applicable requirements of the County of Imperial; and the regulations, requirements, and procedures of any other responsible public agency or an agency with jurisdiction by law.

---

Pursuant to the County of Imperial Guidelines for Implementing CEQA, depending on the project scope, the County of Imperial Board of Supervisors, Planning Commission and/or Planning Director is designated the Lead Agency, in accordance with Section 15050 of the CEQA Guidelines. The Lead Agency is the public agency which has the principal responsibility for approving the necessary environmental clearances and analyses for any project in the County.

### **C. INTENDED USES OF INITIAL STUDY AND NEGATIVE DECLARATION**

This Initial Study and Negative Declaration are informational documents, which are intended to inform County of Imperial decision makers, other responsible or interested agencies, and the general public of potential environmental effects of the proposed applications. The environmental review process has been established to enable public agencies to evaluate environmental consequences and to examine and implement methods of eliminating or reducing any potentially adverse impacts. While CEQA requires that consideration be given to avoiding environmental damage, the Lead Agency and other responsible public agencies must balance adverse environmental effects against other public objectives, including economic and social goals.

The Initial Study and Negative Declaration, prepared for the project will be circulated for a period of 20 days (30-days if submitted to the State Clearinghouse for a project of area-wide significance) for public and agency review and comments. At the conclusion, if comments are received, the County Planning & Development Services Department will prepare a document entitled "Responses to Comments" which will be forwarded to any commenting entity and be made part of the record within 10-days of any project consideration.

### **D. CONTENTS OF INITIAL STUDY & NEGATIVE DECLARATION**

This Initial Study is organized to facilitate a basic understanding of the existing setting and environmental implications of the proposed applications.

#### **SECTION 1**

**I. INTRODUCTION** presents an introduction to the entire report. This section discusses the environmental process, scope of environmental review, and incorporation by reference documents.

#### **SECTION 2**

**II. ENVIRONMENTAL CHECKLIST FORM** contains the County's Environmental Checklist Form. The checklist form presents results of the environmental evaluation for the proposed applications and those issue areas that would have either a significant impact, potentially significant impact, or no impact.

**PROJECT SUMMARY, LOCATION AND ENVIRONMENTAL SETTINGS** describes the proposed project entitlements and required applications. A description of discretionary approvals and permits required for project implementation is also included. It also identifies the location of the project and a general description of the surrounding environmental settings.

**ENVIRONMENTAL ANALYSIS** evaluates each response provided in the environmental checklist form. Each response checked in the checklist form is discussed and supported with sufficient data and analysis as necessary. As appropriate, each response discussion describes and identifies specific impacts expected with project implementation.

#### **SECTION 3**

**III. MANDATORY FINDINGS** presents Mandatory Findings of Significance in accordance with Section 15065 of

---

the CEQA Guidelines.

**IV. PERSONS AND ORGANIZATIONS CONSULTED** identifies those persons consulted and involved in preparation of this Initial Study and Negative Declaration.

**V. REFERENCES** lists bibliographical materials used in preparation of this document.

**VI. NEGATIVE DECLARATION – COUNTY OF IMPERIAL**

**VII. FINDINGS**

**SECTION 4**

**VIII. RESPONSE TO COMMENTS (IF ANY)**

**IX. MITIGATION MONITORING & REPORTING PROGRAM (MMRP) (IF ANY)**

**E. SCOPE OF ENVIRONMENTAL ANALYSIS**

For evaluation of environmental impacts, each question from the Environmental Checklist Form is summarized and responses are provided according to the analysis undertaken as part of the Initial Study. Impacts and effects will be evaluated and quantified, when appropriate. To each question, there are four possible responses, including:

1. **No Impact:** A “No Impact” response is adequately supported if the impact simply does not apply to the proposed applications.
2. **Less Than Significant Impact:** The proposed applications will have the potential to impact the environment. These impacts, however, will be less than significant; no additional analysis is required.
3. **Less Than Significant With Mitigation Incorporated:** This applies where incorporation of mitigation measures has reduced an effect from “Potentially Significant Impact” to a “Less Than Significant Impact”.
4. **Potentially Significant Impact:** The proposed applications could have impacts that are considered significant. Additional analyses and possibly an EIR could be required to identify mitigation measures that could reduce these impacts to less than significant levels.

**F. POLICY-LEVEL or PROJECT LEVEL ENVIRONMENTAL ANALYSIS**

This Initial Study and Negative Declaration will be conducted under a  policy-level,  project level analysis. Regarding mitigation measures, it is not the intent of this document to “overlap” or restate conditions of approval that are commonly established for future known projects or the proposed applications. Additionally, those other standard requirements and regulations that any development must comply with, that are outside the County’s jurisdiction, are also not considered mitigation measures and therefore, will not be identified in this document.

**G. TIERED DOCUMENTS AND INCORPORATION BY REFERENCE**

Information, findings, and conclusions contained in this document are based on incorporation by reference of tiered documentation, which are discussed in the following section.

**1. Tiered Documents**

As permitted in Section 15152(a) of the CEQA Guidelines, information and discussions from other documents

---

can be included into this document. Tiering is defined as follows:

"Tiering refers to using the analysis of general matters contained in a broader EIR (such as the one prepared for a general plan or policy statement) with later EIRs and negative declarations on narrower projects incorporating by reference the general discussions from the broader EIR; and concentrating the later EIR or negative declaration solely on the issues specific to the later project."

Tiering also allows this document to comply with Section 15152(b) of the CEQA Guidelines, which discourages redundant analyses, as follows:

"Agencies are encouraged to tier the environmental analyses which they prepare for separate but related projects including the general plans, zoning changes, and development projects. This approach can eliminate repetitive discussion of the same issues and focus the later EIR or negative declaration on the actual issues ripe for decision at each level of environmental review. Tiering is appropriate when the sequence of analysis is from an EIR prepared for a general plan, policy or program to an EIR or negative declaration for another plan, policy, or program of lesser scope, or to a site-specific EIR or negative declaration."

Further, Section 15152(d) of the CEQA Guidelines states:

"Where an EIR has been prepared and certified for a program, plan, policy, or ordinance consistent with the requirements of this section, any lead agency for a later project pursuant to or consistent with the program, plan, policy, or ordinance should limit the EIR or negative declaration on the later project to effects which:

(1) Were not examined as significant effects on the environment in the prior EIR; or,

(2) Are susceptible to substantial reduction or avoidance by the choice of specific revisions in the project, by the imposition of conditions, or other means."

## **2. Incorporation By Reference**

Incorporation by reference is a procedure for reducing the size of EIRs/MND and is most appropriate for including long, descriptive, or technical materials that provide general background information, but do not contribute directly to the specific analysis of the project itself. This procedure is particularly useful when an EIR or Negative Declaration relies on a broadly-drafted EIR for its evaluation of cumulative impacts of related projects (*Las Virgenes Homeowners Federation v. County of Los Angeles* [1986, 177 Ca.3d 300]). If an EIR or Negative Declaration relies on information from a supporting study that is available to the public, the EIR or Negative Declaration cannot be deemed unsupported by evidence or analysis (*San Francisco Ecology Center v. City and County of San Francisco* [1975, 48 Ca.3d 584, 595]). This document incorporates by reference appropriate information from the "Final Environmental Impact Report and Environmental Assessment for the "County of Imperial General Plan EIR" prepared by Brian F. Mooney Associates in 1993 and updates.

When an EIR or Negative Declaration incorporates a document by reference, the incorporation must comply with Section 15150 of the CEQA Guidelines as follows:

- The incorporated document must be available to the public or be a matter of public record (CEQA Guidelines Section 15150[a]). The General Plan EIR and updates are available, along with this document, at the County of Imperial Planning & Development Services Department, 801 Main Street, El Centro, CA 92243 Ph. (442) 265-1736.
- This document must be available for inspection by the public at an office of the lead agency (CEQA Guidelines Section 15150[b]). These documents are available at the County of Imperial Planning &

---

Development Services Department, 801 Main Street, El Centro, CA 92243 Ph. (442) 265-1736.

- These documents must summarize the portion of the document being incorporated by reference or briefly describe information that cannot be summarized. Furthermore, these documents must describe the relationship between the incorporated information and the analysis in the tiered documents (CEQA Guidelines Section 15150[c]). As discussed above, the tiered EIRs address the entire project site and provide background and inventory information and data which apply to the project site. Incorporated information and/or data will be cited in the appropriate sections.
- The material to be incorporated in this document will include general background information (CEQA Guidelines Section 15150[f]). This has been previously discussed in this document.

---

## II. *Environmental Checklist*

---

1. **Project Title:** Sidewinder Chevron Gas Station Commercial Water Well
2. **Lead Agency:** Imperial County Planning & Development Services Department
3. **Contact person and phone number:** Jim Minnick, Director (442)265-1736
4. **Address:** 801 Main Street, El Centro CA, 92243
5. **E-mail:** jimminnick@co.imperial.ca.us
6. **Project location:** APN 056-470-009-000; 611 Sidewinder Road, Winterhaven, CA.
7. **Project sponsor's name and address:** Jamal Shaow, 611 Sidewinder Road, Winterhaven, CA
8. **General Plan designation:** Recreation/Open Space
9. **Zoning:** C-2 (General Commercial)
10. **Description of project:** The applicant proposes Conditional Use Permits #22-0010 for a new Commercial Water Well on APN #056-470-009-000. The legal description for this parcel is a Portion of the South Half, of the Southeast Quarter, of Section 21, T16S, R21E, SBBM, located west of the unincorporated Winterhaven town site of the County of Imperial, State of California. The applicant will construct and operate a replacement Commercial Water Well to serve the existing gas station and the property in general located at 611 Sidewinder Road, Winterhaven, CA. The maximum annual water extraction will be two (2) acre-feet.
11. **Surrounding land uses and setting:** The project site is located west of the Winterhaven area. Surrounding land uses are vacant light industrial and commercial, along with open spaces, and a recreational vehicle park.
12. **Other public agencies whose approval is required:** (e.g., permits, financing approval, or participation agreement.): Planning Commission, Imperial County Air Pollution Control District, Imperial County Environmental Health Services, and Imperial County Fire Department.
13. **Have California Native American tribes traditionally and culturally affiliated with the project area requested consultation pursuant to Public Resources Code section 21080.3.1? If so, is there a plan for consultation that includes, for example, the determination of significance of impacts to tribal cultural resources, procedures regarding confidentiality, etc.?**

**Note: Conducting consultation early in the CEQA process allows tribal governments, lead agencies, and project proponents to discuss the level of environmental review, identify and address potential adverse impacts to tribal cultural resources, and reduce the potential for delay and conflict in the environmental review process. (See Public Resources Code, Section 21080.3.2). Information may also be available from the California Native American Heritage Commission's Sacred Lands File per Public Resources Code, Section 5097.96 and the California Historical Resources Information System administered by the California Office of Historic Preservation. Please also note that Public Resources Code, Section 21082.3 (c) contains provisions specific to confidentiality:** The AB 52 Notice of Opportunity to consult was mailed via certified mail to the Quechan Indian Tribe on April 12, 2022 for their review and comment; the Quechen Indian Tribe does not wish to comment on this project.

**ENVIRONMENTAL FACTORS POTENTIALLY AFFECTED:**

The environmental factors checked below would be potentially affected by this project, involving at least one impact that is a "Potentially Significant Impact" as indicated by the checklist on the following pages.

- |  |   |   |
|--|---|---|
| <input type="checkbox"/> Aesthetics                | <input type="checkbox"/> Agriculture and Forestry Resources | <input type="checkbox"/> Air Quality                        |

| <input type="checkbox"/> Utilities/Service Systems | <input type="checkbox"/> Wildfire                           | <input type="checkbox"/> Mandatory Findings of Significance |

**ENVIRONMENTAL EVALUATION COMMITTEE (EEC) DETERMINATION**

After Review of the Initial Study, the Environmental Evaluation Committee has:

- Found that the proposed project COULD NOT have a significant effect on the environment, and a NEGATIVE DECLARATION will be prepared.
- Found that although the proposed project could have a significant effect on the environment, there will not be a significant effect in this case because revisions in the project have been made by or agreed to by the project proponent. A MITIGATED NEGATIVE DECLARATION will be prepared.
- Found that the proposed project MAY have a significant effect on the environment, and an ENVIRONMENTAL IMPACT REPORT is required.
- Found that the proposed project MAY have a "potentially significant impact" or "potentially significant unless mitigated" impact on the environment, but at least one effect 1) has been adequately analyzed in an earlier document pursuant to applicable legal standards, and 2) has been addressed by mitigation measures based on the earlier analysis as described on attached sheets. An ENVIRONMENTAL IMPACT REPORT is required, but it must analyze only the effects that remain to be addressed.
- Found that although the proposed project could have a significant effect on the environment, because all potentially significant effects (a) have been analyzed adequately in an earlier EIR or NEGATIVE DECLARATION pursuant to applicable standards, and (b) have been avoided or mitigated pursuant to that earlier EIR or NEGATIVE DECLARATION, including revisions or mitigation measures that are imposed upon the proposed project, nothing further is required.

## **PROJECT SUMMARY**

---

See attached Initial Study for additional information.

- A. Project Location:** The project site is located at 611 Sidewinder Road, Winterhaven, CA, 92283. The legal description for this parcel is "a Portion of the South Half, of the Southeast Quarter, of Section 21, T16S, R21E, and SBBM; (APN 056-470-009-000) located west of the unincorporated Winterhaven town site of the County of Imperial. State of California.
- B. Project Summary:** The applicant proposes Conditional Use Permits #22-0010 for a new Commercial Water Well on APN #056-470-009-000. The applicant will construct and operate a replacement Commercial Water Well to serve the existing gas station and the property in general located at 611 Sidewinder Road, Winterhaven, CA. The maximum annual water extraction will be two (2) acre-feet.
- C. Environmental Setting:** The proposed project is located within a C-2 (General Commercial) zone within an area designated as Recreation/Open Space. The proposed project is allowed within the C-2 zone, with an approved conditional use permit. The applicant has submitted a conditional use permit for the proposed project.
- D. Analysis:** Initial Study #22-0017 will analysis any impacts associated with the proposed project within the C-2 zone. The proposed project site has been used for various commercial uses over the years; e.g. a gas station/convenience store, and is it currently use.
- E. General Plan Consistency:** The project is located within an area designated as Recreational/Open Space according to the General Plan, and the parcel is zoned C-2 (General Commercial).

---

## EVALUATION OF ENVIRONMENTAL IMPACTS:

- 1) A brief explanation is required for all answers except "No Impact" answers that are adequately supported by the information sources a lead agency cites in the parentheses following each question. A "No Impact" answer is adequately supported if the referenced information sources show that the impact simply does not apply to projects like the one involved (e.g., the project falls outside a fault rupture zone). A "No Impact" answer should be explained where it is based on project-specific factors as well as general standards (e.g., the project will not expose sensitive receptors to pollutants, based on a project-specific screening analysis).
- 2) All answers must take account of the whole action involved, including off-site as well as on-site, cumulative as well as project-level, indirect as well as direct, and construction as well as operational impacts.
- 3) Once the lead agency has determined that a particular physical impact may occur, then the checklist answers must indicate whether the impact is potentially significant, less than significant with mitigation, or less than significant. "Potentially Significant Impact" is appropriate if there is substantial evidence that an effect may be significant. If there are one or more "Potentially Significant Impact" entries when the determination is made, an EIR is required.
- 4) "Negative Declaration: Less Than Significant With Mitigation Incorporated" applies where the incorporation of mitigation measures has reduced an effect from "Potentially Significant Impact" to a "Less Than Significant Impact." The lead agency must describe the mitigation measures, and briefly explain how they reduce the effect to a less than significant level (mitigation measures from "Earlier Analyses," as described in (5) below, may be cross-referenced).
- 5) Earlier analyses may be used where, pursuant to the tiering, program EIR, or other CEQA process, an effect has been adequately analyzed in an earlier EIR or negative declaration. Section 15063(c)(3)(D). In this case, a brief discussion should identify the following:
  - a) Earlier Analysis Used. Identify and state where they are available for review.
  - b) Impacts Adequately Addressed. Identify which effects from the above checklist were within the scope of and adequately analyzed in an earlier document pursuant to applicable legal standards, and state whether such effects were addressed by mitigation measures based on the earlier analysis.
  - c) Mitigation Measures. For effects that are "Less than Significant with Mitigation Measures Incorporated," describe the mitigation measures, which were incorporated or refined from the earlier document and the extent to which they address site-specific conditions for the project.
- 6) Lead agencies are encouraged to incorporate into the checklist references to information sources for potential impacts (e.g., general plans, zoning ordinances). Reference to a previously prepared or outside document should, where appropriate, include a reference to the page or pages where the statement is substantiated.
- 7) Supporting Information Sources: A source list should be attached, and other sources used or individuals contacted should be cited in the discussion.
- 8) This is only a suggested form, and lead agencies are free to use different formats; however, lead agencies should normally address the questions from this checklist that are relevant to a project's environmental effects in whatever format is selected.
- 9) The explanation of each issue should identify:
  - a) The significance criteria or threshold, if any, used to evaluate each question; and
  - b) The mitigation measure identified, if any, to reduce the impact to less than significance

Potentially Significant Impact (PSI)	Potentially Significant Unless Mitigation Incorporated (PSUMI)	Less Than Significant Impact (LTSI)	No Impact (NI)
--------------------------------------	--	-------------------------------------	----------------

**I. AESTHETICS**

Except as provided in Public Resources Code Section 21099, would the project:

- a) Have a substantial adverse effect on a scenic vista or scenic highway?

**a) The proposed project will be located west of the Townsite of Winterhaven at Sidewinder Road and Interstate 8; however, the proposed facility is not located within the vicinity of a scenic highway. It is not designated as a scenic highway in the Imperial County General Plan Circulation and Scenic Highways Element (Imperial County 2008a) nor is it identified on the California Scenic Highway Mapping System (Caltrans 2016). No scenic vistas or areas with high visual quality would be adversely affected by development of the proposed projects. Additionally, this proposed facility will install fencing and landscaping along the frontage of the property, paving parking lots and landscaping along portions of existing building thereby enhancing the visual character of this area. Any potential impacts would appear to be less than significant.**

- b) Substantially damage scenic resources, including, but not limited to trees, rock outcroppings, and historic buildings within a state scenic highway?

**b) The proposed project is not near a state scenic highway; therefore, it will not damage scenic resources including trees, outcropping, and historical buildings within a state scenic highway. No impact is expected.**

- c) In non-urbanized areas, substantially degrade the existing visual character or quality of public views of the site and its surrounding? (Public views are those that are experienced from publicly accessible vantage point.) If the project is in an urbanized area, would the project conflict with applicable zoning and other regulations governing scenic quality?

**c) The proposed project is consistent with current zoning and land uses in the surrounding parcels with an approved conditional use permit. The site is zoned for commercial uses and has been previously impacts by those uses. Therefore, a less than significant impact is expected.**

- d) Create a new source of substantial light or glare which would adversely affect day or nighttime views in the area?

**d) All on-site lighting will be required to be shielded from adjacent properties and roads. The proposed site would continue to be zoned as General Commercial. Therefore, a less than significant impact is expected.**

**II. AGRICULTURE AND FOREST RESOURCES**

In determining whether impacts to agricultural resources are significant environmental effects, lead agencies may refer to the California Agricultural Land Evaluation and Site Assessment Model (1997) prepared by the California Department of Conservation as an optional model to use in assessing impacts on agriculture and farmland. In determining whether impacts to forest resources, including timberland, are significant environmental effects, lead agencies may refer to information compiled by the California Department of Forestry and Fire Protection regarding the state's inventory of forest land, including the Forest and Range Assessment Project and the Forest Legacy Assessment project; and forest carbon measurement methodology provided in Forest Protocols adopted by the California Air Resources Board. Would the project:

- a) Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use?

	Potentially Significant Impact (PSI)	Potentially Significant Unless Mitigation Incorporated (PSUMI)	Less Than Significant Impact (LTSI)	No Impact (NI)
a) The proposed project is currently zoned for commercial uses. The proposed use appear consistent with general commercial type uses and would not appear to further impacts on this parcel of land. Previously, the parcel has been impacted by commercial uses over a number of years. <b>No impact is expected.</b>				
b) Conflict with existing zoning for agricultural use, or a Williamson Act Contract?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b) There are no Williamson Act contract lands on this parcel. <b>No impact is expected.</b>				
c) Conflict with existing zoning for, or cause rezoning of, forest land (as defined in Public Resources Code section 12220(g)), timberland (as defined by Public Resources Code section 4526), or timberland zoned Timberland Production (as defined by Government Code Section 51104(g))?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
c) The proposed project site is not zoned for, nor does it contain, forest land or timber land. As such, the project would not impact forest or timberlands. <b>No impact is expected.</b>				
d) Result in the loss of forest land or conversion of forest land to non-forest use?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
d) The proposed project site does not contain any forestland and would not convert any forestlands; therefore, the project would not impact forest lands. <b>No impact is expected.</b>				
e) Involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland, to non-agricultural use or conversion of forest land to non-forest use?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
e) The proposed project site is located in the Recreational/Open Space designation and zoned General Commercial. There are no existing forestlands on or in the immediate vicinity of the project site. Development of the proposed project would not result in the loss of forestland or conversion of forestland to non-forest use. There are adjacent commercial zoned parcels currently vacant; thus, the proposed project would appear to have <b>No Impacts</b> on expansion or conversion of any forestland.				

### III. AIR QUALITY

Where available, the significance criteria established by the applicable air quality management district or air pollution control district may be relied upon to the following determinations. Would the Project:

- |  |                          |                          |                                     |                          |
|--|--------------------------|--------------------------|-------------------------------------|--------------------------|
| a) Conflict with or obstruct implementation of the applicable air quality plan?  | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| a) The permittee is proposing to drill and operate a replacement commercial water well to serve the property. The project does not appear to conflict with any air quality plan or violate any air quality standard, nor will it expose sensitive receptors to pollutants or create objectionable odors. The project will adhere to the Air District's Fugitive Dust Rules (Regulation VIII- Fugitive Dust Rules). Therefore, <b>a less than significant impact is expected.</b> |                          |                          |                                     |                          |

Potentially Significant Impact (PSI)	Potentially Significant Unless Mitigation Incorporated (PSUMI)	Less Than Significant Impact (LTSI)	No Impact (NI)
--------------------------------------	--	-------------------------------------	----------------

- b) Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard?

**b) The permittee is proposing to construct and operate a replacement commercial water well to serve the existing gas station and the property in general. The project does not appear to conflict with any air quality plan or violate any air quality standard, nor will it expose sensitive receptors to pollutants or create objectionable odors. The project must adhere to the Air District's Fugitive Dust Rules (Regulation VIII-Fugitive Dust Rules). Therefore, a less than significant impact is expected.**

- c) Expose sensitive receptors to substantial pollutants concentrations?

**c) The proposed project to construct and operate a replacement commercial water well is not expected to expose sensitive receptors to substantial pollutants concentrations. Furthermore, with the continued adherence to the ICACPD requirements as shown above, any impacts would remain at a level less than significant.**

- d) Result in other emissions (such as those leading to odors adversely affecting a substantial number of people)?

**d) The proposed project is not expected to expose sensitive receptors to substantial pollutants concentrations. Furthermore, with the continued adherence to the ICACPD requirements as shown above, any impacts would remain at a level less than significant.**

**IV. BIOLOGICAL RESOURCES** *Would the project:*

- a) Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies or regulations, or by the California Department of Fish and Wildlife or U.S. Fish and Wildlife Service?

**a) The majority of the proposed project area is currently impacted by past general commercial uses. The parcel appears to have minimal impacts to any biological resources. Therefore, a less than significant impact is expected.**

- b) Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations, or by the California Department of Fish and Wildlife or U.S. Fish and Wildlife Service?

**b) Previously, the proposed site has been used for general commercial uses and the project area will not appear to further impact the site. Therefore, a less than significant impact is expected.**

- c) Have a substantial adverse effect on state or federally protected wetlands (including, but not limited to, marsh, vernal pool,

Potentially Significant Impact (PSI)	Potentially Significant Unless Mitigation Incorporated (PSUMI)	Less Than Significant Impact (LTSI)	No Impact (NI)
--------------------------------------	--	-------------------------------------	----------------

coastal, etc.) through direct removal, filling, hydrological interruption, or other means?

c) No wetlands or water resources are present on the project site; therefore, no impacts to wetland, riparian resources, or jurisdictional waters would occur as result of the Project. **No impact is expected.**

d) Would the project interfere substantially with the movement of any resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites?

d) There are no federally protected wetlands, resident or migratory fish or wildlife species or corridors for wildlife on the existing site. As explained Item a) above, the proposed project will not have an adverse effect on federally protected wetlands as defined by Section 404 of the Clean Water Act (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means. **No impact is expected.**

e) Conflict with any local policies or ordinance protecting biological resource, such as a tree preservation policy or ordinance?

e) The proposed project is zoned for commercial type uses; it is not subject to and does not conflict with any local policy or ordinances protecting biological resources, such as a tree preservation policy or ordinance. **No impact is expected.**

f) Conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan?

f) The proposed project site is not part of any adopted Habitat Conservation Plan, Natural Community Conservation Plan or local Plans would not conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan, **No impacts are expected.**

V. **CULTURAL RESOURCES** *Would the project:*

a) Cause a substantial adverse change in the significance of a historical resource pursuant to §15064.5?

a) The proposed project site was previously used for general commercial uses, which is located within disturbed land. The project will not appear to cause a substantial adverse change in the significance of an archaeological resource pursuant to §15064.5; Therefore, **any impacts are considered less than significant.**

b) Cause a substantial adverse change in the significance of an archaeological resource pursuant to §15064.5?

b) As mentioned under Item a) above, the proposed is located on previously disturbed land and it is not likely that any historical, archaeological or human remains will be discovered. Therefore, **any impacts would be less than significant.**

	Potentially Significant Impact (PSI)	Potentially Significant Unless Mitigation Incorporated (PSUMI)	Less Than Significant Impact (LTSI)	No Impact (NI)
--	--------------------------------------	--	-------------------------------------	----------------

- c) Disturb any human remains, including those interred outside of dedicated cemeteries?

c) As mentioned under Item a) above, the proposed project and facility is located on disturbed land zoned for commercial type uses and is not expected to directly or indirectly destroy a unique paleontological resource or unique geologic feature Therefore, **a less than significant impact is expected.**

VI. **ENERGY** *Would the project:*

- a) Result in potentially significant environmental impact due to wasteful, inefficient, or unnecessary consumption of energy resources, during project construction or operation?

The proposed replacement commercial water well and any related structure/housing for the water well will be designed in accordance with the California Energy Commission's 2019 Building Energy Efficiency Standards for Residential and Nonresidential Buildings and the California Green Building Standards (CCR, Title 24, and Part 11). Additionally, an energy analysis will be prepared for the project to quantify energy consumption. Further analysis of the project's energy consumption and consistency with applicable plans, policies, and regulations for reducing wasteful, inefficient, and unnecessary energy usage. Therefore, **a less than significant impact is expected.**

- b) Conflict with or obstruct a state or local plan for renewable energy or energy efficiency?

b) The proposed replacement commercial water well and any related structure/housing for the water well will be designed in accordance with the California Energy Commission's 2019 Building Energy Efficiency Standards for Residential and Nonresidential Buildings and the California Green Building Standards (CCR, Title 24, and Part 11). Additionally, an energy analysis will be prepared for the Project to quantify energy consumption. Further analysis of the Project's energy consumption and consistency with applicable plans, policies, and regulations for reducing wasteful, inefficient, and unnecessary energy usage. Therefore, **a less than significant impact is expected.**

VII. **GEOLOGY AND SOILS** *Would the project:*

- a) Directly or indirectly cause potential substantial adverse effects, including risk of loss, injury, or death involving:

a) The project as proposed does not appear to conflict with the geology and soils of adjacent properties. The project may be required to perform a grading and drainage plan/study acceptable to the Imperial County Public Works Department. Therefore, **a less than significant impact is expected.**

- 1) Rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault? Refer to Division of Mines and Geology Special Publication 42?

a) The proposed project is not located on a known fault. The Quadrangle Official Map Effective January

Potentially Significant Impact (PSI)	Potentially Significant Unless Mitigation Incorporated (PSUMI)	Less Than Significant Impact (LTSI)	No Impact (NI)
--------------------------------------	--	-------------------------------------	----------------

1, 1990 does not indicate any active faults in or near the project area. The Algodones Fault is approximately 5 mile west of the proposed project site. Therefore, **a less than significant impact is expected.**

- |  |                          |                          |                                     |                          |
|--|--------------------------|--------------------------|-------------------------------------|--------------------------|
| 2) Strong Seismic ground shaking?  | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| <p>2) The proposed project is not located in a "Special Studies Zone"; however, the site would still be affected by the occurrence of seismic activity to some degree, but no more than surrounding properties. Additionally, Imperial County is classified as Seismic Zone 4 by the Uniform Building Code which requires that any structures constructed would be built to incorporate the most stringent earthquake resistant measures the same as under the adopted Specific Plan, taking into account the above discussion and because seismic risk is associated with occupancy of future buildings regardless of its size which will require geotechnical review done on building permits. Therefore, <b>a less than significant impact is expected.</b></p>   |                          |                          |                                     |                          |
| 3) Seismic-related ground failure, including liquefaction and seiche/tsunami?  | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| <p>3) The proposed project is not located in a "Special Studies Zone"; however, the site could still be affected by the occurrence of seismic activity to some degree, but no more than surrounding properties. Additionally, Imperial County is classified as Seismic Zone 4 by the Uniform Building Code, which requires that any structures constructed would be built to incorporate the most stringent earthquake resistant measures. Detailed soil investigations shall be conducted prior to issuance of the initial building permits to assure that the proposed building is designed to withstand potential problems related to geology/soils/seismicity. Therefore, <b>a less than significant impact is expected.</b></p>   |                          |                          |                                     |                          |
| 4) Landslides?   | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| <p>4) <b>Less than Significant</b> (see above a)</p>   |                          |                          |                                     |                          |
| b) Result in substantial soil erosion or the loss of topsoil?  | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| <p>b) The project site is not located within an erosion susceptible area according to the Imperial County, Seismic and Public Safety Element, Figure 3; Therefore, <b>a less than significant impact is expected.</b></p>  |                          |                          |                                     |                          |
| c) Be located on a geologic unit or soil that is unstable or that would become unstable as a result of the project, and potentially result in on- or off-site landslides, lateral spreading, subsidence, liquefaction or collapse?   | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| <p>c) The project is not expected to have a significant adverse environmental impact on the existing geology and soils nor would it result in any direct geology/soils/seismicity impacts. According to the State of California's Revised January 1, 1990, <u>Special Studies Map</u>, the proposed project is not located in a "Special Studies Zone"; however, the site would still be affected by the occurrence of seismic activity to some degree, but no more than surrounding properties. Additionally, Imperial County is classified as Seismic Zone 4 by the Uniform Building Code (Sections 1626 through 1635), which requires that any structures constructed would be built to incorporate the most stringent earthquake resistant measures. Therefore, <b>a less than significant impact is expected.</b></p> |                          |                          |                                     |                          |
| d) Be located on expansive soil, as defined in the latest Uniform Building Code, creating substantial direct or indirect risk to life or property?   | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| <p>d) The proposed replacement commercial water well project does not appear to conflict with the geology and</p>  |                          |                          |                                     |                          |

Potentially Significant Impact (PSI)	Potentially Significant Unless Mitigation Incorporated (PSUMI)	Less Than Significant Impact (LTSI)	No Impact (NI)
--------------------------------------	--	-------------------------------------	----------------

soils of adjacent properties. Therefore, **a less than significant impact is expected.**

- e) Have soils incapable of adequately supporting the use of septic tanks or alternative waste water disposal systems where sewers are not available for the disposal of waste water?

e) The proposed project replacement commercial water well and any related structure/housing for the water well. The property already has a septic system for the existing services station. The new well location will be subject to review by Environmental Health, along with the compliance with the appropriate California Building Codes to ensure proper separation of the uses. Therefore, **a less than significant impact is expected**

- f) Directly or indirectly destroy a unique paleontological resource or site or unique geologic feature?

f) Considering that the project site was completely disturbed when previously constructed commercial uses were built, the probability of encountering an unforeseen/buried human remains is very low. Therefore, **a less than significant impact is expected.**

**VIII. GREENHOUSE GAS EMISSION** *Would the project:*

- a) Generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment?

a) The applicant permittee will construct and operate a replacement commercial water well to serve the existing gas station and the property in general. The project does not appear to significantly impact greenhouse gas emissions. Therefore, **a less than significant impact is expected**

- b) Conflict with an applicable plan or policy or regulation adopted for the purpose of reducing the emissions of greenhouse gases?

b) The proposed project will not conflict with an applicable plan, policy or regulation adopted for the purpose of reducing the emissions of greenhouse gases. The facility site was previously utilized for commercial uses. Therefore, **a less than significant impact is expected**

**IX. HAZARDS AND HAZARDOUS MATERIALS** *Would the project:*

- a) Create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials?

a) The proposed project would not appear to generate any significant hazards located near or adjacent to any site that uses hazardous materials or hazardous waste. Therefore, **a less than significant impact is expected.**

- b) Create a significant hazard to the public or the environment through reasonable foreseeable upset and accident conditions involving the release of hazardous materials into the environment?

Potentially Significant Impact (PSI)	Potentially Significant Unless Mitigation Incorporated (PSUMI)	Less Than Significant Impact (LTSI)	No Impact (NI)
--------------------------------------	--	-------------------------------------	----------------

b) All future development shall provide proof of a hazardous materials business plan and that appropriate permits have been obtained for any hazardous materials to be hauled. Therefore, **a less than significant impact is expected.**

c) Emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school?

c) The proposed project will not handle hazardous materials or waste within a one-quarter mile of an existing or proposed school site. **No Impact is expected.**

d) Be located on a site, which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment?

d) The proposed project is not located on a site that is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, therefore, would not create a significant hazard to the public or environment. **No Impact is expected.**

e) For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project result in a safety hazard or excessive noise for people residing or working in the project area?

e) The project site is not within two miles of the Yuma International Airport; however, **No impact is expected.** The proposed uses appear to be Normally Acceptable Uses per Table 2A of the Imperial County Airport Land Use Compatibility Plan on page 2-17.

f) Impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan?

f) The proposed project would not interfere with any adopted emergency response plan or emergency evacuation plan; therefore, no impact is expected. The permittee will meet any requirements requested by the Fire/OES Department for emergency responses and plans. **No impact is expected.**

g) Expose people or structures, either directly or indirectly, to a significant risk of loss, injury or death involving wildland fires?

g) The proposed project site is located within an unincorporated Local Responsibility Area classified as LRA "Unzoned" per Cal Fire Draft Fire Hazard Severity Zones in LRA for Imperial County. Therefore, it is not expected that it would expose people or structures, either directly or indirectly, to a significant risk of loss, injury or death involving wildland fires. **No impact is expected.**

**X. HYDROLOGY AND WATER QUALITY** *Would the project:*

a) Violate any water quality standards or waste discharge requirements or otherwise substantially degrade surface or ground water quality?

a) The project does not appear to violate any water quality standards or waste discharge orders. Therefore,

Potentially Significant Impact (PSI)	Potentially Significant Unless Mitigation Incorporated (PSUMI)	Less Than Significant Impact (LTSI)	No Impact (NI)
--------------------------------------	--	-------------------------------------	----------------

**a less than significant impact is expected.**

- b) Substantially decrease groundwater supplies or interfere substantially with groundwater recharge such that the project may impede sustainable groundwater management of the basin?

b) The proposed project is to replace the existing well. At the proposed 2 acre-feet, the project does not appear to significantly affect the existing groundwater supply or interfere with groundwater recharge. Therefore, **a less than significant impact is expected.**

- c) Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river or through the addition of impervious surfaces, in a manner which would:

c) Future development within the proposed project would not result in significant impacts to hydrology and water quality. Surface runoff quantities are a function of the impermeable surface area and land use types that will be created by development. The project site will not alter the course of a stream or river or create any substantial erosion or siltation on or off site. Any proposed grading will require drainage reviews and approval with Public Works. Therefore, **a less than significant impact is expected.**

- (i) result in substantial erosion or siltation on- or off-site;

i) The project has been previously used commercially and site has been impacted for a number of years. Therefore, **a less than significant impact is expected.**

- (ii) substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or offsite;

ii) The project would not appear to substantially increase the rate or amount of surface runoff resulting in flooding; the site is previously used for commercial uses and no additional structures are being proposed. Therefore, **a less than significant impact is expected.**

- (iii) create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff; or;

iii) The project does not appear to create or contribute to runoff water; the project has been previously used commercially and site has been impacted for a number of years. Therefore, **a less than significant impact is expected.**

- (iv) impede or redirect flood flows?

iv) The project would not appear to impede or redirect flood flows; the project has been previously used commercially and site has been impacted for a number of years. Therefore, **a less than significant impact is expected.**

- d) In flood hazard, tsunami, or seiche zones, risk release of pollutants due to project inundation?

d) The project site does not appear to be located in a potential seiche, tsunami, or mudflow zone. **No Impact**

Potentially Significant Impact (PSI)	Potentially Significant Unless Mitigation Incorporated (PSUMI)	Less Than Significant Impact (LTSI)	No Impact (NI)
--------------------------------------	--	-------------------------------------	----------------

is expected.

- e) Conflict with or obstruct implementation of a water quality control plan or sustainable groundwater management plan?

e) Future development within the proposed project would not result in significant impacts to hydrology and water quality. Surface runoff quantities are a function of the impermeable surface area and land use types that will be created by development. The project site will not alter the course of a stream or river or create any substantial erosion or siltation on or off site. The projects will be using an existing building on site and no additional structures are expected. The current site has as proposed structure on site and no additional structures are planned. Therefore, **a less than significant impact is expected.**

**XI. LAND USE AND PLANNING** *Would the project:*

- a) Physically divide an established community?

a) The proposed project is consistent with the intent of the County General Plan; water wells are allowed with an approved Conditional Use Permit in a C-2 Commercial zone, therefore, **less than significant impacts are expected.**

- b) Cause a significant environmental impact due to a conflict with any land use plan, policy, or regulation adopted for the purpose of avoiding or mitigating an environmental effect?

b) The proposed project is consistent with the intent of the County General Plan, and the County's Land Use Ordinance. The project is not located in or conflict with habitat conservation or natural community conservations area or plans. The proposed project is located in the Winterhaven area zoned for commercial uses and will not physically divide an established community. Therefore, **less than significant impacts are expected.**

**XII. MINERAL RESOURCES** *Would the project:*

- a) Result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the state?

a) The proposed project will not remove mineral resources on-site; therefore, **no impact is expected.**

- b) Result in the loss of availability of a locally-important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan?

b) The proposed project will not remove mineral resources on-site; therefore, **no impact is expected.**

**XIII. NOISE** *Would the project result in:*

- a) Generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?

Potentially Significant Impact (PSI)	Potentially Significant Unless Mitigation Incorporated (PSUMI)	Less Than Significant Impact (LTSI)	No Impact (NI)
--------------------------------------	--	-------------------------------------	----------------

a) The proposed project is to replace the existing well; it is not expected to exceed applicable noise standards noises on local landowners and/or expected to significantly increase the ambient noise level in the vicinity. Therefore, **a less than significant impact is expected.**

b) Generation of excessive ground-borne vibration or ground-borne noise levels?

b) The proposed project is to replace the existing well; it is not expected to generate any excessive ground-borne vibration or noise. Therefore, **a less than significant impact is expected.**

c) For a project located within the vicinity of a private airstrip or an airport land use plan or where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels?

c) The proposed project is to replace the existing well; it is not within the vicinity of private airstrip or an airport. **No Impact is expected.**

XIV. **POPULATION AND HOUSING** *Would the project:*

a) Induce substantial unplanned population growth in an area, either directly (for example, by proposing new homes and business) or indirectly (for example, through extension of roads or other infrastructure)?

a) The proposed project is to replace the existing well and does not appear to induce substantial population growth in the area, either directly or indirectly; therefore, **no impact is expected.**

b) Displace substantial numbers of existing people or housing, necessitating the construction of replacement housing elsewhere?

b) The proposed project is to replace the existing well and will not displace substantial numbers of exiting housing, necessitating the construction of replacement housing elsewhere; **therefore, no impact is expected.**

XV. **PUBLIC SERVICES**

a) Would the project result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services:

a) The proposed project will not physically impact any local government facilities or require for a new or altered government facility for any possible required services for proposed water well; **therefore, no impact is expected.**

1) Fire Protection?

1) An approved water supply capable of supplying the required fire flow consisting of underground pressure main(s) and hydrant(s) will be provided for the project. The construction and operation a replacement commercial water well to serve the existing gas station and the property in general will assist in the fire

Potentially Significant Impact (PSI)	Potentially Significant Unless Mitigation Incorporated (PSUMI)	Less Than Significant Impact (LTSI)	No Impact (NI)
--------------------------------------	--	-------------------------------------	----------------

protection of the site. **No Impact is expected.**

2) Police Protection?

**2) The project site is currently a service station. The proposed water will not have an impact on police protection. Both the California Highway Patrol and sheriff's office has active patrol in the area as well. No Impact is expected.**

3) Schools?

**3) The project would not result in an increase in population or housing and would not require additional school services. The project site is not near any schools. No Impact is expected.**

4) Parks?

**4) The project would not result in an increase in population or housing and would not increase demand/use for local parks. No Impact is expected.**

5) Other Public Facilities?

**5) The project would not appear to put an increased burden on off-site public services, including existing fire, police, school and other governmental services. therefore, no impact is expected.**

**XVI. RECREATION**

a) Would the project increase the use of the existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated?

**a) The proposed project would not increase the use of the existing neighborhood and regional parks or other recreational facilities; therefore, no impact is expected.**

b) Does the project include recreational facilities or require the construction or expansion of recreational facilities which might have an adverse effect on the environment?

**b) The proposed project would not appear to include or require the construction of recreational facilities; therefore, no impact is expected.**

**XVII. TRANSPORTATION** *Would the project:*

a) Conflict with a program plan, ordinance or policy addressing the circulation system, including transit, roadway, bicycle and pedestrian facilities?

**a) The proposed project is to replace the existing well; the applicant will comply with all applicable conditions and regulations with the County's circulation plan, land use ordinance, and transportation planning. No impact is expected.**

b) Would the project conflict or be inconsistent with the CEQA Guidelines section 15064.3, subdivision (b)?

**b) The proposed project is to replace the existing well; it does not appear to impact any public transit, bicycle**

Potentially Significant Impact (PSI)	Potentially Significant Unless Mitigation Incorporated (PSUMI)	Less Than Significant Impact (LTSI)	No Impact (NI)
--------------------------------------	--	-------------------------------------	----------------

or pedestrian facility. **No impacts are expected.**

- |   |                          |                          |                          |                                     |
|---|--------------------------|--------------------------|--------------------------|-------------------------------------|
| c) Substantially increases hazards due to a geometric design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment)? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
|---|--------------------------|--------------------------|--------------------------|-------------------------------------|

c) The project site is on previously constructed site. **No impact is expected.**

- |   |                          |                          |                          |                                     |
|---|--------------------------|--------------------------|--------------------------|-------------------------------------|
| d) Result in inadequate emergency access? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
|---|--------------------------|--------------------------|--------------------------|-------------------------------------|

d) All on-site traffic areas are existing with at least all weather access for fire protection vehicles. The proposed water well will not affect the existing emergency access. **No impact is expected.**

XVIII. **TRIBAL CULTURAL RESOURCES**

- |   |                          |                          |                                     |                          |
|---|--------------------------|--------------------------|-------------------------------------|--------------------------|
| a) Would the project cause a substantial adverse change in the significance of a tribal cultural resource, defined in Public Resources Code Section 21074 as either a site, feature, place, cultural landscape that is geographically defined in terms of the size and scope of the landscape, sacred place or object with cultural value to a California Native American tribe, and that is: | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
|---|--------------------------|--------------------------|-------------------------------------|--------------------------|

a) The construction and operation a replacement commercial water well to serve the existing gas station and the property in general is located on an existing disturbed site; the impacts appears to be less than significant for tribal cultural resources as defined in Public Resources Code Section 21074. Therefore, **a less than significant impact is expected.**

- |  |                          |                          |                                     |                          |
|--|--------------------------|--------------------------|-------------------------------------|--------------------------|
| (i) Listed or eligible for listing in the California Register of Historical Resources, or in a local register of historical resources as define in Public Resources Code Section 5020.1(k), or | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
|--|--------------------------|--------------------------|-------------------------------------|--------------------------|

(i) The project would not appear to cause an adverse change in the significance of a tribal cultural resource. The property site has previously been impacted by general commercial uses allowed in the current zone. AB 52 letters have been sent out to the Quechan Tribe for consultations. The County received a response of no comment from the Quechan Tribe on April 13, 2022. Therefore, **a less than significant impact is expected.**

- |   |                          |                          |                                     |                          |
|---|--------------------------|--------------------------|-------------------------------------|--------------------------|
| (ii) A resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision (c) of Public Resources Code Section 5024.1. In applying the criteria set forth is subdivision (c) of Public Resource Code Section 5024.1, the lead agency shall consider the significance of the resource to a California Native American Tribe. | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
|---|--------------------------|--------------------------|-------------------------------------|--------------------------|

(ii) The project site is zoned for general commercial uses and is used for commercial uses. The parcel has a gas station/convenience store on site and to date no evidence of cultural resources have been seen on site. Therefore, no resources as defined in the Public Resources Code Section 5024.1 appears to be impacted. Therefore, **a less than significant impact is expected.**

Potentially Significant Impact (PSI)	Potentially Significant Unless Mitigation Incorporated (PSUMI)	Less Than Significant Impact (LTSI)	No Impact (NI)
--------------------------------------	--	-------------------------------------	----------------

**XIX. UTILITIES AND SERVICE SYSTEMS** *Would the project:*

- a) Require or result in the relocation or construction of new or expanded water, wastewater treatment or stormwater drainage, electric power, natural gas, or telecommunications facilities, the construction of which could cause significant environmental effects?

a) The project proposes to construct and operate a replacement commercial water well to serve the existing gas station and the property in general. The property would utilize an onsite water well and septic system for water and sewer. **No impact is expected.**

- b) Have sufficient water supplies available to serve the project from existing and reasonably foreseeable future development during normal, dry and multiple dry years?

b) The project proposes to construct and operate a replacement commercial water well to serve the existing gas station and the property in general. The applicant shall be required to pay all applicable fees and improvements associated with developing their project. **No impact is expected.**

- c) Result in a determination by the wastewater treatment provider which serves or may serve the project that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments?

c) The proposed project is to replace the existing well; no change to the existing septic system for onsite wastewater treatment is proposed. **No impact is expected.**

- d) Generate solid waste in excess of State or local standards, or in excess of the capacity of local infrastructure, or otherwise impair the attainment of solid waste reduction goals?

d) The proposed project is to replace the existing well; the project does not propose to increase the generation of solid waste. **No impact is expected.**

- e) Comply with federal, state, and local management and reduction statutes and regulations related to solid waste?

e) All proposed projects within the County shall contract with a licensed waste hauler for waste generated by the facility. A waste management plan shall be submitted providing insight as to the waste deposition. Therefore, **a less than significant impact is expected.**

**XX. WILDFIRE**

If located in or near state responsibility areas or lands classified as very high fire hazard severity zones, would the Project:

- a) Substantially impair an adopted emergency response plan or emergency evacuation plan?

a) The site is not located on or near state responsibility, areas or lands classified as very high, high or moderate fire hazard severity zones. The project site is located west of the community of Winterhaven and

Potentially Significant Impact (PSI)	Potentially Significant Unless Mitigation Incorporated (PSUMI)	Less Than Significant Impact (LTSI)	No Impact (NI)
--------------------------------------	--	-------------------------------------	----------------

access to proposed project via Sidwinder Road and I-8 Highway. Therefore, a **less than significant impact is expected.**

- b) Due to slope, prevailing winds, and other factors, exacerbate wildfire risks, and thereby expose project occupants to pollutant concentrations from a wildfire or the uncontrolled spread of a wildfire?

**b) The site is not located or near state responsibility, areas or lands classified as very high, high or moderate fire hazard severity zones. The project appears to be surrounded by commercial related land. Although the County has experienced damage from heavy winds in the past, hazards in the County are managed by the MJHMP, which is reviewed and updated every 5 years (County 2021). Therefore, a less than significant impact is expected.**

- c) Require the installation or maintenance of associated infrastructure (such as roads, fuel breaks, emergency water sources, power lines or other utilities) that may exacerbate fire risk or that may result in temporary or ongoing impacts to the environment?

**c) The proposed project is to construct and operate a replacement water well, that action does not appear to adversely affect either the existing operations on the property or impact infrastructure. Therefore, a less than significant impact is expected.**

- d) Expose people or structures to significant risks, including downslope or downstream flooding or landslides, as a result of runoff, post-fire slope instability, or drainage changes?

**d) The project is located on flat and moderately sloped desert terrain. The proposed project is to construct and operate a replacement water well, that action does not appear to adversely affect the existing drainage. Therefore, a less than significant impact is expected.**

**NEGATIVE DECLARATION – County of Imperial**

---

*The following Negative Declaration is being circulated for public review in accordance with the California Environmental Quality Act Section 21091 and 21092 of the Public Resources Code.*

---

**Project Name:** Jamal Shaow Project, Conditional Use Permit CUP #22-0010

**Project Applicant:** Jamal Shaow, 611 Sidewinder Road, Winterhaven

**Project Location:** The project site is located at 611 Sidewinder Road, Winterhaven, CA, 92283. The legal description for this parcel is "a Portion of the South Half, of the Southeast Quarter, of Section 21, T16S, R21E, and SBBM; (APN 056-470-009-000) located west of the unincorporated Winterhaven town site of the County of Imperial. State of California.

**Project Summary:** The applicant proposes Conditional Use Permits #22-0010 for a new Commercial Water Well on APN #056-470-009-000. The applicant will construct and operate a replacement Commercial Water Well to serve the existing gas station and the property in general located at 611 Sidewinder Road, Winterhaven, CA. The maximum annual water extraction will be two (2) acre-feet.

**VI. FINDINGS**

This is to advise that the County of Imperial, acting as the lead agency, has conducted an Initial Study to determine if the project may have a significant effect on the environmental and is proposing this Negative Declaration based upon the following findings:

The Initial Study shows that there is no substantial evidence that the project may have a significant effect on the environment and a NEGATIVE DECLARATION will be prepared.

The Initial Study identifies potentially significant effects but:

- (1) Proposals made or agreed to by the applicant before this proposed Mitigated Negative Declaration was released for public review would avoid the effects or mitigate the effects to a point where clearly no significant effects would occur.
- (2) There is no substantial evidence before the agency that the project may have a significant effect on the environment.
- (3) Mitigation measures are required to ensure all potentially significant impacts are reduced to levels of insignificance.

A NEGATIVE DECLARATION will be prepared.

If adopted, the Negative Declaration means that an Environmental Impact Report will not be required. Reasons to support this finding are included in the attached Initial Study. The project file and all related documents are available for review at the County of Imperial, Planning & Development Services Department, 801 Main Street, El Centro, CA 92243 (442) 265-1736.

**NOTICE**

---

The public are invited to comment on the proposed Negative Declaration during the review period.

---

Date of Determination                      Jim Minnick, Director of Planning & Development Services

---

*The Applicant hereby acknowledges and accepts the results of the Environmental Evaluation Committee (EEC) and hereby agrees to implement all Mitigation Measures, if applicable, as outlined in the MMRP.*

# COMMENT LETTERS

AIR POLLUTION CONTROL DISTRICT

April 26, 2022

Mr. Jim Minnick  
Planning & Development Services Director  
801 Main St.  
El Centro, CA 92243

RECEIVED

APR 21 2022

IMPERIAL COUNTY  
PLANNING & DEVELOPMENT SERVICES

SUBJECT: Conditional Use Permit 21-0010

Dear Mr. Minnick:

The Imperial County Air Pollution Control District ("Air District") thanks you for the opportunity to review the application for Conditional Use Permit 22-0010 to allow the construction of a new water well at 611 Sidewinder Road in Winterhaven, California, also identified as Assessor's Parcel Number 056-470-009-000. The water well will supply water to an existing gas station at that location.

A query of Air District records indicate that Permit 2082 for this business is in good standing. All construction activities must adhere to the Air District's **Regulation VIII** which is designed to limit emissions of fugitive dust (PM10) to 20% opacity. Any **generator greater than 50 horsepower** used for standby-backup purposes must be permitted through the Engineering and Permitting Division of the Air District.

The Air District's rule book can be accessed via the internet at <https://apcd.imperialcounty.org/rules-and-regulations/>. Should you have questions, please call our office at (442) 265-1800.

Sincerely,

Curtis Blondell  
ARC Environmental Coordinator
