## SECTION 1 INTRODUCTION

### A. PURPOSE

This document is a ☐ policy-level, ☒ project level Initial Study for evaluation of potential environmental impacts resulting with the proposed Parcel Map (Refer to Exhibit "A" & "B").

### B. CALIFORNIA ENVIRONMENTAL QUALITY ACT (CEQA) REQUIREMENTS AND THE IMPERIAL COUNTY'S GUIDELINES FOR IMPLEMENTING CEQA

As defined by Section 15063 of the State California Environmental Quality Act (CEQA) Guidelines and Section 7 of the County's "CEQA Regulations Guidelines for the Implementation of CEQA, as amended", an **Initial Study** is prepared primarily to provide the Lead Agency with information to use as the basis for determining whether an Environmental Impact Report (EIR), Negative Declaration, or Mitigated Negative Declaration would be appropriate for providing the necessary environmental documentation and clearance for any proposed project.

☐ According to Section 15065, an **EIR** is deemed appropriate for a particular proposal if the following conditions occur:

- The proposal has the potential to substantially degrade quality of the environment.
- The proposal has the potential to achieve short-term environmental goals to the disadvantage of long-term environmental goals.
- The proposal has possible environmental effects that are individually limited but cumulatively considerable.
- The proposal could cause direct or indirect adverse effects on human beings.

☐ According to Section 15070(a), a **Negative Declaration** is deemed appropriate if the proposal would not result in any significant effect on the environment.

☐ According to Section 15070(b), a **Mitigated Negative Declaration** is deemed appropriate if it is determined that though a proposal could result in a significant effect, mitigation measures are available to reduce these significant effects to insignificant levels.

This Initial Study has determined that the proposed applications will not result in any potentially significant environmental impacts and therefore, a Negative Declaration is deemed as the appropriate document to provide necessary environmental evaluations and clearance as identified hereinafter.

This Initial Study and Negative Declaration are prepared in conformance with the California Environmental Quality Act of 1970, as amended (Public Resources Code, Section 21000 et. seq.); Section 15070 of the State & County of Imperial's Guidelines for Implementation of the California Environmental Quality Act of 1970, as amended (California Code of Regulations, Title 14, Chapter 3, Section 15000, et. seq.); applicable requirements of the County of Imperial; and the regulations, requirements, and procedures of any other responsible public agency or an agency with jurisdiction by law.

Pursuant to the County of Imperial Guidelines for Implementing CEQA, depending on the project scope, the County of Imperial Board of Supervisors, Planning Commission and/or Planning Director is designated the Lead Agency, in accordance with Section 15050 of the CEQA Guidelines. The Lead Agency is the public agency which has the

---

principal responsibility for approving the necessary environmental clearances and analyses for any project in the County.

### **C. INTENDED USES OF INITIAL STUDY AND NEGATIVE DECLARATION**

This Initial Study and Negative Declaration are informational documents which are intended to inform County of Imperial decision makers, other responsible or interested agencies, and the general public of potential environmental effects of the proposed applications. The environmental review process has been established to enable public agencies to evaluate environmental consequences and to examine and implement methods of eliminating or reducing any potentially adverse impacts. While CEQA requires that consideration be given to avoiding environmental damage, the Lead Agency and other responsible public agencies must balance adverse environmental effects against other public objectives, including economic and social goals.

The Initial Study and Negative Declaration, prepared for the project will be circulated for a period of 20 days (30-days if submitted to the State Clearinghouse for a project of area-wide significance) for public and agency review and comments. At the conclusion, if comments are received, the County Planning & Development Services Department will prepare a document entitled "Responses to Comments" which will be forwarded to any commenting entity and be made part of the record within 10-days of any project consideration.

### **D. CONTENTS OF INITIAL STUDY & NEGATIVE DECLARATION**

This Initial Study is organized to facilitate a basic understanding of the existing setting and environmental implications of the proposed applications.

#### **SECTION 1**

**I. INTRODUCTION** presents an introduction to the entire report. This section discusses the environmental process, scope of environmental review, and incorporation by reference documents.

#### **SECTION 2**

**II. ENVIRONMENTAL CHECKLIST FORM** contains the County's Environmental Checklist Form. The checklist form presents results of the environmental evaluation for the proposed applications and those issue areas that would have either a significant impact, potentially significant impact, or no impact.

**PROJECT SUMMARY, LOCATION AND ENVIRONMENTAL SETTINGS** describes the proposed project entitlements and required applications. A description of discretionary approvals and permits required for project implementation is also included. It also identifies the location of the project and a general description of the surrounding environmental settings.

**ENVIRONMENTAL ANALYSIS** evaluates each response provided in the environmental checklist form. Each response checked in the checklist form is discussed and supported with sufficient data and analysis as necessary. As appropriate, each response discussion describes and identifies specific impacts anticipated with project implementation.

#### **SECTION 3**

**III. MANDATORY FINDINGS** presents Mandatory Findings of Significance in accordance with Section 15065 of the CEQA Guidelines.

**IV. PERSONS AND ORGANIZATIONS CONSULTED** identifies those persons consulted and involved in preparation of this Initial Study and Negative Declaration.

VII. FINDINGS

SECTION 4

VIII. RESPONSE TO COMMENTS (IF ANY)

IX. MITIGATION MONITORING & REPORTING PROGRAM (MMRP) (IF ANY)

E. SCOPE OF ENVIRONMENTAL ANALYSIS

For evaluation of environmental impacts, each question from the Environmental Checklist Form is summarized and responses are provided according to the analysis undertaken as part of the Initial Study. Impacts and effects will be evaluated and quantified, when appropriate. To each question, there are four possible responses, including:

1. **No Impact:** A "No Impact" response is adequately supported if the impact simply does not apply to the proposed applications.
2. **Less Than Significant Impact:** The proposed applications will have the potential to impact the environment. These impacts, however, will be less than significant; no additional analysis is required.
3. **Less Than Significant With Mitigation Incorporated:** This applies where incorporation of mitigation measures has reduced an effect from "Potentially Significant Impact" to a "Less Than Significant Impact".
4. **Potentially Significant Impact:** The proposed applications could have impacts that are considered significant. Additional analyses and possibly an EIR could be required to identify mitigation measures that could reduce these impacts to less than significant levels.

F. POLICY-LEVEL or PROJECT LEVEL ENVIRONMENTAL ANALYSIS

This Initial Study and Negative Declaration will be conducted under a ☐ policy-level, ☒ project level analysis. Regarding mitigation measures, it is not the intent of this document to "overlap" or restate conditions of approval that are commonly established for future known projects or the proposed applications. Additionally, those other standard requirements and regulations that any development must comply with, that are outside the County's jurisdiction, are also not considered mitigation measures and therefore, will not be identified in this document.

G. TIERED DOCUMENTS AND INCORPORATION BY REFERENCE

Information, findings, and conclusions contained in this document are based on incorporation by reference of tiered documentation, which are discussed in the following section.

1. Tiered Documents

As permitted in Section 15152(a) of the CEQA Guidelines, information and discussions from other documents can be included into this document. Tiering is defined as follows:

"Tiering refers to using the analysis of general matters contained in a broader EIR (such as the one prepared for a general plan or policy statement) with later EIRs and negative declarations on narrower projects;

---

incorporating by reference the general discussions from the broader EIR; and concentrating the later EIR or negative declaration solely on the issues specific to the later project."

Tiering also allows this document to comply with Section 15152(b) of the CEQA Guidelines, which discourages redundant analyses, as follows:

"Agencies are encouraged to tier the environmental analyses which they prepare for separate but related projects including the general plans, zoning changes, and development projects. This approach can eliminate repetitive discussion of the same issues and focus the later EIR or negative declaration on the actual issues ripe for decision at each level of environmental review. Tiering is appropriate when the sequence of analysis is from an EIR prepared for a general plan, policy or program to an EIR or negative declaration for another plan, policy, or program of lesser scope, or to a site-specific EIR or negative declaration."

Further, Section 15152(d) of the CEQA Guidelines states:

"Where an EIR has been prepared and certified for a program, plan, policy, or ordinance consistent with the requirements of this section, any lead agency for a later project pursuant to or consistent with the program, plan, policy, or ordinance should limit the EIR or negative declaration on the later project to effects which:

(1) Were not examined as significant effects on the environment in the prior EIR; or

(2) Are susceptible to substantial reduction or avoidance by the choice of specific revisions in the project, by the imposition of conditions, or other means."

## **2. Incorporation By Reference**

Incorporation by reference is a procedure for reducing the size of EIRs/MND and is most appropriate for including long, descriptive, or technical materials that provide general background information, but do not contribute directly to the specific analysis of the project itself. This procedure is particularly useful when an EIR or Negative Declaration relies on a broadly-drafted EIR for its evaluation of cumulative impacts of related projects (*Las Virgenes Homeowners Federation v. County of Los Angeles* [1986, 177 Ca.3d 300]). If an EIR or Negative Declaration relies on information from a supporting study that is available to the public, the EIR or Negative Declaration cannot be deemed unsupported by evidence or analysis (*San Francisco Ecology Center v. City and County of San Francisco* [1975, 48 Ca.3d 584, 595]). This document incorporates by reference appropriate information from the "Final Environmental Impact Report and Environmental Assessment for the "County of Imperial General Plan EIR" prepared by Brian F. Mooney Associates in 1993 and updates.

When an EIR or Negative Declaration incorporates a document by reference, the incorporation must comply with Section 15150 of the CEQA Guidelines as follows:

- The incorporated document must be available to the public or be a matter of public record (CEQA Guidelines Section 15150[a]). The General Plan EIR and updates are available, along with this document, at the County of Imperial Planning & Development Services Department, 801 Main Street, El Centro, CA 92243 Ph. (442) 265-1736.
- This document must be available for inspection by the public at an office of the lead agency (CEQA Guidelines Section 15150[b]). These documents are available at the County of Imperial Planning & Development Services Department, 801 Main Street, El Centro, CA 92243 Ph. (442) 265-1736.
- These documents must summarize the portion of the document being incorporated by reference or briefly describe information that cannot be summarized. Furthermore, these documents must describe the

---

relationship between the incorporated information and the analysis in the tiered documents (CEQA Guidelines Section 15150[c]). As discussed above, the tiered EIRs address the entire project site and provide background and inventory information and data which apply to the project site. Incorporated information and/or data will be cited in the appropriate sections.

- These documents must include the State identification number of the incorporated documents (CEQA Guidelines Section 15150[d]). The State Clearinghouse Number for the County of Imperial General Plan EIR is SCH #93011023.
- The material to be incorporated in this document will include general background information (CEQA Guidelines Section 15150[f]). This has been previously discussed in this document.

---

## *II. Environmental Checklist*

---

1. **Project Title:** David P. Church Subdivision Parcel Map #02496
2. **Lead Agency:** Imperial County Planning & Development Services Department
3. **Contact person and phone number:** Michael Abraham, Assistant Director (442)265-1736
4. **Address:** 801 Main Street, El Centro CA, 92243
5. **E-mail:** [michaelabraham@co.imperial.ca.us](mailto:michaelabraham@co.imperial.ca.us)
6. **Project location:** APN: 054-210-078. The project is located within the townsite of Heber, within the jurisdiction of Imperial County, California. Currently the project site is used for agricultural land use. The parcel abuts the railroad tracts that intersects Heber.
7. **Project sponsor's name and address:** David P. Church  
15882 Wakefield Lane,  
San Diego, CA 92127
8. **General Plan designation:** Townsite of Heber Specific Plan Area – General Commercial and Light Industrial
9. **Zoning:** C-2 (Medium Commercial) and M-1 (Light Industrial)
10. **Description of project:** Applicant is proposing a minor subdivision to create four (4) parcels out of APN 054-210-078-000, the project totals 56.46 AC approximately:  
Three (3) parcels are proposed for Commercial Development within an existing C-2 (Medium Commercial) zoning:
  - Parcel 1- 1.48 AC
  - Parcel 2- 3.35 AC
  - Parcel 3- 3.43 AC  
One (1) parcel is proposed to remain in agricultural with M-1 (Light Industrial) zoning:
  - Parcel 4 – 48.19 AC
11. **Surrounding land uses and setting:** The project site is located South of State Hwy 86, with residential and commercial uses to the North, residential and agricultural uses to the East, a feed lot to the South, and industrial uses to the West. The project is surrounded by diverse zoning: C-2 (Medium Commercial), R-4, R-3 to the North, M-1 and GS to the West, A-3-G-SPA to the South, R-1 and R-3 to the East.
12. **Other public agencies whose approval is required** (e.g., permits, financing approval, or participation agreement.): Planning Commission.

**13. Have California Native American tribes traditionally and culturally affiliated with the project area requested consultation pursuant to Public Resources Code section 21080.3.1? If so, is there a plan for consultation that includes, for example, the determination of significance of impacts to tribal cultural resources, procedures regarding confidentiality, etc.?**

The AB 52 Notice of Opportunity to consult was mailed via certified mail to the Quechan Indian Tribal Governments on March 7, 2022 for their review and comment. The Quechan Indian Tribe responded on March 7, 2022 and does not wish to comment on this project.

### ENVIRONMENTAL FACTORS POTENTIALLY AFFECTED:

The environmental factors checked below would be potentially affected by this project, involving at least one impact that is a "Potentially Significant Impact" as indicated by the checklist on the following pages.

- |  |   |   |
|--|---|---|
| <input type="checkbox"/> Aesthetics                | <input type="checkbox"/> Agriculture and Forestry Resources | <input type="checkbox"/> Air Quality                        |

### ENVIRONMENTAL EVALUATION COMMITTEE (EEC) DETERMINATION

After Review of the Initial Study, the Environmental Evaluation Committee has:

☒ Found that the proposed project COULD NOT have a significant effect on the environment, and a NEGATIVE DECLARATION will be prepared.

☐ Found that although the proposed project could have a significant effect on the environment, there will not be a significant effect in this case because revisions in the project have been made by or agreed to by the project proponent. A MITIGATED NEGATIVE DECLARATION will be prepared.

☐ Found that the proposed project MAY have a significant effect on the environment, and an ENVIRONMENTAL IMPACT REPORT is required.

☐ Found that the proposed project MAY have a "potentially significant impact" or "potentially significant unless mitigated" impact on the environment, but at least one effect 1) has been adequately analyzed in an earlier document pursuant to applicable legal standards, and 2) has been addressed by mitigation measures based on the earlier analysis as described on attached sheets. An ENVIRONMENTAL IMPACT REPORT is required, but it must analyze only the effects that remain to be addressed.

☐ Found that although the proposed project could have a significant effect on the environment, because all potentially significant effects (a) have been analyzed adequately in an earlier EIR or NEGATIVE DECLARATION pursuant to applicable standards, and (b) have been avoided or mitigated pursuant to that earlier EIR or NEGATIVE DECLARATION, including revisions or mitigation measures that are imposed upon the proposed project, nothing further is required.

## **PROJECT SUMMARY**

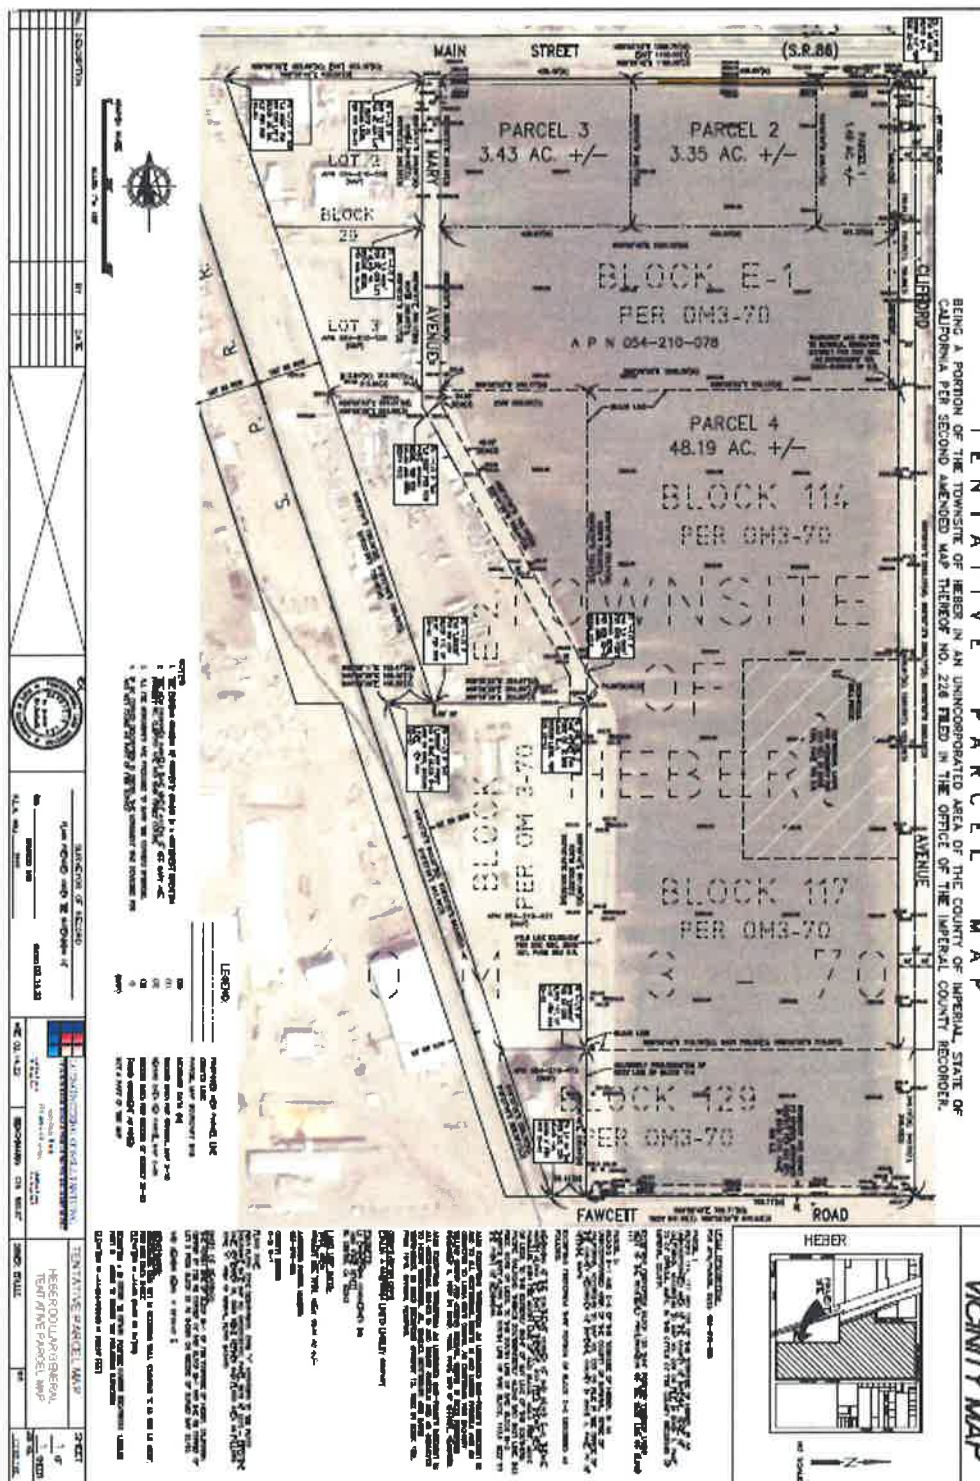

---

- A. Project Location:** The project is located at 1072 Mary Ave., Heber, CA 92249 - APN: 054-210-078-000.
- B. Project Summary:** Applicant is proposing a minor subdivision to create three parcels of APN 054-210-078-000 for Commercial Development (Parcel 1-1.48 AC, 2-3.35 AC and 3-3.43 AC) within a C-2 (Medium Commercial) zone and an additional Parcel 4 -48.49 AC to remain in agricultural use zoned M-1 (Light Industrial).
- C. Environmental Setting:** The existing land use surrounding the project site consists of developed land which varies in zoning residential, commercial, and industrial.
- D. Analysis:** Proposed subdivision would create three parcels within an existing C-2 zone designation and one parcel within an existing M-1 zone designation, no change to the existing zoning is anticipated. The project is also consistent with Section 90303.02 Length to width ratio and Section 90303.01 Lot Size as the minimum parcel size for C-2 Zone of 20,000 square feet, and the minimum parcel size of M-1 Zone of 10,000 square feet.
- E. General Plan Consistency:** Proposed subdivision would create three parcels within an existing land use designation of Medium Commercial and one parcel within an existing Light Industrial designation per Heber Urban Area Plan, Figure 1 "Heber Urban Area Map". No change to the existing land use designation is anticipated, therefore, the project could be considered consistent with the Imperial County General Plan.

Exhibit "A"  
Vicinity Map

---

## EVALUATION OF ENVIRONMENTAL IMPACTS:

- 1) A brief explanation is required for all answers except "No Impact" answers that are adequately supported by the information sources a lead agency cites in the parentheses following each question. A "No Impact" answer is adequately supported if the referenced information sources show that the impact simply does not apply to projects like the one involved (e.g., the project falls outside a fault rupture zone). A "No Impact" answer should be explained where it is based on project-specific factors as well as general standards (e.g., the project will not expose sensitive receptors to pollutants, based on a project-specific screening analysis).
- 2) All answers must take account of the whole action involved, including off-site as well as on-site, cumulative as well as project-level, indirect as well as direct, and construction as well as operational impacts.
- 3) Once the lead agency has determined that a particular physical impact may occur, then the checklist answers must indicate whether the impact is potentially significant, less than significant with mitigation, or less than significant. "Potentially Significant Impact" is appropriate if there is substantial evidence that an effect may be significant. If there are one or more "Potentially Significant Impact" entries when the determination is made, an EIR is required.
- 4) "Negative Declaration: Less Than Significant With Mitigation Incorporated" applies where the incorporation of mitigation measures has reduced an effect from "Potentially Significant Impact" to a "Less Than Significant Impact." The lead agency must describe the mitigation measures, and briefly explain how they reduce the effect to a less than significant level (mitigation measures from "Earlier Analyses," as described in (5) below, may be cross-referenced).
- 5) Earlier analyses may be used where, pursuant to the tiering, program EIR, or other CEQA process, an effect has been adequately analyzed in an earlier EIR or negative declaration. Section 15063(c)(3)(D). In this case, a brief discussion should identify the following:
  - a) Earlier Analysis Used. Identify and state where they are available for review.
  - b) Impacts Adequately Addressed. Identify which effects from the above checklist were within the scope of and adequately analyzed in an earlier document pursuant to applicable legal standards, and state whether such effects were addressed by mitigation measures based on the earlier analysis.
  - c) Mitigation Measures. For effects that are "Less than Significant with Mitigation Measures Incorporated," describe the mitigation measures which were incorporated or refined from the earlier document and the extent to which they address site-specific conditions for the project.
- 6) Lead agencies are encouraged to incorporate into the checklist references to information sources for potential impacts (e.g., general plans, zoning ordinances). Reference to a previously prepared or outside document should, where appropriate, include a reference to the page or pages where the statement is substantiated.
- 7) Supporting Information Sources: A source list should be attached, and other sources used or individuals contacted should be cited in the discussion.
- 8) This is only a suggested form, and lead agencies are free to use different formats; however, lead agencies should normally address the questions from this checklist that are relevant to a project's environmental effects in whatever format is selected.
- 9) The explanation of each issue should identify:
  - a) the significance criteria or threshold, if any, used to evaluate each question; and
  - b) the mitigation measure identified, if any, to reduce the impact to less than significance

## I. AESTHETICS

Except as provided in Public Resources Code Section 21099, would the project:

- a) Have a substantial adverse effect on a scenic vista or scenic highway? ☐ ☐ ☐ ☒  
a) Four areas within the County have the potential as state-designated scenic highways, however the project site is not located near any scenic vista or scenic highway according to the Imperial County General Plan<sup>1</sup> Circulation and Scenic Highway Element; therefore, no impact is expected.
- b) Substantially damage scenic resources, including, but not limited to trees, rock outcroppings, and historic buildings within a state scenic highway? ☐ ☐ ☐ ☒  
b) As previously stated, the proposed project is not located near a Scenic vista or Scenic Highway and would not substantially damage scenic resources. Therefore, no impact is expected.
- c) In non-urbanized areas, substantially degrade the existing visual character or quality of public views of the site and its surrounding? (Public views are those that are experienced from publicly accessible vantage point.) If the project is in an urbanized area, would the project conflict with applicable zoning and other regulations governing scenic quality? ☐ ☐ ☒ ☐  
c) The proposed project would not substantially physically degrade the existing visual character since there are existing residences near the proposed project. Therefore, any impacts are considered to be less than significant.
- d) Create a new source of substantial light or glare which would adversely affect day or nighttime views in the area? ☐ ☐ ☒ ☐  
d) The proposed project would create three parcels for commercial and one parcel to remain for agricultural use; however it is not expected that it would be a substantial light or glare which would adversely affect day or nighttime views in the area. Any impacts are considered to be less than significant.

## II. AGRICULTURE AND FOREST RESOURCES

In determining whether impacts to agricultural resources are significant environmental effects, lead agencies may refer to the California Agricultural Land Evaluation and Site Assessment Model (1997) prepared by the California Department of Conservation as an optional model to use in assessing impacts on agriculture and farmland. In determining whether impacts to forest resources, including timberland, are significant environmental effects, lead agencies may refer to information compiled by the California Department of Forestry and Fire Protection regarding the state's inventory of forest land, including the Forest and Range Assessment Project and the Forest Legacy Assessment project; and forest carbon measurement methodology provided in Forest Protocols adopted by the California Air Resources Board. --Would the project:

- a) Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use? ☐ ☐ ☒ ☐  
a) The proposed project site is listed as "Farmland of Statewide Importance" per the Imperial County Important Farmland 2016 Map<sup>2</sup>, the parcel has an existing non-conforming agricultural use that is proposed to remain. If the proposed parcel map is approved, Parcels 1, 2 and 3 (8.27 +/- AC) would be used for a commercial use and would cease the agricultural use of the parcel. Proposed Parcel 4 would continue the existing agricultural use, however they would continue to be zoned M-1 Light Industrial and could allow for industrial permitted uses per Imperial County Land Use Ordinance Title 9 Division 9 Chapter 15 "M-1 Light Industrial". Since the agricultural use is an existing non-conforming use of the property, the conversion of the agricultural use to a non-agricultural use is considered less than significant.
- b) Conflict with existing zoning for agricultural use, or a ☐ ☐ ☐ ☒

<sup>1</sup> Imperial County General Plan

<sup>2</sup> County Important Farmland 2016 Map

Williamson Act Contract?

**b) The proposed project is listed as "Non-Enrolled Land", therefore it is not expected to conflict with existing zoning for agricultural use, or a Williamson Act Contract. No impact is expected.**

- c) Conflict with existing zoning for, or cause rezoning of, forest land (as defined in Public Resources Code section 12220(g)), timberland (as defined by Public Resources Code section 4526), or timberland zoned Timberland Production (as defined by Government Code Section 51104(g))?
- ☐ ☐ ☐ ☒

**c) The proposed project is consistent with the zoning, and it is not located within a forestland or timberland; therefore, it is not expected to conflict with existing zoning for, or cause rezoning of, forest land (as defined in Public Resources Code section 12220(g)), timberland (as defined by Public Resources Code section 4526), or timberland zoned Timberland Production (as defined by Government Code Section 51104(g)). No impacts are expected.**

- d) Result in the loss of forest land or conversion of forest land to non-forest use?
- ☐ ☐ ☐ ☒

**d) The proposed project is not located in a forest land, therefore, it is not expected to result in the loss of forest land or conversion of forest land to non-forest use. No impacts are expected.**

- e) Involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland, to non-agricultural use or conversion of forest land to non-forest use?
- ☐ ☐ ☒ ☐

**e) The project proposes a minor subdivision to create three parcels for commercial development and one parcel to remain for agricultural use; no new construction is proposed as a result of this project, and it is not expected to change the existing environment that could result in the conversion of farmland. Therefore, impacts are expected to be less than significant.**

### III. AIR QUALITY

Where available, the significance criteria established by the applicable air quality management district or air pollution control district may be relied upon to the following determinations. Would the Project:

- a) Conflict with or obstruct implementation of the applicable air quality plan?
- ☐ ☐ ☒ ☐

**a) The proposed project is for a minor subdivision, and it is not expected to conflict with or obstruct implementation of the applicable air quality plan. Per APCD comment letter<sup>3</sup> dated March 17, 2022, any future development on the three commercial zoned parcels must adhere to Air District rules and regulations. Said measures would bring the project's impact less than significant.**

- b) Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard?
- ☐ ☐ ☒ ☐

**b) The proposed project is for a minor subdivision, As previously stated, under item a) above, any future construction as a result of the subdivision shall comply with the rules and regulations of APCD, therefore, it is not expected that proposed project would contribute substantially to an existing or projected air quality violation. Therefore, less than significant impact is expected.**

- c) Expose sensitive receptors to substantial pollutants concentrations?
- ☐ ☐ ☒ ☐

**c) The project proposes a minor subdivision to create three parcels for commercial development, proposed one parcel would continue the existing agricultural use and the existing industrial zoning is expected to remain. The nearest receptor are the residences located in close proximity North and West of the project site. However, as stated above under item a) any future development shall comply with APCD rules and regulations. It is expected that compliance with APCD requirements would bring impacts to less than significant levels.**

<sup>3</sup> APCD comment letter dated March 17, 2022

- d) Result in other emissions (such as those leading to odors adversely affecting a substantial number of people?) ☐ ☐ ☒ ☐

**d)** If the Parcel Map is approved, the subsequent construction and operation of the commercial and industrial development may result in other emissions which may affect the residences abutting the project site, however, any new development shall be consistent with the land use designation and APCD rules and regulations. Since the minor subdivision does not anticipate any change in the existing land use designation which is C-2 (Medium Commercial) and L-1 (Light Industrial), impacts are considered less than significant.

IV. **BIOLOGICAL RESOURCES** *Would the project:*

- a) Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies or regulations, or by the California Department of Fish and Wildlife or U.S. Fish and Wildlife Service? ☐ ☐ ☒ ☐

**a)** The proposed project site is located within disturbed land and does not appear to have a substantially adverse effect, either directly or through habitat modification, or any species identified as a candidate, sensitive, or special status species in local or regional plan, policies, or regulation, or by the California Department of Fish and Game or U.S. Fish and Wildlife Services. Impacts are considered less than significant.

- b) Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations, or by the California Department of Fish and Wildlife or U.S. Fish and Wildlife Service? ☐ ☐ ☒ ☐

**b)** According to the Imperial County General Plan's Conservation and Open Space Element, the project site is not within a riparian habitat per Figure 1 "Sensitive Habitats", or an "Agency-Designated Habitat" per Figure 3 of the Open Space Element, therefore, it does not appear to have a substantial effect in local or regional plan, policies, and regulations regarding sensitive natural communities or by the Departments of Fish and Wildlife. Less than significant impacts are expected.

- c) Have a substantial adverse effect on state or federally protected wetlands (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means? ☐ ☐ ☒ ☐

**c)** The project is not located within a riparian habitat, therefore it is not expected to cause a substantial adverse effect on federal protected wetlands (including but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means. Less than significant impacts are anticipated.

- d) Interfere substantially with the movement of any resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites? ☐ ☐ ☒ ☐

**d)** The proposed project site has an existing agricultural use and it is approximately +/- 56 acres. Additionally, it is not located within a Sensitive Habitat; therefore it is not expected that it would interfere substantially with the movement of any residential or migratory fish or wildlife species or with established resident or migratory wildlife, corridors or impede the use of native wildlife nursery sites. If there would be any impact, it is expected to be less than significant.

- e) Conflict with any local policies or ordinance protecting biological resource, such as a tree preservation policy or ordinance? ☐ ☐ ☒ ☐

**e)** The proposed project is not expected to conflict with any local policy or ordinances protecting biological resources, such as a tree preservation policy or ordinance. Therefore, any impact is

considered less than significant.

- f) Conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan? ☐ ☐ ☒ ☐

**f)** The proposed project is not within a designated sensitive area according to the Imperial County General Plan's Conservation and Open Space Element, therefore, it would not conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan. Impacts are expected to be less than significant.

V. **CULTURAL RESOURCES** *Would the project:*

- a) Cause a substantial adverse change in the significance of a historical resource pursuant to §15064.5? ☐ ☐ ☒ ☐

**a)** According to the Imperial County General Plan's Conservation and Open Space Element, Figure 5 "Areas of Heightened Historic Period Sensitivity, the project site may be located within a Historic Period Railroad Town. Figure 6 "Known Areas of Native American Cultural Sensitivity" does not locate the project within a designated area of possible impact. The project also received on March 7, 2022 an email from the Quechan Historic Preservation Officer stating that they had no comments on this project. The site is already disturbed with an existing agricultural operations with no known historical resources. Therefore, impacts are expected to be less than significant.

- b) Cause a substantial adverse change in the significance of an archaeological resource pursuant to §15064.5? ☐ ☐ ☒ ☐

**b)** The proposed project is located on disturbed land with existing agricultural use and it is not likely to cause a substantial change to an archeological resource. Less than significant impacts are expected.

- c) Disturb any human remains, including those interred outside of dedicated cemeteries? ☐ ☐ ☒ ☐

**c)** As mentioned under Item b) above, the proposed project site is located on disturbed land with an existing agricultural use and no cemeteries are located adjacent to the project site; therefore, it is not expected to result in the disturbance of any human remains, including those interred outside of dedicated cemeteries. Less than significant impacts are expected.

VI. **ENERGY** *Would the project:*

- a) Result in potentially significant environmental impact due to wasteful, inefficient, or unnecessary consumption of energy resources, during project construction or operation? ☐ ☐ ☒ ☐

**a)** The proposed project is for a minor subdivision from an existing agricultural use parcel. If approved, the subdivision is not expected to result in potentially significant environmental impact due to wasteful, inefficient or unnecessary consumption of energy resources, during construction or operation. New habitable construction, should it occur in the future as a result of the subdivision, said construction and site improvements would require compliance with the latest edition of the California Building Code and administrative permit with Imperial County Planning and Development Services Department. Impacts are expected to be less than significant.

- b) Conflict with or obstruct a state or local plan for renewable energy or energy efficiency? ☐ ☐ ☒ ☐

**b)** As previously mentioned under item a), the proposed project is for a minor subdivision, future new development would be reviewed through an administrative permit to ensure compliance with energy efficiency and renewable energy regulations at the time of construction. Therefore, the

proposed project will not conflict with or obstruct a state or local plan for renewable energy of energy efficiency. Less than significant impacts are expected.

VII. **GEOLOGY AND SOILS** *Would the project:*

- a) Directly or indirectly cause potential substantial adverse effects, including risk of loss, injury, or death involving: ☐ ☐ ☒ ☐  
**a)** The proposed project does not appear to conflict with the geology and soils on site as future development on the parcels will be subject to compliance with the California Building Code and will go thru an administrative building permit review, therefore, it is not expected that the proposed subdivision would directly or indirectly cause potential substantial adverse effects, including risk of loss, injury, or death. Impacts are considered less than significant.
- 1) Rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault? Refer to Division of Mines and Geology Special Publication 42? ☐ ☐ ☒ ☐  
**1)** The most recent Alquist-Priolo Earthquake Fault Zoning Maps<sup>4</sup> does not identify the site within any Earthquake Fault Zones as created by the Alquist-Priolo Earthquake Fault Zoning Act; the Calexico Seismic Zone is located approximately 6 miles Northeast of the proposed project. Therefore, impacts are expected to be less than significant.
- 2) Strong Seismic ground shaking? ☐ ☐ ☒ ☐  
**2)** As discussed above, under item 1) the Calexico Seismic Zone is located 6 miles Northeast of the proposed project, and therefore, ground shaking is expected in the event of seismic activity in the region. However, the Imperial Valley is located in an active seismic area and seismic ground shaking is expected in similitude to the adjacent parcels. As previously mentioned, future development on the parcels will be subject to compliance with the California Building Code and will go thru an administrative permit review; therefore, impacts are expected to be less than significant.
- 3) Seismic-related ground failure, including liquefaction and seiche/tsunami? ☐ ☐ ☒ ☐  
**3)** The project site is not located in a Tsunami inundation area according to the California Official Tsunami Inundation Maps<sup>5</sup>. Impacts are expected to be less than significant.
- 4) Landslides? ☐ ☐ ☐ ☒  
**4)** The proposed project is not located within a Landslide Activity area according to the Imperial County Seismic and Public Safety Element, Figure 2 (Landslide Activity). The topography within the project site appears to be generally flat, and therefore will not be directly or indirectly affected by a landslide. No impacts are expected.
- b) Result in substantial soil erosion or the loss of topsoil? ☐ ☐ ☒ ☐  
**b)** The proposed project is not located within an area of substantial soil erosion according to Imperial County Seismic and Public Safety Element, Figure 3 (Erosion Activity). Any impact is expected to be less than significant.
- c) Be located on a geologic unit or soil that is unstable or that would become unstable as a result of the project, and potentially result in on- or off-site landslides, lateral spreading, subsidence, liquefaction or collapse? ☐ ☐ ☒ ☐  
**c)** The proposed project site is not located on a geological unit that would become unstable or collapse as a result of the proposed minor subdivision project; compliance with California Building

<sup>4</sup> Alquist-Priolo Earthquake Fault Zoning Maps- <https://maps.conservation.ca.gov/cgs/EQZApp/app/>

<sup>5</sup> California Official Tsunami Inundation Maps- <https://www.conservation.ca.gov/cgs/tsunami/maps>

Code (CBC) for any future construction would make any impact less than significant.

- d) Be located on expansive soil, as defined in the latest Uniform Building Code, creating substantial direct or indirect risk to life or property? ☐ ☐ ☒ ☐

**d)** The proposed project is for a minor subdivision to create three parcels within the existing commercial zone and one parcel would remain within the existing Light Industrial zone, however the future development of the structures would require an administrative permit to comply with the California Building Code latest edition, which establishes a minimum standard intended to protect life safety. Therefore, impacts are expected to be less than significant.

- e) Have soils incapable of adequately supporting the use of septic tanks or alternative wastewater disposal systems where sewers are not available for the disposal of waste water? ☐ ☐ ☐ ☒

**e)** The proposed project anticipates water and sewer system connection to Heber Public Utility District. No septic tanks or other alternative wastewater disposal systems are being proposed; therefore, no impacts are expected.

- f) Directly or indirectly destroy a unique paleontological resource or site or unique geologic feature? ☐ ☐ ☒ ☐

**f)** The project site has an existing agricultural land use, and the proposed subdivision does not seem to directly or indirectly destroy a unique paleontological resource or site or unique geologic feature as there are no known unique paleontological resource or unique geologic feature on site. Less than significant impacts are expected.

VIII. **GREENHOUSE GAS EMISSION** *Would the project:*

- a) Generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment? ☐ ☐ ☒ ☐

**a)** The approval of the proposed project is to subdivide the existing parcel into four individual parcels for future commercial development on three of the four parcels. The action is not expected to generate greenhouse gas emissions that would either directly or indirectly may have a significant impact on the environment. Per Imperial County Air Pollution Control District letter dated March 17, 2022, all future development on the three parcels must adhere to Air District Rules and Regulations. Impacts of the project would be less than significant provided applicant complies with APCD.

- b) Conflict with an applicable plan or policy or regulation adopted for the purpose of reducing the emissions of greenhouse gases? ☐ ☐ ☒ ☐

**b)** The proposed project is for a minor subdivision and would not conflict the regulations under AB 32 of reducing the emissions of greenhouse gases emission to 1990 levels by 2020 provided the applicant adheres to APCD regulations. Impacts are expected to be less than significant.

IX. **HAZARDS AND HAZARDOUS MATERIALS** *Would the project:*

- a) Create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials? ☐ ☐ ☐ ☒

**a)** The proposed project is not expected to create a significant hazard to the public or the environment since it does not include any handling of hazardous materials. No impacts are expected.

- b) Create a significant hazard to the public or the environment through reasonable foreseeable upset and accident conditions involving the release of hazardous materials into the environment? ☐ ☐ ☒ ☐

**b)** The proposed project is not expected to create a significant hazard to the public or the environment through reasonable foreseeable upset and accident conditions involving the release of hazardous materials into the environment as no hazardous materials are anticipated in the proposed project. Any impact is expected to be less than significant.

- c) Emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school? ☐ ☐ ☒ ☐

**c)** The nearest school is located at Heber Elementary School District which is 0.20 miles West approximately of the proposed project; the minor subdivision does not anticipate to emit or handle hazardous materials, thus, the project would not represent a risk to school facilities; impacts are considered less than significant.

- d) Be located on a site, which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment? ☐ ☐ ☐ ☒

**d)** The proposed project site is not located on a site included on a list of hazardous material sites<sup>6</sup>; therefore, no impacts are expected.

- e) For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project result in a safety hazard or excessive noise for people residing or working in the project area? ☐ ☐ ☐ ☒

**e)** The proposed project is not located within an airport land use plan, the closest airport is the Calexico Airport located approximately 3.8 miles South of the proposed project, and therefore, it would not result in a safety hazard for people residing or working in the project area; therefore, no impact expected.

- f) Impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan? ☐ ☐ ☒ ☐

**f)** The proposed project is not expected to interfere with an adopted emergency response plan or emergency evacuation plan; therefore, less than significant impacts are expected.

- g) Expose people or structures, either directly or indirectly, to a significant risk of loss, injury or death involving wildland fires? ☐ ☐ ☒ ☐

**g)** The proposed project site is located within an unincorporated Local Responsibility Area classified as LRA Unzoned per Cal Fire Draft Fire Hazard Severity Zones in LRA for Imperial County. Any new development may be subject to the inclusion of fire sprinklers and have either a private water source for firefighting or public source such as pressurize hydrants. Compliance with ICPFD would lessen impacts to less than significant levels.

X. **HYDROLOGY AND WATER QUALITY** *Would the project:*

- a) Violate any water quality standards or waste discharge ☐ ☐ ☒ ☐

<sup>6</sup> EnviroStor Database <http://www.envirostor.dtsc.ca.gov/public/>

requirements or otherwise substantially degrade surface or ground water quality?

a) The applicant will be within the water purveyor distributor of Heber Public Utility District (HPUD) and will be referred to follow all State and County standards for construction management of water runoff, i.e., SWPPP. Future development shall comply with Environmental Health Department standards for compliance with federal and state Safe Drinking Water Acts and any additional requirements that may be imposed by Imperial County Planning and Development Services Department and/ or the County Public Health Department. Impacts are expected to be less than significant.

- b) Substantially decrease groundwater supplies or interfere substantially with groundwater recharge such that the project may impede sustainable groundwater management of the basin?

☐ ☐ ☒ ☐

b) The proposed project does not anticipate the use of ground water and is not expected to substantially decrease groundwater supplies or interfere substantially with groundwater recharge such that the project may impede sustainable groundwater management of the basin. Any impacts are expected to be less than significant.

- c) Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river or through the addition of impervious surfaces, in a manner which would:

☐ ☐ ☒ ☐

c) Per Imperial County Public Works, there shall be filed with each tentative map a grading plan showing any and all grading proposed or required for the creation of building sites within the subdivision or for construction or installation of improvements to serve the subdivision. This grading plan shall clearly show all on-site grading and shall show how off-site drainage resulting from the subdivision is managed or controlled to prevent adverse impacts. (Per Imperial County Code of Ordinances, Chapter 3 9083 .04 Grading plan). Grading plans shall be submitted for review and approval by Department of Public Works prior to recordation of the parcel map. It is expected that compliance with Public Works would bring any impact to less than significant levels.

- (i) result in substantial erosion or siltation on- or off-site;

☐ ☐ ☒ ☐

(i) According to Figure 9 (Erosion Activity) of the Conservation and Open Space Element of the Imperial County General Plan, the area is on a designation of a low activity. Additionally, the grading plan required prior the Parcel Map recordation as per item c) above would ensure that substantial erosion or siltation would occur; therefore, impacts are expected to be less than significant.

- (ii) substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or offsite;

☐ ☐ ☒ ☐

(ii) Per Imperial County Public Works developer shall furnish a Drainage and Grading Plan to provide for property grading and drainage control, which shall also include prevention of sedimentation of damage to off-site properties. Said plan shall be completed per the County of Imperial Department of Public Works Engineering Design Guidelines Manual for the Preparation and Checking of Street Improvement, Drainage, and Grading Plans within Imperial County. According to Public Works, the developer shall implement the approved plan. Employment of the appropriate Best Management Practices (BMP's) shall be included. Grading plans shall be submitted for review and approval by Department of Public Works prior to recordation of the parcel map. Therefore, it is not expected that the proposed project would substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or offsite. Impacts are considered less than significant.

- (iii) create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff; or;

☐ ☐ ☒ ☐

(iii) As stated above under item c), Imperial County Public Works will require a grading plan prior the recordation of the Parcel Map which shall clearly show all on-site grading and shall show how off-site drainage resulting from the subdivision is managed or controlled to prevent adverse impacts. Additionally, a will serve letter for water and drainage services will be required from Heber Public Utility District. It is expected that such compliance would ensure that runoff water impacts be reduced to less than significant levels.

(iv) impede or redirect flood flows?

☐ ☐ ☐ ☒

(iv) The project site is located within Zone X per Federal Emergency Management Agency's (FEMA)<sup>7</sup> Flood Insurance Rate Map Panel 06025C2075C (FIRM effective September 28, 2008). Therefore, no impact is anticipated.

d) In flood hazard, tsunami, or seiche zones, risk release of pollutants due to project inundation?

☐ ☐ ☐ ☒

d) The proposed project topography is generally flat and it is not within a flood hazard, tsunami or seiche zone, therefore, no impacts are expected.

e) Conflict with or obstruct implementation of a water quality control plan or sustainable groundwater management plan?

☐ ☐ ☒ ☐

e) As stated above under item c (ii), the proposed project would require a grading plan approved by Imperial County Public Works prior the recordation of the parcel map, therefore, it is not expected that the minor subdivision would conflict with or obstruct implementation of a water quality control plan or sustainable groundwater management plan. Any impacts are considered less than significant.

#### XI. **LAND USE AND PLANNING** *Would the project:*

a) Physically divide an established community?

☐ ☐ ☐ ☒

a) The proposed project is located within the Townsite of Heber, the minor subdivision would create four parcels, each proposed parcel is not anticipated to change the existing land use designation and zoning, therefore, it is not expected that it would physically divide an established community, thus, no impact is expected.

b) Cause a significant environmental impact due to a conflict with any land use plan, policy, or regulation adopted for the purpose of avoiding or mitigating an environmental effect?

☐ ☐ ☐ ☒

b) The proposed project could be considered consistent with the Imperial County General Plan since no change is being proposed to the existing land use designation or zoning. The project is also consistent with Section 90303.02 Length to width ratio and Section 90303.01 Lot Size as the minimum parcel size for C-2 Zone of 20,000 square feet, and the minimum parcel size of M-1 Zone of 10,000 square feet. Therefore, no impacts are expected.

#### XII. **MINERAL RESOURCES** *Would the project:*

a) Result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the state?

☐ ☐ ☐ ☒

a) The proposed project does not anticipate the removal of mineral resources and it is not located within the boundaries of an active mine per Imperial County General Plan's Conservation and Open Space Element, Figure 8 "Existing Mineral Resources". No impacts are expected.

b) Result in the loss of availability of a locally-important mineral

☐ ☐ ☐ ☒

<sup>7</sup> FEMA- <https://www.fema.gov/flood-maps/national-flood-hazard-layer>

resource recovery site delineated on a local general plan, specific plan or other land use plan?

**b)** The proposed project will not result in the loss of availability of a locally-important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan. No impacts are expected.

**XIII. NOISE** *Would the project result in:*

- a) Generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?

☐ ☐ ☒ ☐

**a)** The proposed project would generate temporary noise during construction development and permanent commercial and industrial related noise once the buildings became operational, however, it is not expected to expose persons to or generate noise levels in excess of standards. The project is subject to the Imperial County General Plan's Noise Element which states that construction equipment operation shall be limited to the hours of 7 a.m. to 7p.m., Monday through Friday, and 9 a.m. to 5 p.m. Saturday; additionally, construction noise, from a single piece of equipment or a combination of equipment, shall not exceed 75 dB Leq, when averaged over an eight (8) hour period. No change to the existing commercial and industrial zoning and land use designation is anticipated, therefore, it is expected that compliance with the Noise Element would bring any impact to less than significant levels.

- b) Generation of excessive groundborne vibration or groundborne noise levels?

☐ ☐ ☒ ☐

**b)** Temporary groundborne vibration or groundborne noise levels are expected during construction however they will be subject to Imperial County General Plan's Noise Element and it is not expected to be excessive, such compliance expects to bring any impacts to less than significant levels.

- c) For a project located within the vicinity of a private airstrip or an airport land use plan or where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels?

☐ ☐ ☐ ☒

**c)** The proposed project site is not within the vicinity of a private airstrip; therefore, no impacts are expected.

**XIV. POPULATION AND HOUSING** *Would the project:*

- a) Induce substantial unplanned population growth in an area, either directly (for example, by proposing new homes and business) or indirectly (for example, through extension of roads or other infrastructure)?

☐ ☐ ☒ ☐

**a)** The proposed project would create four parcels which would be consistent with the existing zoning and land use designation which is commercial for the northern three parcels and industrial for the fourth southern parcel. If developed, the new buildings may generate new businesses, however it is not expected that such development would Induce substantial unplanned population growth since the zoning and land use would remain as it is currently designated. Therefore, it is not expected that it would induce substantial unplanned population growth in the area either directly or indirectly. Impacts are expected to be less than significant.

- b) Displace substantial numbers of existing people or housing, necessitating the construction of replacement housing elsewhere?

☐ ☐ ☐ ☒

**b)** The proposed project will not displace substantial numbers of people necessitating the construction or replacement housing elsewhere as it has an existing non-conforming agricultural use with no residents. Therefore, no impact is expected.

XV. **PUBLIC SERVICES**

- a) Would the project result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services:

☐ ☐ ☒ ☐

**a)** The proposed project would create three parcels within an existing commercial zoned designation and a fourth parcel within an existing industrial zoned designation. It is not anticipated that the project would result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios. Any impact would be less than significant.

- 1) Fire Protection?

☐ ☐ ☒ ☐

**1)** The proposed project is not expected to result in substantial impacts on fire protection. Any future construction may be subject to fire sprinklers and have either a private source for firefighting or public source such as pressurize hydrants. Compliance with ICFD would lessen impacts to less than significant levels.

- 2) Police Protection?

☐ ☐ ☒ ☐

**2)** The proposed project is not expected to result in substantial impacts on police protection; any impacts would be less than significant.

- 3) Schools?

☐ ☐ ☒ ☐

**3)** The proposed project is not expected to have a substantial impact on schools as the project would generate four non-residential use parcels, therefore, it would not generate any school-aged children requiring public education. It is not expected that new schools would be required as a result of the proposed project. Any impact is expected to be less than significant.

- 4) Parks?

☐ ☐ ☒ ☐

**4)** The proposed project is not expected to have a substantial impact on schools as the project would generate four parcels. Any impact is expected to be less than significant.

- 5) Other Public Facilities?

☐ ☐ ☒ ☐

**5)** Per IID's comment letter dated on March 16, 2022, after reviewing of the project, the agency has the following comments:

1. IID water facilities that may be impacted include the Daffodil Lateral 2 located along the proposed parcel #4's southern boundary. Proposed parcels #1, #2, and #3 do not have IID water facilities.

2. Should parcel #4 remain for agricultural use and retain its current zoning of M-1 Industrial Use, the applicant should be advised to establish a point of water delivery and drainage discharge for each parcel. For additional information on water service the applicant should call the IID's South End Division Office at (760) 482-9800.

3. Should future development of proposed parcel #4 be for considered for industrial use and require site access from Fawcett Road, an IID crossing, and encroachment permit will be required. When new crossings or modification to the existing crossings are needed, the applicant will be responsible for the cost of these improvements and IID will design and construct them.

4. Fences should be installed at the boundary of IID's right of way for safety purposes and to allow access for IID operation and maintenance activities. The project's fencing plan should address IID's right of way.

5. The applicant may not use IID's canal or drain banks to access the project site. Any abandonment of easements or facilities will be approved by IID based on systems (Irrigation, Drainage, Power, etc.) needs.

6. Currently an IID Service Planner, Joel Lopez, has been in contact with the applicant for a Dollar General store in one of the resulting lots. To serve this project, existing distribution overhead lines will need to be extended and then transitioned to underground. Furthermore, IID's existing 92kV "P" transmission line may be affected due to the proposed development. Consequently, the upgrades and impacts to this electrical infrastructure should be addressed in the environmental analysis for the future development of these parcels.

7. Any construction or operation on IID property or within its existing and proposed right of way or easements including but not limited to: surface improvements such as proposed new streets, driveways, parking lots, landscape; and all water, sewer, storm water, or any other above ground or underground utilities; will require an encroachment permit, or encroachment agreement (depending on the circumstances). A copy of the IID encroachment permit application and instructions for its completion are available at the website <https://www.iid.com/about-iid/department-directory/real-estate>. The district Real Estate Section should be contacted at (760) 339-9239 for additional information regarding encroachment permits or agreements. No foundations or buildings will be allowed within IID's right of way.

8. In addition to IID's recorded easements, IID claims, at a minimum, a prescriptive right of way to the toe of slope of all existing canals and drains. Where space is limited and depending upon the specifics of adjacent modifications, the IID may claim additional secondary easements/prescriptive rights of ways to ensure operation and maintenance of IID's facilities can be maintained and are not impacted and if impacted mitigated. Thus, IID should be consulted prior to the installation of any facilities adjacent to IID's facilities. Certain conditions may be placed on adjacent facilities to mitigate or avoid impacts to IID's facilities.

9. Any new, relocated, modified or reconstructed IID facilities required for and by the project (which can include but is not limited to electrical utility substations, electrical transmission and distribution lines, water deliveries, canals, drains, etc.) need to be included as part of the project's CEQA and/or NEPA documentation, environmental impact analysis and mitigation. Failure to do so will result in postponement of any construction and/or modification of IID facilities until such time as the environmental documentation is amended and environmental impacts are fully analyzed. Any and all mitigation necessary as a result of the construction, relocation and/or upgrade of IID facilities is the responsibility of the project proponent.

Compliance with IID requirements is expected to bring impacts to less than significant levels.

## XVI. RECREATION

- a) Would the project increase the use of the existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated?

☐ ☐ ☒ ☐

a) The proposed project may increase the use of existing and regional parks as per applicant the subdivision would generate four new parcels; however, it is not expected that the increase to the use of the existing neighborhood and regional parks or other recreational facilities would generate substantial physical deterioration of the recreational facilities. Any impact would be less than significant.

- b) Does the project include recreational facilities or require the construction or expansion of recreational facilities which might have an adverse effect on the environment?

☐ ☐ ☒ ☐

**b)** The proposed project does not include or require the construction or expansion of recreational facilities as it would only generate four parcels. Therefore, less than significant impacts are expected.

**XVII. TRANSPORTATION**      *Would the project:*

- a) Conflict with a program plan, ordinance or policy addressing the circulation system, including transit, roadway, bicycle and pedestrian facilities? ☐ ☐ ☒ ☐

**a)** The proposed project is not expected to create a substantial impact to surrounding roads and does not conflict with the Imperial County General Plan's Circulation and Scenic Highways Element; however any new impacts would appear to be less than significant.

- b) Would the project conflict or be inconsistent with the CEQA Guidelines section 15064.3, subdivision (b)? ☐ ☐ ☒ ☐

**b)** The proposed project will not conflict or be inconsistent with the CEQA Guidelines section 15064.3, subdivision (b) since it is not expected to have a significant transportation impact within transit priority areas. However, the proposed project site it is not located within one-half mile of either an existing major transit stop or a stop along an existing high quality transit corridor. The project would generate four new parcels that would trigger the subsequent development of four new residences. Less than significant impacts are expected.

- c) Substantially increases hazards due to a geometric design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment)? ☐ ☐ ☒ ☐

**c)** The proposed project use is compatible with the land use; the site design is not expected to increase hazards. The future development of buildings would require a Ministerial Permit to be reviewed by Imperial County Planning Department, Imperial County Public Works Department and Caltrans. Development would also require an Encroachment Permit for any work within the Caltrans' R/W prior to construction per Caltrans' comment letter dated March 29, 2022. It is expected that impacts to less than significant levels.

- d) Result in inadequate emergency access? ☐ ☐ ☒ ☐

**d)** Access are off Main Street (SR-86), Mary Ave and Clifford Road. It is not expected that it would result in inadequate emergency access. Impacts are considered less than significant.

**XVIII. TRIBAL CULTURAL RESOURCES**

- a) Would the project cause a substantial adverse change in the significance of a tribal cultural resource, defined in Public Resources Code Section 21074 as either a site, feature, place, cultural landscape that is geographically defined in terms of the size and scope of the landscape, sacred place or object with cultural value to a California Native American tribe, and that is: ☐ ☐ ☒ ☐

**a)** The project site has an existing agricultural use and the proposed project would create four parcels, there is no substantial evidence that the proposed project would cause a substantial adverse change in the significance of a tribal cultural resource, defined in Public Resources Code Section 21074. The County has consulted with appropriate tribes with the potential for interest in the area, a notification via email was received on March 7, 2022 from the Quechan Historic Preservation Officer stating that they do not wish to comment on this project at this time; therefore, less than significant impacts are expected.

- (i) Listed or eligible for listing in the California Register of Historical Resources, or in a local register of ☐ ☐ ☒ ☐

historical resources as define in Public Resources Code Section 5020.1(k), or

(i) The proposed project is not listed or is not likely that it would be eligible for listing in the California Register of Historical Resources within Imperial County<sup>8</sup>, or in a local register of historical resources as define in Public Resources Code Section 5020.1(k) since as stated above under item a), there is no known evidence of cultural resources on site. Less than significant impacts are expected.

(ii) A resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision (c) of Public Resources Code Section 5024.1. In applying the criteria set forth is subdivision (c) of Public Resource Code Section 5024.1, the lead agency shall consider the significance of the resource to a California Native American Tribe.

☐ ☐ ☒ ☐

(ii) No significant resources as defined in the Public Resources Code Section 5024.1 are expected to be impacted by the proposed project as it appears to be no history or association in the past with evidence of historical resources for the project site. Therefore, any impact is considered to be less than significant.

**XIX. UTILITIES AND SERVICE SYSTEMS** *Would the project:*

a) Require or result in the relocation or construction of new or expanded water, wastewater treatment or stormwater drainage, electric power, natural gas, or telecommunications facilities, the construction of which could cause significant environmental effects?

☐ ☐ ☒ ☐

**a)** The project proposes to divide a +/- 56.67 acre parcel into four individual parcels and would connect to Heber Public Utility District (HPUD) service area for future development. The project will require a will serve letter from HPUD prior approval, therefore, it is not expected to require or result in the relocation or construction of new or expanded water, wastewater treatment or stormwater drainage, natural gas, or telecommunications facilities.

Per IID comment letter dated March 16, 2022 to serve the subsequent development of the Dollar General store, existing distribution overhead lines will need to be extended and then transitioned to underground. Furthermore, IID's existing 92kV "P" transmission line may be affected due to the proposed development. Additionally, any construction or operation on IID property or within its existing and proposed right of way or easements including but not limited to: surface improvements such as proposed new streets, driveways, parking lots, landscape; and all water, sewer, storm water, or any other above ground or underground utilities; will require an encroachment permit, or encroachment agreement (depending on the circumstances). It is expected that compliance with IID requirements would bring impacts to less than significant levels.

b) Have sufficient water supplies available to serve the project from existing and reasonably foreseeable future development during normal, dry and multiple dry years?

☐ ☐ ☒ ☐

**b)** The proposed project is located within Heber Public Utility District service area and would connect to their services, therefore, a will serve letter will be required prior approval of the Minor Subdivision. Therefore, impacts are expected to be less than significant provided applicant provides a will serve letter from HPUD.

c) Result in a determination by the wastewater treatment

☐ ☐ ☒ ☐

<sup>8</sup> California Register of Historical Resources - <https://ohp.parks.ca.gov/ListedResources/?view=county&criteria=13>

provider which serves or may serve the project that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments?

**c) The proposed project is located within Heber Public Utility District service area including sewer services and would connect to their services, therefore, a will serve letter will be required prior approval of the Minor Subdivision to ensure adequate capacity to serve the project's demand. Therefore, impacts are expected to be less than significant provided applicant provides a will serve letter from HPUD.**

- d) Generate solid waste in excess of State or local standards, or in excess of the capacity of local infrastructure, or otherwise impair the attainment of solid waste reduction goals? ☐ ☐ ☒ ☐

**d) The proposed project would create four parcels, the subsequent development is not expected to generate solid waste in excess of State or local standards, or in excess of the capacity of local infrastructure, or otherwise impair the attainment of solid waste reduction goals. Applicant shall contact the company that serves the townsite of Heber to assure capacity. Impacts are expected to be less than significant.**

- e) Comply with federal, state, and local management and reduction statutes and regulations related to solid waste? ☐ ☐ ☒ ☐

**e) The proposed project shall comply with federal, state and local statutes and regulations related to solid waste. Any future development would be subject to all statutes and regulations. Therefore, less than significant impacts are expected**

## XX. **WILDFIRE**

If located in or near state responsibility areas or lands classified as very high fire hazard severity zones, would the Project:

- a) Substantially impair an adopted emergency response plan or emergency evacuation plan? ☐ ☐ ☒ ☐

**a) The proposed project site is located in a Fire Hazard Severity Zone within an unincorporated Local Responsibility Area classified as LRA Unzone per Cal Fire Draft Fire Hazard Severity Zones in LRA for Imperial County<sup>9</sup>; therefore, it is not expected that the project would substantially impair an adopted emergency response plan or emergency evacuation plan. Impacts are expected to be less than significant.**

- b) Due to slope, prevailing winds, and other factors, exacerbate wildfire risks, and thereby expose project occupants to pollutant concentrations from a wildfire or the uncontrolled spread of a wildfire? ☐ ☐ ☒ ☐

**b) As previously stated under item a) above, the proposed project is classified as LRA Unzone and not within a VHFHSZ; therefore, less than significant impacts are expected related due to slope, prevailing winds, and other factors, exacerbate wildfire risks, and thereby expose project occupants to pollutant concentrations from a wildfire or the uncontrolled spread of a wildfire.**

- c) Require the installation or maintenance of associated infrastructure (such as roads, fuel breaks, emergency water sources, power lines or other utilities) that may exacerbate fire risk or that may result in temporary or ongoing impacts to the environment? ☐ ☐ ☒ ☐

**c) Any new construction is subject to the inclusion of fire sprinklers and have either a private water source for firefighting or public source such as pressurize hydrants. Compliance with ICFD would lessen impacts to less than significant levels.**

<sup>9</sup> Cal Fire Draft Fire Hazard Severity Zones Map in LRA for Imperial County

- d) Expose people or structures to significant risks, including downslope or downstream flooding or landslides, as a result of runoff, post-fire slope instability, or drainage changes?

☐☐☒☐

**d)** The proposed project site is generally flat and as stated above under item a) above, the proposed project is classified as LRA Unzone and not within a VHFHSZ; therefore, impacts related to expose people or structures to significant risks, including downslope or downstream flooding or landslides, as a result of runoff, post-fire slope instability, or drainage changes are considered less than significant.

## SECTION 3

### III. MANDATORY FINDINGS OF SIGNIFICANCE

The following are Mandatory Findings of Significance in accordance with Section 15065 of the CEQA Guidelines.

- 
- a) Does the project have the potential to substantially degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, substantially reduce the number or restrict the range of a rare or endangered plant or animal, eliminate tribal cultural resources or eliminate important examples of the major periods of California history or prehistory?
- ☐ ☐ ☐ ☐
- b) Does the project have impacts that are individually limited, but cumulatively considerable? ("Cumulatively considerable" means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects.)
- ☐ ☐ ☐ ☐
- c) Does the project have environmental effects, which will cause substantial adverse effects on human beings, either directly or indirectly?
- ☐ ☐ ☐ ☐

#### IV. PERSONS AND ORGANIZATIONS CONSULTED

This section identifies those persons who prepared or contributed to preparation of this document. This section is prepared in accordance with Section 15129 of the CEQA Guidelines.

##### A. COUNTY OF IMPERIAL

**VI. NEGATIVE DECLARATION – County of Imperial**

---

*The following Negative Declaration is being circulated for public review in accordance with the California Environmental Quality Act Section 21091 and 21092 of the Public Resources Code.*

---

**Project Name:** David P. Church Subdivision - Parcel Map #02496

**Project Applicant:** David P. Church  
15882 Wakefield Lane,  
San Diego, CA 92127

**Project Location:** The project is located at 1072 Mary Ave., Heber, CA 92249 APN: 054-210-078-000.

**Description of Project:** Applicant is proposing a minor subdivision to create three parcels of APN 054-210-078-000 for Commercial Development (Parcel 1-1.48 AC, 2-3.35 AC and 3-3.43 AC) within a C-2 (Medium Commercial) zone and an additional Parcel 4 -48.49 AC to remain in agricultural use zoned M-1 (Light Industrial).

## VII. FINDINGS

This is to advise that the County of Imperial, acting as the lead agency, has conducted an Initial Study to determine if the project may have a significant effect on the environment and is proposing this Negative Declaration based upon the following findings:

The Initial Study shows that there is no substantial evidence that the project may have a significant effect on the environment and a NEGATIVE DECLARATION will be prepared.

The Initial Study identifies potentially significant effects but:

- (1) Proposals made or agreed to by the applicant before this proposed Mitigated Negative Declaration was released for public review would avoid the effects or mitigate the effects to a point where clearly no significant effects would occur.
- (2) There is no substantial evidence before the agency that the project may have a significant effect on the environment.
- (3) Mitigation measures are required to ensure all potentially significant impacts are reduced to levels of insignificance.

A NEGATIVE DECLARATION will be prepared.

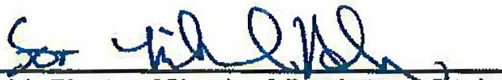

If adopted, the Negative Declaration means that an Environmental Impact Report will not be required. Reasons to support this finding are included in the attached Initial Study. The project file and all related documents are available for review at the County of Imperial, Planning & Development Services Department, 801 Main Street, El Centro, CA 92243 (442) 265-1736.

## NOTICE

The public is invited to comment on the proposed Negative Declaration during the review period.

8-25-2022

Date of Determination

Jim Minnick, Director of Planning & Development Services

The Applicant hereby acknowledges and accepts the results of the Environmental Evaluation Committee (EEC) and hereby agrees to implement all Mitigation Measures, if applicable, as outlined in the MMRP.

APN 054-210-078-000

**RECEIVED**

**AUG 24 2022**

**IMPERIAL COUNTY  
PLANNING & DEVELOPMENT SERVICES**

Dear Mr. Minnick:

This letter is in response to your submittal received on March 7, 2022 for the above-mentioned project. The applicant is proposing to create three parcels of APN 054-210-078-000 for Commercial Development C-2 (Parcels 1 – 1.48 AC; Parcel 2 – 3.35 AC and Parcel 3 – 3.43 AC) and parcel 4 – 48.19 AC to remain for agriculture Use and retain its current Zoning M-1.

Department staff has reviewed the package information and the following comments:

- Clifford Road is classified as Local County (Residential) - two (2) lanes, requiring sixty feet (60) of right of way, being thirty (30) feet from existing centerline. The imperial County has 80 feet for Road Right of Way only. It is required that a sufficient public use easement to be provided to meet the current road right of way easement.
- Fawcett Road is classified as Major Collector - Collector, four (4) lanes, requiring eighty four feet (84) of right of way, being forty two (42) feet from existing centerline. It is required that a sufficient public use easement to be provided to meet this road classification.
- Mary Ave is classified as Local County (Residential) - two (2) lanes, requiring sixty feet (60) of right of way, being thirty (30) feet from existing centerline. The County of Imperial currently has 40' of ROW total for Road Right of way only. It is required that a sufficient public use easement to be provided to meet this road classification.
- Mary Ave is not a thru street therefor a Cul-De-Sac for Mary Ave must be designed and implemented or proper Right of Way dedication shall be provided to connect Mary Ave to Fawcett Road.
- The parcel map shall be based upon a field survey. The parcel map shall show independent connections to a minimum of two Continuously Operating Reference Stations (CORS) of the California Real Time Network (CRTN). NAD 83 coordinates shall be established for every monument shown on the parcel map.

- All survey monuments shall be set prior to approval of the parcel map and the setting of monuments shall not be deferred. All property corners of each parcel created by the subdivision shall be sufficiently monumented, together with a full complement of corner accessories. The bearings and distances between corner accessories and corner monuments shall be documented by the surveyor of record.
- Any existing private improvements that are found to be within a County road right-of-way, including ditches, lift stations, fences, walls, etc., shall be removed from said County rights-of-way prior to approval of the parcel map at Subdivider's expense. The Subdivider may defer removal of said improvements if security is provided prior to recordation of the parcel map.
- Any existing private improvements that are found to be within the right-of-way for State Route 86, including ditches, drains, etc., shall be removed from said right-of-way prior to approval of the parcel map at Subdivider's expense. The Subdivider may defer removal of said improvements if security for said removal is provided by the Subdivider prior to approval of the parcel map.
- Any existing IID improvements found to be located within a County road right-of-way, including ditches, drains, etc., shall be removed from said County right-of-way, or undergrounded, prior to approval of the parcel map at Subdivider's expense. The Subdivider may defer removal or undergrounding of said IID improvements if security is provided by the Subdivider prior to approval of the parcel map.
- The Minor Subdivision application identifies proposed Parcel 4 as receiving ingress and egress from Fawcett Road. Site inspection reveals insufficient width for safe vehicular ingress and egress. Both the primary and secondary points of access for proposed Parcel 4 shall be widened to provide minimum openings of thirty (30) feet in width between irrigation structures at Subdivider's expense prior to recordation of the parcel map. The Subdivider may defer widening of the access openings if security is provided by the Subdivider prior to approval of the parcel map.
- The existing drainage retention basin that serves the agricultural need of the property prior to subdivision, and which fronts the South right-of-way of SR-86, shall be relocated outside the proposed commercial designated Parcels 1, 2 & 3, at Subdivider's expense, prior to issuance of a building permit for said Parcels 1, 2 or 3.
- The Subdivider shall install a continuous translucent fence (e.g. chain link, wrought iron, etc.) that is a minimum of 6 feet in height along the entire West property line of the subdivision, and along the North and South property lines of that portion of the subdivision lying Westerly of existing Mary Avenue to ensure that vehicles and pedestrians do not trespass onto adjoining railroad right-of-way.

- An easement in the form of a barrier strip one foot in width shall be created by the Subdivider along the Southerly line of proposed Parcels 1, 2 & 3, over which vehicular access across the common line with Parcel 4 is surrendered.
- There shall be filed with each tentative map a grading plan showing any and all grading proposed or required for the creation of building sites within the subdivision or for construction or installation of improvements to serve the subdivision. This grading plan shall clearly show all on-site grading and shall show how off-site drainage resulting from the subdivision is managed or controlled to prevent adverse impacts. (Per Imperial County Code of Ordinances, Division 8 – Subdivisions - Chapter 3 9083.04 Grading plan). Grading plan shall be approved by this Department prior to recordation of the Parcel Map.
- A Drainage and Grading Plan to provide for property grading and drainage control, which shall also include prevention of sedimentation of damage to off-site properties shall be required. Said plan shall be completed per the County of Imperial Department of Public Works Engineering Design Guidelines Manual for the Preparation and Checking of Street Improvement, Drainage, and Grading Plans within Imperial County. The Drainage and Grading Plan shall be submitted to this department for review and approval. Grading plan shall be approved by this Department prior to recordation of the Parcel Map
- Each parcel created or affected by this project shall abut a maintained road and/or have legal and physical access to a public road before the project documents are recorded.
- Street improvements shall be required Chapter 12.10 Street Improvements of Imperial County Ordinance:
- Section 12.10.010 - Definitions of Imperial County Ordinance
  - "Administrator" refers to the director of public works or his/her designee.
  - "Roads" and "streets" are used interchangeably throughout this chapter and therefore all references to "streets" in this chapter shall also refer to "roads."
  - "Street improvement" refers to such street work and utilities to be installed or agreed to be installed by a developer and/or property owner, on land to be used for public or private streets, highways, ways and easements as are necessary for the general use of the property owners and local neighborhood traffic and drainage needs as condition precedent to the approval and acceptance of the project. These improvements shall also include, but not be limited to streets, curbs, gutters, and sidewalks.
  - "Street improvement" also refers to such other specific improvements or type of improvements, the installation of which, either by the developer and/or property owner by public agencies, by private utilities, by any other entity approved by the local agency or by a combination thereof, is necessary or convenient to insure conformity to or implementation of the general plan of the county. These improvements shall include but not be limited to streets, curbs, gutters, and sidewalks.
- Section 12.10.020 - Street Improvement Requirements of Imperial County Ordinance:
  - A. Street improvements shall be required in conjunction with, but not limited to, any construction, grading, or related work, including the construction of structures,

buildings, or major additions thereto, on property located adjacent to any county street or on property utilizing any county street for ingress and egress.

B. For the purpose of establishing proper standards, specification and directions for design and construction of any road, or other land division improvements required to be constructed in the unincorporated territory of Imperial County, the document entitled "Engineering Design Guidelines Manual for the Preparation and checking of Street Improvement, Drainage, and Grading Plans within Imperial County".

- Street Improvements shall be required for Clifford Road, Fawcett Road, and Mary Avenue. Improvement Plan shall be submitted approved by this Department prior to recordation of the Parcel Map.
- All off-site improvements within Imperial County right-of-way shall be financially secured by either a road improvement bond or letter of credit prior to recordation of Parcel Map.
- Any activity and/or work within Imperial County Right-of-Way shall be completed under a permit issued by this Department (encroachment permit) as per Chapter 12.12 - Excavations on or Near a Public Road of the Imperial County Ordinance.
- Section 12.10.030 - Building Permits of Imperial County Ordinance:
  - A. No building permit for any structure or building or major addition to a building or structure shall be issued until the improvements required by Section 12.10.010 of this chapter have been installed. In addition, no building permit shall be issued until there has been compliance with Chapter 12.12 of this title and the requirement that an encroachment permit be obtained.
- Prior to the issuance of any grading and/or building permits, the Developer shall procure an encroachment permit from this department for any off-site improvements required for this project.
- Prior to the issuance grading and building permits, a stabilized construction entrance/exit required has part of Best Management Practices (BPM) during grading operations shall be installed under an encroachment permit from this Department.
- Corner record is required to be filed with the county surveyor prior to construction for monuments:
  - 8771. (b) When monuments exist that control the location of subdivisions, tracts, boundaries, roads, streets, or highways, or provide horizontal or vertical survey control, the monuments shall be located and referenced by or under the direction of a licensed land surveyor or licensed civil engineer legally authorized to practice land surveying, prior to the time when any streets, highways, other rights-of-way, or easements are improved, constructed, reconstructed, maintained, resurfaced, or relocated, and a corner record or record of survey of the references shall be filed with the county surveyor.
- A second corner record is required to be filed with the county surveyor for monuments:

8771. (c) A permanent monument shall be reset in the surface of the new construction or a witness monument or monuments set to perpetuate the location if any monument could be destroyed, damaged, covered, disturbed, or otherwise obliterated, and a corner record or record of survey shall be filed with the county surveyor prior to the recording of a certificate of completion for the project. Sufficient controlling monuments shall be retained or replaced in their original positions to enable property, right-of-way and easement lines, property corners, and subdivision and tract boundaries to be reestablished without devious surveys necessarily originating on monuments differing from those that currently control the area.

- Prior to issuance of final certificate of completion, Developer will be responsible for repair, replacement, restoration and/or costs of any/all damages caused by the activities completed under permits to other improvements, roads, road shoulders, pipes and utilities, on or off road right-of-way as determined by Imperial County Road Commissioner.
- Prior to issuance of final certificate of completion, Developer shall provide a grading improvement certificate letter prepared by a California Licensed Civil Engineer or Surveyor that all recommended drainage and grading improvements were completed per approved grading plans.
- Transportation Permit may be required from road agency(s) having jurisdiction over the haul route(s) for any hauls of heavy equipment and large vehicles which impose greater than legal loads on riding surfaces, including bridges. (Per Imperial County Code of Ordinances, Chapter 10.12 - Overweight Vehicles and Loads).
- All on-site traffic area shall be hard surfaced to provide all weather access for fire protection vehicles. The surfacing shall meet the Department of Public Works and Fire/OES Standards as well as those of the Air Pollution Control District (ACPD). (Per Imperial County Code of Ordinances, Chapter 12.10.020 – Street Improvement Requirements).
- All solid and hazardous waste shall be disposed of in approved solid waste disposal sites in accordance with existing County, State and Federal regulations. (Per Imperial County Code of Ordinances, Chapter 8.72 – Solid Waste Management).
- The project may require a Notice of Intent (NOI) from the Regional Water Quality Control Board (RWQCB) prior county approval of onsite grading plan. (40 CFR 122.28 – general Permits).
- Effective September 15, 2020, the State's Mandatory Organic Waste Recycling Law (AB 1826 or Chapter 727, Statutes of 2014) decreased the threshold requiring all businesses and multi-dwelling facilities of 5 units or more generating two (2) cubic yards or more of solid waste per week to recycle their organic waste including landscape waste, wood waste, and food waste. Information about possible organics waste recycling services can be found at the CalRecycle site.

Respectfully,

A handwritten signature in blue ink, appearing to read "John A. Gay".

AIR POLLUTION CONTROL DISTRICT

March 17, 2022

Mr. Jim Minnick  
Planning & Development Services Director  
801 Main St.  
El Centro, CA 92243

RECEIVED

MAR 17 2022

SUBJECT: Minor Subdivision – Parcel Map 02496 (Church)

Dear Mr. Minnick:

The Imperial County Air Pollution Control District ("Air District") thanks you for the opportunity to review the application for Minor Subdivision – Parcel Map (PM) 02496 located at 1072 Mary Road in Heber, California (also identified as Assessor Parcel Number 054-210-078-000). The applicant intends to subdivide the existing 56.47 acre parcel into four individual parcels for future commercial development on three of the four parcels.

Any future development on the three parcels to be rezoned commercial must adhere to Air District rules and regulations.

The Air District's rule book can be accessed via the internet at <https://apcd.imperialcounty.org/rules-and-regulations/>. Should you have questions, please call our office at (442) 265-1800.

Sincerely,

Curtis Blondell

March 16, 2022

RECEIVED

MAR 16 2022

Ms. Mariela Moran  
Planner III  
Planning & Development Services Department  
County of Imperial  
801 Main Street  
El Centro, CA 92243

SUBJECT: Church Subdivision; PM02496

Dear Ms. Moran:

On March 7, 2022, the Imperial Irrigation District received from the Imperial County Planning & Development Services Department, a request for agency comments on Parcel Map #02496. The applicant, Dubose Design Group, Inc./David Patrick Church, proposes the subdivision of a parcel located at 1072 Mary Ave. in Heber, CA (APN 054-210-078-000) to create three lots for commercial development with parcel #4 to remain for agricultural use.

The IID has reviewed the application and has the following comments:

1. IID water facilities that may be impacted include the Daffodil Lateral 2 located along the proposed parcel #4's southern boundary. Proposed parcels #1, #2, and #3 do not have IID water facilities.
2. Should parcel #4 remain for agricultural use and retain its current zoning of M-1 Industrial Use, the applicant should be advised to establish a point of water delivery and drainage discharge for each parcel. For additional information on water service the applicant should call the IID's South End Division Office at (760) 482-9800.
3. Should future development of proposed parcel #4 be for considered for industrial use and require site access from Fawcett Road, an IID crossing and encroachment permit will be required. When new crossings or modification to the existing crossings are needed, the applicant will be responsible for the cost of these improvements and IID will design and construct them.
4. Fences should be installed at the boundary of IID's right of way for safety purposes and to allow access for IID operation and maintenance activities. The Project's fencing plan should address IID's right of way.

5. The applicant may not use IID's canal or drain banks to access the project site. Any abandonment of easements or facilities will be approved by IID based on systems (Irrigation, Drainage, Power, etc.) needs.
6. Currently an IID Service Planner, Joel Lopez, has been in contact with the applicant for a Dollar General store in one of the resulting lots. To serve this project, existing distribution overhead lines will need to be extended and then transitioned to underground. Furthermore, IID's existing 92kV "P" transmission line may be affected due to the proposed development. Consequently, the upgrades and impacts to this electrical infrastructure should be addressed in the environmental analysis for the future development of these parcels as stipulated in comment no.
7. Any construction or operation on IID property or within its existing and proposed right of way or easements including but not limited to: surface improvements such as proposed new streets, driveways, parking lots, landscape; and all water, sewer, storm water, or any other above ground or underground utilities; will require an encroachment permit, or encroachment agreement (depending on the circumstances). A copy of the IID encroachment permit application and instructions for its completion are available at the website <https://www.iid.com/about-iid/departments-directory/real-estate>. The district Real Estate Section should be contacted at (760) 339-9239 for additional information regarding encroachment permits or agreements. No foundations or buildings will be allowed within IID's right of way.
8. In addition to IID's recorded easements, IID claims, at a minimum, a prescriptive right of way to the toe of slope of all existing canals and drains. Where space is limited and depending upon the specifics of adjacent modifications, the IID may claim additional secondary easements/prescriptive rights of ways to ensure operation and maintenance of IID's facilities can be maintained and are not impacted and if impacted mitigated. Thus, IID should be consulted prior to the installation of any facilities adjacent to IID's facilities. Certain conditions may be placed on adjacent facilities to mitigate or avoid impacts to IID's facilities.
9. Any new, relocated, modified or reconstructed IID facilities required for and by the project (which can include but is not limited to electrical utility substations, electrical transmission and distribution lines, water deliveries, canals, drains, etc.) need to be included as part of the project's CEQA and/or NEPA documentation, environmental impact analysis and mitigation. Failure to do so will result in postponement of any construction and/or modification of IID facilities until such time as the environmental documentation is amended and environmental impacts are fully analyzed. Any and all mitigation necessary as a result of the construction, relocation and/or upgrade of IID facilities is the responsibility of the project proponent.

Church Subdivision

Tentative Parcel Map/Request for Review and Comments

Ms. Mariela Moran  
Planner II  
Imperial County Planning & Development Services  
801 Main Street  
El Centro, CA 92243

Dear Ms. Moran:

Thank you for including the California Department of Transportation (Caltrans) in the review process for the Tentative Parcel Map and the Request for Review and Comments Package for the Church Subdivision Project located near State Route 86 (SR-86). The mission of Caltrans is to provide a safe and reliable transportation network that serves all people and respects the environment. The Local Development Review (LDR) Program reviews land use projects and plans to ensure consistency with our mission and state planning priorities.

Safety is one of Caltrans' strategic goals. Caltrans strives to make the year 2050 the first year without a single death or serious injury on California's roads. We are striving for more equitable outcomes for the transportation network's diverse users. To achieve these ambitious goals, we will pursue meaningful collaboration with our partners. We encourage the implementation of new technologies, innovations, and best practices that will enhance the safety on the transportation network. These pursuits are both ambitious and urgent, and their accomplishment involves a focused departure from the status quo as we continue to institutionalize safety in all our work.

Caltrans is committed to prioritizing projects that are equitable and provide meaningful benefits to historically underserved communities, to ultimately improve transportation accessibility and quality of life for people in the communities we serve.

We look forward to working with the County in areas where the County and Caltrans have joint jurisdiction to improve the transportation network and connections between

various modes of travel, with the goal of improving the experience of those who use the transportation system.

Caltrans has the following comments:

### **Conditions of Approval**

Caltrans requests that the County of Imperial condition the applicant to provide an easement for a new street along the proposed lot line between Mary Avenue and Clifford Road, to allow access to the proposed parcels (1-4). Please see the highlighted lot line on the attached Tentative Parcel Map.

### **Traffic Engineering and Analysis**

- In accordance with Senate Bill (SB) 743 and as of July 1, 2020, Caltrans requires all public agencies to evaluate impacts associated with future developments to use Vehicle Miles Traveled (VMT) to evaluate transportation impacts on the State Highway System (SHS). Please provide a Traffic Impact Study (TIS) using the Caltrans-Vehicles Miles Traveled- Focused-Transportation Impact Study Guide (May 20, 2020).
- In addition to a VMT analysis, a traffic impact study may also be required to review all safety and operations impacts along SR-86. Please include all intersections and segments along SR-86 between Dogwood Road and Pitzer Road.
- Any proposed intersection expansion or modification along SR-86 will require an Intersection Control Evaluation (ICE) report as required by the Caltrans Traffic Operations Policy Directive #13-02. Provide a comparison for each alternative in accordance with the ICE policy. Follow the report format in the ICE process information guide. Please see the link below for the "ICE process information guide" and other ICE related policies and guidance. <https://dot.ca.gov/programs/traffic-operations/ice>.
- Within the ICE report, the alternatives that get selected for the Step 2 process will need to evaluate the safety and operational analysis by submitting a traffic study with supporting data (electronic files), traffic warrants, and benefit cost ratio. In addition to traffic and operational analyses for existing conditions, each alternative will need to include the future 20-year traffic volumes and operational analyses. A preferred alternative should be identified within the ICE report.
- Provide Synchro files used to analyze traffic for the project.

## **Hydrology and Drainage Studies**

- Caltrans' Hydraulics Branch will not be able to provide comments until grading plans with drainage studies are provided, once zoning is approved and the development process begins.
- Please provide off site hydrology and hydraulics studies, proposed drainage and proposed grading plans for Caltrans to review.
  - Provide drainage plans and details. Provide existing and proposed drainage facilities.
  - Provide existing and proposed 2-foot contour grading with legible callouts.
  - Include detention basin details of inlets/outlet and proposed basin grading, include in detention basin calculations:
    - Plan schematic
    - Elevation vs storage tables
    - Elevation vs area tables
    - Elevation vs outlet flow (stage - outflow)
    - Inflow vs outflow
    - Elevation vs time (stage - time)
    - Volume vs time (storage - time)
- Provide a Drainage Study showing 100-year storm event calculations and 25- year storm event calculations.
- Provide on-site hydrology and hydraulic studies per the Highway Design Manual methodologies and per Caltrans policies and procedures.
  - Provide all available Caltrans drainage facility as-built and Right-of-Way (R/W) Maps.
  - Provide survey data of onsite system that the development will be draining to.
- On all plans, show Caltrans' R/W and SR-86 centerline.
- Early coordination with Caltrans is recommended.
- Caltrans generally does not allow development projects to impact hydraulics within the State's R/W. Any modification to the existing Caltrans drainage and/or increase in runoff to State facilities will not be allowed.

## **Complete Streets and Mobility Network**

Caltrans views all transportation improvements as opportunities to improve safety, access and mobility for all travelers in California and recognizes bicycle, pedestrian and transit modes as integral elements of the transportation network. Caltrans supports improved transit accommodation through the provision of Park and Ride facilities, improved bicycle and pedestrian access and safety improvements, signal prioritization for transit, bus on shoulders, ramp improvements, or other enhancements that promotes a complete and integrated transportation network. Early coordination

with Caltrans, in locations that may affect both Caltrans and the County of Imperial, is encouraged.

To reduce greenhouse gas emissions and achieve California's Climate Change target, Caltrans is implementing Complete Streets and Climate Change policies into State Highway Operations and Protection Program (SHOPP) projects to meet multi-modal mobility needs. Caltrans looks forward to working with the County to evaluate potential Complete Streets projects.

Bicycle, pedestrian, and public transit access during construction is important. Mitigation to maintain bicycle, pedestrian, and public transit access during construction is in accordance with Caltrans' goals and policies.

### **Land Use and Smart Growth**

Caltrans recognizes there is a strong link between transportation and land use. Development can have a significant impact on traffic and congestion on State transportation facilities. In particular, the pattern of land use can affect both local vehicle miles traveled and the number of trips. Caltrans supports collaboration with local agencies to work towards a safe, functional, interconnected, multi-modal transportation network integrated through applicable "smart growth" type land use planning and policies.

The County should continue to coordinate with Caltrans to implement necessary improvements at intersections and interchanges where the agencies have joint jurisdiction.

### **Noise**

The applicant must be informed that in accordance with 23 Code of Federal Regulations (CFR) 772, Caltrans is not responsible for existing or future traffic noise impacts associated with the existing configuration of SR-86.

### **Environmental**

Caltrans welcomes the opportunity to be a Responsible Agency under the California Environmental Quality Act (CEQA), as we have some discretionary authority of a portion of the project that is in Caltrans' R/W through the form of an encroachment permit process. We look forward to the coordination of our efforts to ensure that Caltrans can adopt the alternative and/or mitigation measure for our R/W.

An encroachment permit will be required for any work within the Caltrans' R/W prior to construction. As part of the encroachment permit process, the applicant must provide approved final environmental documents for this project, corresponding technical

studies, any necessary regulatory and resource agency permits, and specifically any CEQA determinations or exemptions. The supporting documents must address all environmental impacts within the Caltrans' R/W and address any impacts from avoidance and/or mitigation measures.

We recommend that this project specifically identifies and assesses potential impacts caused by the project or impacts from mitigation efforts that occur within Caltrans' R/W that includes impacts to the natural environment, infrastructure including but not limited to highways, roadways, structures, intelligent transportation systems elements, on-ramps and off-ramps, and appurtenant features including but not limited to lighting, signage, drainage, guardrail, slopes and landscaping. Caltrans is interested in any additional mitigation measures identified for the project's draft Environmental Document.

### **Broadband**

Caltrans recognizes that teleworking and remote learning lessen the impacts of traffic on our roadways and surrounding communities. This reduces the amount of VMT and decreases the amount of greenhouse gas (GHG) emissions and other pollutants. The availability of affordable and reliable, high speed broadband is a key component in supporting travel demand management and reaching the state's transportation and climate action goals.

### **Right-of-Way**

- Per Business and Profession Code 8771, perpetuation of survey monuments by a licensed land surveyor is required, if they are being destroyed by any construction.
- Any work performed within Caltrans' R/W will require discretionary review and approval by Caltrans and an encroachment permit will be required for any work within the Caltrans' R/W prior to construction.

Additional information regarding encroachment permits may be obtained by contacting the Caltrans Permits Office at (619) 688-6158 or emailing [D11.Permits@dot.ca.gov](mailto:D11.Permits@dot.ca.gov) or by visiting the website at <https://dot.ca.gov/programs/traffic-operations/ep>. Early coordination with Caltrans is strongly advised for all encroachment permits.

### **Right-of-Way Utilities**

The developer/applicant shall prepare and submit to Caltrans closure plans as part of the encroachment permit application. The plans shall require that closure or partial closure of SR-86 be limited to times as to create the least possible inconvenience to the traveling public and that signage be posted prior to the closure to alert drivers of the closure in accordance with Caltrans requirements. Traffic shall not be

Ms. Mariela Moran, Planner II  
March 29, 2022  
Page 6

unreasonably delayed. The plan shall also outline suggested detours to use during the closures, traffic, including routes and signage.

The Highway Closure Plan, as part of the encroachment permit, should be submitted to Caltrans at least 30 days prior to initiating installation of the crossings. No work shall begin in Caltrans' R/W until an encroachment permit is approved.

Any work performed within Caltrans' R/W will require discretionary review and approval by Caltrans and an encroachment permit will be required for any work within the Caltrans' R/W prior to construction. As part of the encroachment permit process, the applicant must provide an approved final environmental document including the CEQA determination addressing any environmental impacts with the Caltrans' R/W, and any corresponding technical studies.

Please see the following chapters in the Caltrans' manuals:

- Chapter 600 of the Encroachment Permits Manual for requirements regarding utilities and state R/W: <https://dot.ca.gov/-/media/dot-media/programs/traffic-operations/documents/encroachment-permits/chapter-6-ada-a11y.pdf>.
- Chapter 2-2.13 of the Plans Preparation Manual for requirements regarding utilities and state R/W: <https://dot.ca.gov/-/media/dot-media/programs/design/documents/cadd/ppm-text-ch2-sect2-13-a11y.pdf>
- Chapter 17 of the Project Development Procedures Manual <https://dot.ca.gov/-/media/dot-media/programs/design/documents/pdpm-chapter17-a11y.pdf>.

If you have any questions or concerns, please contact Charlie Lecourtois, LDR Coordinator, at (619) 985-4766 or by e-mail sent to [Charlie.Lecourtois@dot.ca.gov](mailto:Charlie.Lecourtois@dot.ca.gov).

**To:** Jim Minnick; Michael Abraham  
**Cc:** Eaton, Maurice A@DOT; Mariela Moran  
**Subject:** Follow up email regarding Caltrans' access control rights - Church Subdivision - Imperial County - Tentative Parcel Map/Request for Review and Comments - SR-86

**CAUTION:** This email originated outside our organization; please use caution.

Good Afternoon Jim and Michael,

I called your office on April 21, 2022, to discuss a few questions Caltrans Planning had on the Church Subdivision. During our conversation we spoke about the possibility of placing a condition on the applicant's subdivision map to restrict access onto State Route 86 (SR-86). It was mentioned that the County would not place our condition on the applicants subdivision map unless we provided some type of document that shows the formal restriction of access along this segment of SR-86 (PM 1.2 - 1.5).

I just wanted to inform you that I reached out to our Right-of-Way Engineering folks and they said Caltrans does not have access control rights along this segment of SR-86 (PM 1.2 - 1.5). However, to provide safe access and efficient operations to and from the site we would still like to request that the County place our condition of an easement for a street on the project.

Respectfully,

**Subject:** Caltrans Comment Letter - Church Subdivision - Imperial County - Tentative Parcel Map/Request for Review and Comments - SR-86

Good afternoon Ms. Moran,

Please see the attached Caltrans comment letter for the Church Subdivision Project, located near State Route 86 (SR-86), within Imperial County. Also attached is the highlighted lot line on the Heber Dollar General Tentative Parcel Map, in reference to the Condition of Approval (COA) section of our comment letter.

During a phone call with Michael Abraham and Jim Minnick on March 21, 2022, I informed Michael and Jim that Caltrans will provide documentation that shows the restriction of access from private property onto SR-86 along this stretch of the State Highway System, as verification/evidence for our COA request. Caltrans will provide an additional comment letter to the County once our internal functional units provide this documentation

Feel free to contact me if you have any questions.

Best regards,
