SECTION 1 INTRODUCTION

A. PURPOSE

This document is a ☐ policy-level, ☒ project level Initial Study for the evaluation of potential environmental impacts resulting with the proposed lot merger (Merger #00147) and the proposed construction of the new Seeley Fire Facility and Cooling Center (Initial Study #20-0018). For purposes of this document, the abovementioned project will be called the "proposed application". (Refer to Exhibit "A" & "B").

B. CALIFORNIA ENVIRONMENTAL QUALITY ACT (CEQA) REQUIREMENTS AND THE IMPERIAL COUNTY'S GUIDELINES FOR IMPLEMENTING CEQA

As defined by Section 15063 of the State California Environmental Quality Act (CEQA) Guidelines and Section 7 of the County's "CEQA Regulations Guidelines for the Implementation of CEQA, as amended", an **Initial Study** is prepared primarily to provide the Lead Agency with information to use as the basis for determining whether an Environmental Impact Report (EIR), Negative Declaration, or Mitigated Negative Declaration would be appropriate for providing the necessary environmental documentation and clearance for any proposed project.

☐ According to Section 15065, an **EIR** is deemed appropriate for a particular proposal if the following conditions occur:

- The proposal has the potential to substantially degrade quality of the environment.
- The proposal has the potential to achieve short-term environmental goals to the disadvantage of long-term environmental goals.
- The proposal has possible environmental effects that are individually limited but cumulatively considerable.
- The proposal could cause direct or indirect adverse effects on human beings.

☐ According to Section 15070(a), a **Negative Declaration** is deemed appropriate if the proposal would not result in any significant effect on the environment.

☐ According to Section 15070(b), a **Mitigated Negative Declaration** is deemed appropriate if it is determined that though a proposal could result in a significant effect, mitigation measures are available to reduce these significant effects to insignificant levels.

This Initial Study has determined that the proposed applications will not result in any potentially significant environmental impacts and therefore, a Negative Declaration is deemed as the appropriate document to provide necessary environmental evaluations and clearance as identified hereinafter.

This Initial Study and Negative Declaration are prepared in conformance with the California Environmental Quality Act of 1970, as amended (Public Resources Code, Section 21000 et. seq.); Section 15070 of the State & County of Imperial's Guidelines for Implementation of the California Environmental Quality Act of 1970, as amended (California Code of Regulations, Title 14, Chapter 3, Section 15000, et. seq.); applicable requirements of the County of Imperial; and the regulations, requirements, and procedures of any other responsible public agency or an agency with jurisdiction by law.

Pursuant to the County of Imperial Guidelines for Implementing CEQA, depending on the project scope, the County

of Imperial Board of Supervisors, Planning Commission and/or Planning Director is designated the Lead Agency, in accordance with Section 15050 of the CEQA Guidelines. The Lead Agency is the public agency which has the principal responsibility for approving the necessary environmental clearances and analyses for any project in the County.

C. INTENDED USES OF INITIAL STUDY AND NEGATIVE DECLARATION

This Initial Study and Negative Declaration are informational documents which are intended to inform County of Imperial decision makers, other responsible or interested agencies, and the general public of potential environmental effects of the proposed applications. The environmental review process has been established to enable public agencies to evaluate environmental consequences and to examine and implement methods of eliminating or reducing any potentially adverse impacts. While CEQA requires that consideration be given to avoiding environmental damage, the Lead Agency and other responsible public agencies must balance adverse environmental effects against other public objectives, including economic and social goals.

The Initial Study and Negative Declaration, prepared for the project will be circulated for a period of 20 days (*30-days if submitted to the State Clearinghouse for a project of area-wide significance*) for public and agency review and comments. At the conclusion, if comments are received, the County Planning & Development Services Department will prepare a document entitled "Responses to Comments" which will be forwarded to any commenting entity and be made part of the record within 10-days of any project consideration.

D. CONTENTS OF INITIAL STUDY & NEGATIVE DECLARATION

This Initial Study is organized to facilitate a basic understanding of the existing setting and environmental implications of the proposed applications.

SECTION 1

I. INTRODUCTION presents an introduction to the entire report. This section discusses the environmental process, scope of environmental review, and incorporation by reference documents.

SECTION 2

II. ENVIRONMENTAL CHECKLIST FORM contains the County's Environmental Checklist Form. The checklist form presents results of the environmental evaluation for the proposed applications and those issue areas that would have either a significant impact, potentially significant impact, or no impact.

PROJECT SUMMARY, LOCATION AND ENVIRONMENTAL SETTINGS describes the proposed project entitlements and required applications. A description of discretionary approvals and permits required for project implementation is also included. It also identifies the location of the project and a general description of the surrounding environmental settings.

ENVIRONMENTAL ANALYSIS evaluates each response provided in the environmental checklist form. Each response checked in the checklist form is discussed and supported with sufficient data and analysis as necessary. As appropriate, each response discussion describes and identifies specific impacts anticipated with project implementation.

SECTION 3

III. MANDATORY FINDINGS presents Mandatory Findings of Significance in accordance with Section 15065 of the CEQA Guidelines.

IV. PERSONS AND ORGANIZATIONS CONSULTED identifies those persons consulted and involved in preparation of this Initial Study and Negative Declaration.

V. REFERENCES lists bibliographical materials used in preparation of this document.

VI. NEGATIVE DECLARATION – COUNTY OF IMPERIAL

VII. FINDINGS

SECTION 4

VIII. RESPONSE TO COMMENTS (IF ANY)

IX. MITIGATION MONITORING & REPORTING PROGRAM (MMRP) (IF ANY)

E. SCOPE OF ENVIRONMENTAL ANALYSIS

For evaluation of environmental impacts, each question from the Environmental Checklist Form is summarized and responses are provided according to the analysis undertaken as part of the Initial Study. Impacts and effects will be evaluated and quantified, when appropriate. To each question, there are four possible responses, including:

1. **No Impact:** A "No Impact" response is adequately supported if the impact simply does not apply to the proposed applications.
2. **Less Than Significant Impact:** The proposed applications will have the potential to impact the environment. These impacts, however, will be less than significant; no additional analysis is required.
3. **Less Than Significant With Mitigation Incorporated:** This applies where incorporation of mitigation measures has reduced an effect from "Potentially Significant Impact" to a "Less Than Significant Impact".
4. **Potentially Significant Impact:** The proposed applications could have impacts that are considered significant. Additional analyses and possibly an EIR could be required to identify mitigation measures that could reduce these impacts to less than significant levels.

F. POLICY-LEVEL or PROJECT LEVEL ENVIRONMENTAL ANALYSIS

This Initial Study and Negative Declaration will be conducted under a ☐ policy-level, ☒ project level analysis. Regarding mitigation measures, it is not the intent of this document to "overlap" or restate conditions of approval that are commonly established for future known projects or the proposed applications. Additionally, those other standard requirements and regulations that any development must comply with, that are outside the County's jurisdiction, are also not considered mitigation measures and therefore, will not be identified in this document.

G. TIERED DOCUMENTS AND INCORPORATION BY REFERENCE

Information, findings, and conclusions contained in this document are based on incorporation by reference of tiered documentation, which are discussed in the following section.

1. Tiered Documents

As permitted in Section 15152(a) of the CEQA Guidelines, information and discussions from other documents can be included into this document. Tiering is defined as follows:

"Tiering refers to using the analysis of general matters contained in a broader EIR (such as the one prepared for a general plan or policy statement) with later EIRs and negative declarations on narrower projects; incorporating by reference the general discussions from the broader EIR; and concentrating the later EIR or negative declaration solely on the issues specific to the later project."

Tiering also allows this document to comply with Section 15152(b) of the CEQA Guidelines, which discourages redundant analyses, as follows:

"Agencies are encouraged to tier the environmental analyses which they prepare for separate but related projects including the general plans, zoning changes, and development projects. This approach can eliminate repetitive discussion of the same issues and focus the later EIR or negative declaration on the actual issues ripe for decision at each level of environmental review. Tiering is appropriate when the sequence of analysis is from an EIR prepared for a general plan, policy or program to an EIR or negative declaration for another plan, policy, or program of lesser scope, or to a site-specific EIR or negative declaration."

Further, Section 15152(d) of the CEQA Guidelines states:

"Where an EIR has been prepared and certified for a program, plan, policy, or ordinance consistent with the requirements of this section, any lead agency for a later project pursuant to or consistent with the program, plan, policy, or ordinance should limit the EIR or negative declaration on the later project to effects which:

- (1) Were not examined as significant effects on the environment in the prior EIR; or
- (2) Are susceptible to substantial reduction or avoidance by the choice of specific revisions in the project, by the imposition of conditions, or other means."

2. Incorporation By Reference

Incorporation by reference is a procedure for reducing the size of EIRs/MND and is most appropriate for including long, descriptive, or technical materials that provide general background information, but do not contribute directly to the specific analysis of the project itself. This procedure is particularly useful when an EIR or Negative Declaration relies on a broadly-drafted EIR for its evaluation of cumulative impacts of related projects (*Las Virgenes Homeowners Federation v. County of Los Angeles* [1986, 177 Ca.3d 300]). If an EIR or Negative Declaration relies on information from a supporting study that is available to the public, the EIR or Negative Declaration cannot be deemed unsupported by evidence or analysis (*San Francisco Ecology Center v. City and County of San Francisco* [1975, 48 Ca.3d 584, 595]). This document incorporates by reference appropriate information from the "Final Environmental Impact Report and Environmental Assessment for the "County of Imperial General Plan EIR" prepared by Brian F. Mooney Associates in 1993 and updates.

When an EIR or Negative Declaration incorporates a document by reference, the incorporation must comply with Section 15150 of the CEQA Guidelines as follows:

- The incorporated document must be available to the public or be a matter of public record (CEQA Guidelines Section 15150[a]). The General Plan EIR and updates are available, along with this document, at the County of Imperial Planning & Development Services Department, 801 Main Street, El Centro, CA 92243 Ph. (442) 265-1736.
- This document must be available for inspection by the public at an office of the lead agency (CEQA Guidelines Section 15150[b]). These documents are available at the County of Imperial Planning & Development Services Department, 801 Main Street, El Centro, CA 92243 Ph. (442) 265-1736.

-
- These documents must summarize the portion of the document being incorporated by reference or briefly describe information that cannot be summarized. Furthermore, these documents must describe the relationship between the incorporated information and the analysis in the tiered documents (CEQA Guidelines Section 15150[c]). As discussed above, the tiered EIRs address the entire project site and provide background and inventory information and data which apply to the project site. Incorporated information and/or data will be cited in the appropriate sections.
 - These documents must include the State identification number of the incorporated documents (CEQA Guidelines Section 15150[d]). The State Clearinghouse Number for the County of Imperial General Plan EIR is SCH #93011023.
 - The material to be incorporated in this document will include general background information (CEQA Guidelines Section 15150[f]). This has been previously discussed in this document.

II. Environmental Checklist

1. **Project Title:** Lot Merger #00147 and Initial Study #20-0018 Seeley Fire Facility and Cooling Center Project
2. **Lead Agency:** Imperial County Planning & Development Services Department
3. **Contact person and phone number:** Diana Robinson, Planner III, (442) 265-1736, ext. 1751
4. **Address:** 801 Main Street, El Centro CA, 92243
5. **E-mail:** dianarobinson@co.imperial.ca.us
6. **Project location:** The project is located at 1862 W. Evan Hewes Highway, Seeley, CA; on a parcel identified as Assessor's Parcel Number (APN) 051-241-006-000, and legally described as Lots 7 to 12 Block 14 and Lots 5 to 10 Block 19 Amended Map of a part of Crabtree Addition to Seeley. The project site is approximately 8.5 acres. See "Exhibits A and B" for reference to location.
7. **Project sponsor's name and address:** Imperial County Executive Office and
Imperial County Workforce and Economic Development
940 Main Street, El Centro, CA 92243
8. **General Plan designation:** Urban (Seeley Urban Area Plan)
9. **Zoning:** R-1 (Low Density Residential)
10. **Description of project:** This Initial Study was prepared to assess the potential environmental impacts deriving from the proposed lot merger of lots 9 and 10 for the construction of the proposed Seeley Fire Facility and Cooling Center ("Project"). The existing project site ("Site") totals approximately 8.5 acres, and consists of twelve (12) lots within one parcel (APN 051-241-006-000). Pursuant to Title 9 Land Use Ordinance setback requirements, no structures can encroach any property lines (or lot lines); therefore, a lot merger application was requested to join lots 9 and 10 (at least), in order to accommodate the proposed building. Since a merger was required, the applicant decided to join the six (6) bottom lots together, and the six (6) top lots, so that the result of the merger would be to end up with 2 lots within one parcel. No development is being proposed on the top lots. The total area of the parcel will not change after the proposed lot merger.

The proposed Seeley Fire Station and Cooling Center is a 4,526 square-foot (sq. ft.) building consisting of a fire station (3,725 sq. ft.), a cooling center (801 sq. ft.), and the infrastructure to accommodate the building such as parking, sidewalks, and perimeter fencing. In addition, the Fire Station includes two 108 sq. ft. uni-sex restrooms; a 123 sq. ft. locker room; a 213 sq. ft. living area; a 151-sq. ft. dorm room; a 90-sq. ft. kitchen; a 91-sq. ft. office; a 128 sq. ft. washroom; a 138 sq. ft. gym; and one 92 sq. ft. bedroom. The Project also includes a 1,881 sq. ft. Apparatus Room to park vehicles and equipment.¹

Additional information about the existing structures, the proposed site improvements (i.e. on-site retention basin) and new infrastructure (i.e. water and sewer lines) can be found under "Attachment A. Application and Supporting Documents" of this package.

The proposed project would replace the existing Imperial County Fire Department (ICFD) Station 3, located at 1828 Park Street, Seeley. The proposed cooling center will serve as a space for the community to go to during the hot or excessive heat warning days of the summer months.
11. **Surrounding land uses and setting:** The parcel is bordered by vacant land to the west, Main Street to the north, residential units (mostly mobile homes) to the east, and West Evan Hewes Highway to the south.

¹ Environmental Assessment Determinations and Compliance Findings for HUD-assisted Projects, Page 4

12. **Other public agencies whose approval is required** (e.g., permits, financing approval, or participation agreement.): A) Planning Commission

13. **Have California Native American tribes traditionally and culturally affiliated with the project area requested consultation pursuant to Public Resources Code section 21080.3.1? If so, is there a plan for consultation that includes, for example, the determination of significance of impacts to tribal cultural resources, procedures regarding confidentiality, etc.?**

Native American Heritage Commission (NAHC) and local tribe members were invited to comment on the project as part of the "Request for Review and Comment" package that was circulated. To date, no comments that would affect the project have been received.

Note: Conducting consultation early in the CEQA process allows tribal governments, lead agencies, and project proponents to discuss the level of environmental review, identify and address potential adverse impacts to tribal cultural resources, and reduce the potential for delay and conflict in the environmental review process. (See Public Resources Code, Section 21080.3.2). Information may also be available from the California Native American Heritage Commission's Sacred Lands File per Public Resources Code, Section 5097.96 and the California Historical Resources Information System administered by the California Office of Historic Preservation. Please also note that Public Resources Code, Section 21082.3 (c) contains provisions specific to confidentiality.

ENVIRONMENTAL FACTORS POTENTIALLY AFFECTED:

The environmental factors checked below would be potentially affected by this project, involving at least one impact that is a "Potentially Significant Impact" as indicated by the checklist on the following pages.

- | | | |
|--|---|---|
| <input type="checkbox"/> Aesthetics | <input type="checkbox"/> Agriculture and Forestry Resources | <input type="checkbox"/> Air Quality |

ENVIRONMENTAL EVALUATION COMMITTEE (EEC) DETERMINATION

After Review of the Initial Study, the Environmental Evaluation Committee has:

☐ Found that the proposed project COULD NOT have a significant effect on the environment, and a NEGATIVE DECLARATION will be prepared.

☐ Found that although the proposed project could have a significant effect on the environment, there will not be a significant effect in this case because revisions in the project have been made by or agreed to by the project proponent. A MITIGATED NEGATIVE DECLARATION will be prepared.

☐ Found that the proposed project MAY have a significant effect on the environment, and an ENVIRONMENTAL IMPACT REPORT is required.

☐ Found that the proposed project MAY have a "potentially significant impact" or "potentially significant unless mitigated" impact on the environment, but at least one effect 1) has been adequately analyzed in an earlier document pursuant to applicable legal standards, and 2) has been addressed by mitigation measures based on the earlier analysis as described on attached sheets. An ENVIRONMENTAL IMPACT REPORT is required, but it must analyze only the effects that remain to be addressed.

☐ Found that although the proposed project could have a significant effect on the environment, because all potentially significant effects (a) have been analyzed adequately in an earlier EIR or NEGATIVE DECLARATION pursuant to applicable standards, and (b) have been avoided or mitigated pursuant to that earlier EIR or NEGATIVE DECLARATION, including revisions or mitigation measures that are imposed upon the proposed project, nothing further is required.

PROJECT SUMMARY

A. Project Location: The project is located at 1862 W. Evan Hewes Highway, Seeley, CA; on a parcel identified as Assessor's Parcel Number (APN) 051-241-006-000, and legally described as Lots 7 to 12 Block 14 and Lots 5 to 10 Block 19 Amended Map of a part of Crabtree Addition to Seeley. The project site is approximately 8.5 acres.

B. Project Summary: This Initial Study was prepared to assess the potential environmental impacts deriving from the proposed lot merger of lots 9 and 10 for the the construction of the proposed Seeley Fire Facility and Cooling Center ("Project"). The California Environmental Quality Act (CEQA) checklist environmental assessment was based on research by ICPDS staff and on the NEPA document ("Environmental Assessment Determinations and Compliance Findings for HUD-assisted Projects" document) provided by the applicant. The existing project site ("Site") totals approximately 8.5 acres, and consists of twelve (12) lots within one parcel (APN 051-241-006-000). As mentioned on Page 8 of this document, a lot merger application was requested to join lots 9 and 10 in order to accommodate the proposed building; however, the applicant decided to join the six (6) bottom lots together, and the six (6) top lots, so that the result of the merger would be to end up with 2 lots within one parcel.

The proposed Seeley Fire Station and Cooling Center is a 4,526 square-foot (sq. ft.) building consisting of a fire station (3,725 sq. ft.), a cooling center (801 sq. ft.), and the infrastructure to accommodate the building such as parking, sidewalks, and perimeter fencing. In addition, the Fire Station includes two uni-sex restrooms, one locker room, one living area, one dorm room, a kitchen, an office, a washroom, gym and one bedroom. The scope of work includes new infrastructure to serve the project, such as new water pipelines, sanitary sewer manhole, water meter, etc. The Project also includes an apparatus room to park vehicles and equipment. The proposed entrance to the facility is off Evan Hewes Highway. The site plan shows a trash enclosure, emergency generator and an on-site retention basin along the east side of the parcel.²

The proposed project would replace the existing Imperial County Fire Department (ICFD) Station 3, located at 1828 Park Street, Seeley. The proposed cooling center will serve as a space for the community to go to during the hot or excessive heat warning days of the summer months.

Additional information about the existing structures, the proposed site improvements (i.e. on-site retention basin) and new infrastructure (i.e. water and sewer lines) can be found under "Attachment A. Application and Supporting Documents" of this package.

C. Environmental Setting: The parcel is bordered by vacant land to the west, Main Street to the north, residential units (mostly mobile homes) to the east, and West Evan Hewes Highway to the south.

D. Analysis: The project site is designated as "Urban" according to the Seeley Urban Area Plan of the Imperial County General Plan, and is zoned "R-1" (Low Density Residential) per Zoning Map #9A under Title 9 Land Use Ordinance. The proposed use can be found under the list of permitted uses of the R-1 Zone, pursuant to Division 5, Zoning Areas Established,

² Environmental Assessment Determinations and Compliance Findings for HUD-assisted Projects, Page 4

Chapter 2 R-1, Section 90502.01 I) "Public fire station/Police station". Merging lots 9 and 10 would serve to place the proposed facility on the project site.

E.

General Plan Consistency: The proposed project is consistent with the Imperial County General Plan's Land Use Ordinance Division 5 Zoning Areas Established since the use is within the allowed by-right uses; and with Division 8 Subdivision, since the application is complete and in accordance with Chapter 8, Section 90808.00. According to documentation provided by the applicant, the existing fire station (Fire Station No. 3) no longer allows the personnel to perform at its best to provide fire prevention services, so the approval of this project would have benefits to the community of Seeley and the environment.

Exhibit "A" Vicinity Map

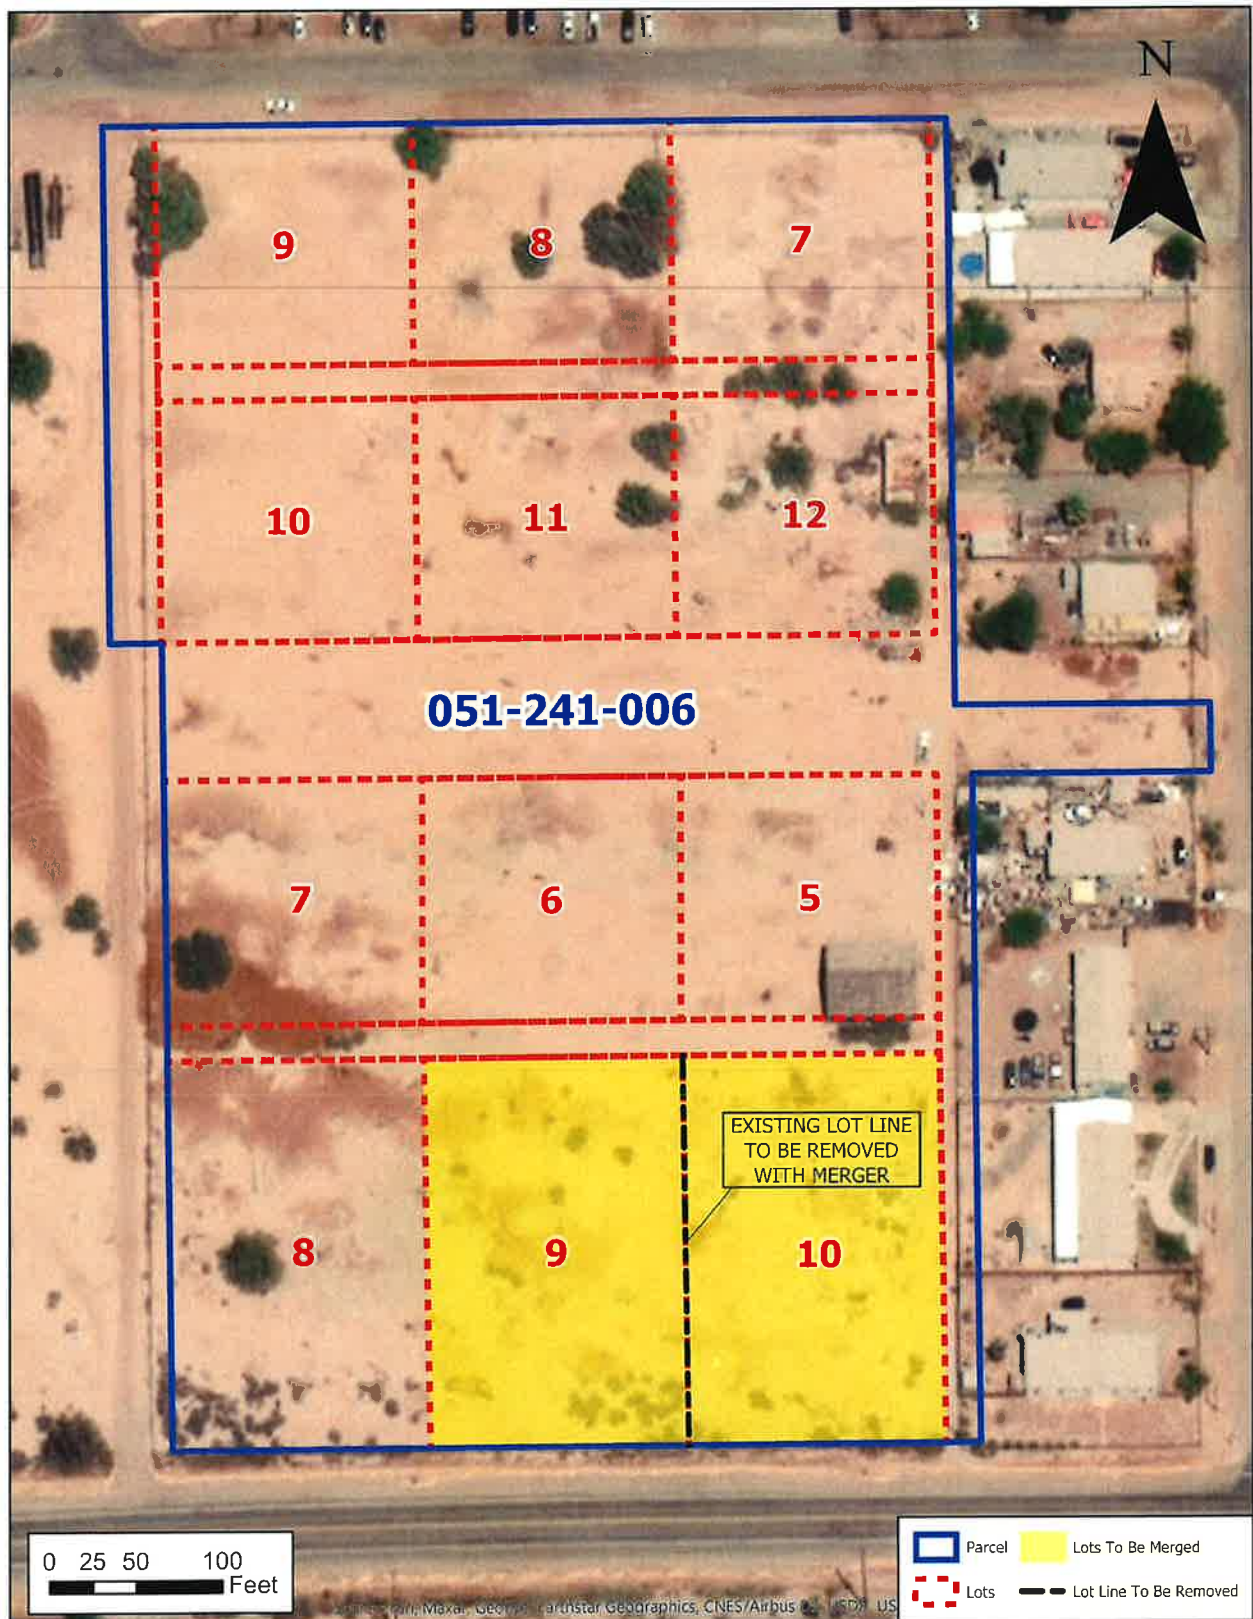

Exhibit "B"
Site Plan

EVAN HEWES

EVALUATION OF ENVIRONMENTAL IMPACTS:

- 1) A brief explanation is required for all answers except "No Impact" answers that are adequately supported by the information sources a lead agency cites in the parentheses following each question. A "No Impact" answer is adequately supported if the referenced information sources show that the impact simply does not apply to projects like the one involved (e.g., the project falls outside a fault rupture zone). A "No Impact" answer should be explained where it is based on project-specific factors as well as general standards (e.g., the project will not expose sensitive receptors to pollutants, based on a project-specific screening analysis).
- 2) All answers must take account of the whole action involved, including off-site as well as on-site, cumulative as well as project-level, indirect as well as direct, and construction as well as operational impacts.
- 3) Once the lead agency has determined that a particular physical impact may occur, then the checklist answers must indicate whether the impact is potentially significant, less than significant with mitigation, or less than significant. "Potentially Significant Impact" is appropriate if there is substantial evidence that an effect may be significant. If there are one or more "Potentially Significant Impact" entries when the determination is made, an EIR is required.
- 4) "Negative Declaration: Less Than Significant With Mitigation Incorporated" applies where the incorporation of mitigation measures has reduced an effect from "Potentially Significant Impact" to a "Less Than Significant Impact." The lead agency must describe the mitigation measures, and briefly explain how they reduce the effect to a less than significant level (mitigation measures from "Earlier Analyses," as described in (5) below, may be cross-referenced).
- 5) Earlier analyses may be used where, pursuant to the tiering, program EIR, or other CEQA process, an effect has been adequately analyzed in an earlier EIR or negative declaration. Section 15063(c)(3)(D). In this case, a brief discussion should identify the following:
 - a) Earlier Analysis Used. Identify and state where they are available for review.
 - b) Impacts Adequately Addressed. Identify which effects from the above checklist were within the scope of and adequately analyzed in an earlier document pursuant to applicable legal standards, and state whether such effects were addressed by mitigation measures based on the earlier analysis.
 - c) Mitigation Measures. For effects that are "Less than Significant with Mitigation Measures Incorporated," describe the mitigation measures which were incorporated or refined from the earlier document and the extent to which they address site-specific conditions for the project.
- 6) Lead agencies are encouraged to incorporate into the checklist references to information sources for potential impacts (e.g., general plans, zoning ordinances). Reference to a previously prepared or outside document should, where appropriate, include a reference to the page or pages where the statement is substantiated.
- 7) Supporting Information Sources: A source list should be attached, and other sources used or individuals contacted should be cited in the discussion.
- 8) This is only a suggested form, and lead agencies are free to use different formats; however, lead agencies should normally address the questions from this checklist that are relevant to a project's environmental effects in whatever format is selected.
- 9) The explanation of each issue should identify:
 - a) the significance criteria or threshold, if any, used to evaluate each question; and
 - b) the mitigation measure identified, if any, to reduce the impact to less than significance

	Potentially Significant Impact (PSI)	Potentially Significant Unless Mitigation Incorporated (PSUMI)	Less Than Significant Impact (LTSI)	No Impact (NI)
--	---	--	--	-------------------

I. AESTHETICS

Except as provided in Public Resources Code Section 21099, would the project:

- | | | | | | |
|----|--|--------------------------|--------------------------|-------------------------------------|-------------------------------------|
| a) | Have a substantial adverse effect on a scenic vista or scenic highway? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
| | a) The project site is not located near a scenic highway per the Imperial County Circulation and Scenic Highway Element³. The roads surrounding the parcel do not meet the scenic highway criteria found on the California Scenic Highway Program⁴; therefore, no impacts are expected to occur. | | | | |
| b) | Substantially damage scenic resources, including, but not limited to trees, rock outcroppings, and historic buildings within a state scenic highway? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
| | b) There are no scenic resources surrounding the project site; therefore, no impacts are expected. | | | | |
| c) | In non-urbanized areas, substantially degrade the existing visual character or quality of public views of the site and its surrounding? (Public views are those that are experienced from publicly accessible vantage point.) If the project is in an urbanized area, would the project conflict with applicable zoning and other regulations governing scenic quality? | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| | c) The proposed building would add to the quality of public views since it would improve the existing site, which has overgrown vegetation, debris and an existing structure that would be demolished. It would also provide a sense of security to neighbors to know that they are within seconds or minutes of fire protection services. The project does not conflict with the zoning of the parcel nor with any other regulations; therefore, less than significant impacts are expected. | | | | |
| d) | Create a new source of substantial light or glare which would adversely affect day or nighttime views in the area? | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| | d) Even though the application includes new sources of light, they are not expected to adversely affect day or nighttime views in the area; therefore, less than significant impacts are expected. | | | | |

II. AGRICULTURE AND FOREST RESOURCES

In determining whether impacts to agricultural resources are significant environmental effects, lead agencies may refer to the California Agricultural Land Evaluation and Site Assessment Model (1997) prepared by the California Department of Conservation as an optional model to use in assessing impacts on agriculture and farmland. In determining whether impacts to forest resources, including timberland, are significant environmental effects, lead agencies may refer to information compiled by the California Department of Forestry and Fire Protection regarding the state's inventory of forest land, including the Forest and Range Assessment Project and the Forest Legacy Assessment project; and forest carbon measurement methodology provided in Forest Protocols adopted by the California Air Resources Board. --Would the project:

- | | | | | | |
|----|---|--------------------------|--------------------------|--------------------------|-------------------------------------|
| a) | Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
| | a) According to the California Department of Conservation Farmland Mapping and Monitoring Program (2016), the project site is designated as "Other land" and "Urban and Built-Up Land", and is not within land designated as Prime, Unique nor Farmland of Statewide Importance⁵. In addition, the parcel is zoned R-1 Low Density Residential; therefore, no agricultural use will be converted. No impacts are expected to occur. | | | | |
| b) | Conflict with existing zoning for agricultural use, or a Williamson Act Contract? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
| | b) The proposed use is consistent with the R-1 (Low Density Residential) zone and the parcel is not zoned for agricultural uses. In addition, the Williamson Act Contract expired and County of Imperial issued Non-Renewals; therefore, no impacts are expected. | | | | |

³ Imperial County General Plan Circulation and Scenic Highways Element, page 30

⁴ Imperial County General Plan Circulation and Scenic Highways Element, pages 80-108

⁵ California Department of Conservation Farmland Mapping <https://maps.conservacion.ca.gov/DLRP/CIFF/>

	Potentially Significant Impact (PSI)	Potentially Significant Unless Mitigation Incorporated (PSUMI)	Less Than Significant Impact (LTSI)	No Impact (NI)
c) Conflict with existing zoning for, or cause rezoning of, forest land (as defined in Public Resources Code section 12220(g)), timberland (as defined by Public Resources Code section 4526), or timberland zoned Timberland Production (as defined by Government Code Section 51104(g))? c) The project is not within any forest land; therefore, no impacts are expected.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
d) Result in the loss of forest land or conversion of forest land to non-forest use? d) As previously stated, the project site is not within or close to any forest land; therefore, no impacts are expected.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
e) Involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland, to non-agricultural use or conversion of forest land to non-forest use? e) Although physical development is being proposed, it would not result in any alterations to agricultural uses since the parcel is not within an agricultural zoned land; therefore, no impacts are expected to occur.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

III. AIR QUALITY

Where available, the significance criteria established by the applicable air quality management district or air pollution control district may be relied upon to the following determinations. Would the Project:

- | | | | | |
|---|--------------------------|--------------------------|-------------------------------------|--------------------------|
| a) Conflict with or obstruct implementation of the applicable air quality plan?
a) The grading and construction phases of the project are being anticipated to last for approximately 8 months, and a temporary release of pollutants is expected during that time. The area to be disturbed is less than an acre, and the activities will be temporary so no excessive emissions are expected. However, in order to limit fugitive dust emissions, the applicant is required to adhere to Regulation VIII rules and shall submit a Construction Dust Control Plan for APCD's review and approval. Compliance with the above requirements are expected to lower potential impacts to less than significant levels. | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| b) Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard?
b) There is a temporary increase in PM10 expected during the grading and construction periods, but the implementation of the Construction Dust Control Plan, to be approved by APCD, will lessen potentially significant impacts. In addition, the contractor shall use standard dust suppression measures to further minimize dust generation during construction. No significant amount of emissions are expected during the operational phase of the project. The amount of trips generated during operations are not expected to increase compared to the current facility. | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| c) Expose sensitive receptors to substantial pollutants concentrations?
c) The proposed structure is expected to expose sensitive receptors to pollutants during the construction phase, even if temporarily; therefore, the project contractor shall implement the Construction Dust Control Plan as approved by APCD to lessen potentially significant impacts. | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| d) Result in other emissions such as those leading to odors adversely affecting a substantial number of people?
d) As mentioned previously, the temporary emission of pollutants is expected to be minimized by the implementation of the approved Construction Dust Control Plan. Compliance with said Plan and with APCD's Regulation VIII, is expected to lower any potential impacts to less than significant levels. | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |

IV. BIOLOGICAL RESOURCES *Would the project:*

- | | | | | |
|---|--------------------------|-------------------------------------|--------------------------|--------------------------|
| a) Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies or regulations, or by the California Department of Fish | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
|---|--------------------------|-------------------------------------|--------------------------|--------------------------|

	Potentially Significant Impact (PSI)	Potentially Significant Unless Mitigation Incorporated (PSUMI)	Less Than Significant Impact (LTSI)	No Impact (NI)	
and Wildlife or U.S. Fish and Wildlife Service?					
a) According to the Environmental Assessment document prepared for HUD ⁶ , two California Endangered Species were identified within a one-half mile radius of the site, but no endangered species were identified on the parcel itself; however, in order to avoid any potentially significant impacts, the following mitigation measures shall be implemented prior to or during construction, as appropriate:					
MM – BIO 1: A pre-construction survey shall be conducted by a Biologist to identify any sensitive biological resources in the areas affected by construction.					
[Monitoring Responsibility: Imperial County Planning & Development Services (ICPDS), Biological Monitor; Timing: prior to construction]					
MM – BIO 2: If warranted by the results of the pre-construction survey, a Biological Monitor shall be present during construction to ensure that resources are avoided and protected.					
[Monitoring Responsibility: Imperial County Planning & Development Services (ICPDS), Biological Monitor; Timing: during construction]					
MM – BIO 3: A third-party compliance monitor shall be present during pre-construction activities/final design and construction to ensure that activities remain within designated boundaries and that no biological resources are unduly disturbed or harmed.					
[Monitoring Responsibility: Imperial County Planning & Development Services (ICPDS), Biological Monitor and Third-Party Compliance Monitor, Timing: prior to and during construction]					
b)	Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations, or by the California Department of Fish and Wildlife or U.S. Fish and Wildlife Service?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b) The project area is not within a riparian habitat. The Environmental Assessment document prepared for HUD did not identify any State Wetlands Data, and the site is not identified by the referenced agencies as being "sensitive"; therefore, less than significant impacts are expected.					
c)	Have a substantial adverse effect on state or federally protected wetlands (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
c) According to the National Wetlands Inventory website ⁷ , there is a riverine habitat approximately 0.30 miles southwest of the project site. According to the compliance determination found on the Environmental Assessment ⁸ , the proposed project would not have an effect on wetland protection; therefore, less than significant impacts are expected.					
d)	Interfere substantially with the movement of any resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
d) The project site is surrounded by disturbed land and is not directly adjacent to a body of water, so impacts to fish are not expected. In order to avoid any potentially significant impacts, the contractor shall implement mitigation measures BIO 1 through 4.					
e)	Conflict with any local policies or ordinance protecting biological resource, such as a tree preservation policy or ordinance?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
e) The proposed subdivision does not conflict with any local policies or ordinances protecting biological resources; therefore, less than significant impacts are expected.					

⁶ Environmental assessment determinations and compliance findings for HUD-assisted projects, Page 16

⁷ National Wetlands Inventory <https://fwsprimary.wim.usgs.gov/wetlands/apps/wetlands-mapper/>

⁸ Environmental assessment determinations and compliance findings for HUD-assisted projects, Page 18

	Potentially Significant Impact (PSI)	Potentially Significant Unless Mitigation Incorporated (PSUMI)	Less Than Significant Impact (LTSI)	No Impact (NI)
--	---	--	--	-------------------

- f) Conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan?

☐ ☐ ☐ ☒

f) According to the Imperial County General Plan's Conservation and Open Space Element, the project is not within a designated sensitive habitat nor an agency-designated habitat area; therefore, no impacts are expected.

V. CULTURAL RESOURCES *Would the project:*

- a) Cause a substantial adverse change in the significance of a historical resource pursuant to §15064.5?

☐ ☐ ☒ ☐

a) The project site is not within or near any "Known Areas of Native American Cultural Sensitivity" as per Imperial County General Plan's Conservation and Open Space Element; therefore, less than significant impacts are expected.

- b) Cause a substantial adverse change in the significance of an archaeological resource pursuant to §15064.5?

☐ ☐ ☐ ☒

b) According to the California Register of Historical Resources, the parcel is not listed as historical;⁹ however, since the project will involve earthmoving activities, impacts could be potentially significant unless the following mitigation measures are incorporated:

MM - CUL 1:

Should archaeological resources be encountered during construction of the project, all work in that area shall be halted and a qualified archaeologist shall be summoned and shall have the authority to halt and redirect construction until the significance of the find can be determined. If the resource is determined to be significant, a recovery and catalog program shall be implemented.

[Monitoring Responsibility: Imperial County Planning & Development Services (ICPDS), Archaeologist; Timing: during construction]

MM - CUL-2: Should artifacts or items of potential paleontological significance be discovered during the project construction activities, all work in that area shall be halted and a qualified paleontologist shall be summoned to the site to evaluate the find. If the resource is determined to be significant, a recovery and catalog program shall be implemented.

[Monitoring Responsibility: Imperial County Planning & Development Services (ICPDS), Qualified paleontologist; Timing: during construction]

MM - CUL-3: If human remains are uncovered during project construction, State Health and Safety Code Section 7050.5 states that no further disturbance shall occur in the immediate area until the County Coroner has made the necessary findings as to origin and disposition pursuant to Public Resources Code Section 5097.98. If the coroner recognizes the human remains to be those of a Native American, or has reason to believe that they are those of a Native American, he or she shall contact, by telephone within 24 hours, the State Native American Heritage Commission (NAHC) who will then contact the appropriate tribal representative.

[Monitoring Responsibility: Imperial County Planning & Development Services (ICPDS), County Coroner, Timing: during construction]

- c) Disturb any human remains, including those interred outside of dedicated cemeteries?

☐ ☒ ☐ ☐

c) There are no known cemeteries on or surrounding the project site; however, implementation of MM CUL 3 as referenced above shall be required to show compliance with California Health and Safety Code §7050.5, CEQA §15064.5, and California Public Resources Code §5097.98.

VI. ENERGY *Would the project:*

- a) Result in potentially significant environmental impact due to wasteful, inefficient, or unnecessary consumption of energy

☐ ☐ ☒ ☐

⁹ Environmental assessment determinations and compliance findings for HUD-assisted projects

	Potentially Significant Impact (PSI)	Potentially Significant Unless Mitigation Incorporated (PSUMI)	Less Than Significant Impact (LTSI)	No Impact (NI)
--	---	--	--	-------------------

resources, during project construction or operation?

a) According to the Environmental Assessment document provided by the applicant, the use of energy efficient lighting and appliances is not expected to be substantial based on the size of the facility and the small number of firefighters per shift (3). Less than significant impacts are expected.

- b) Conflict with or obstruct a state or local plan for renewable energy or energy efficiency? ☐ ☐ ☐ ☒

b) No conflicts with any local or state plans regarding energy are expected. No impacts are anticipated.

VII. GEOLOGY AND SOILS *Would the project:*

- a) Directly or indirectly cause potential substantial adverse effects, including risk of loss, injury, or death involving: ☐ ☐ ☐ ☒

a) According to the Department of Conservation's Geological Survey Maps¹⁰ and the Alquist-Priolo Special Studies Zones Act Seeley Quadrangle Map, the project site is not within in a fault zone nor is within the vicinity of a known fault; therefore, no impacts are expected.

- 1) Rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault? Refer to Division of Mines and Geology Special Publication 42? ☐ ☐ ☒ ☐

1) Since Imperial County is located within the San Andreas Fault line, it is subject to seismic activities and is highly susceptible to natural disasters. As indicated in the Environmental Assessment document provided by the applicant, "...Some of the homes in the area are old and not structurally sound. Along with the cooling center serving as a emergency site location, in the event a disaster should occur, the fire engines can be pulled out of the apparatus bay, to provide the community with additional shelter". The proposed building shall be designed and constructed using the latest and strictest building codes taking seismic factors into consideration or as required by the Imperial County Building Department. Compliance with ICPDS' requirements with the appropriate engineering plans and permits will lessen any potentially significant impacts.

- 2) Strong Seismic ground shaking? ☐ ☐ ☒ ☐

2) As previously mentioned, the construction of the facility shall incorporate the latest building codes regarding seismic activities to reduce potentially significant impacts to less than significant levels. The construction plans shall be stamped by a licensed California engineer and all permits are subject to ICPDS and all applicable County agencies' approval prior to start of construction. Construction per the approved plans will cause for less than significant impacts to occur.

- 3) Seismic-related ground failure, including liquefaction and seiche/tsunami? ☐ ☐ ☒ ☐

3) According to the California Department of Conservation, California Geology Survey (CGS) website, the site is not within a fault zone and has not been evaluated for liquefaction hazards nor for seismic landslide hazards,¹¹ but the implementation of the latest building codes on the construction of the facility will cause for less than significant impacts to occur.

- 4) Landslides? ☐ ☐ ☒ ☐

4) As per the California Department of Conservation, California Geology Survey (CGS) website, the site has not been evaluated for a seismic landslide hazards. The site is not within a fault zone and the facility is subject to ICPDS approval for permits, including the review of all construction plans. Implementing the latest building codes on the construction plans and following all recommendations of the licensed California engineer who stamps the plans will lessen any potentially significant impacts.

- b) Result in substantial soil erosion or the loss of topsoil? ☐ ☐ ☒ ☐

b) The applicant shall submit a Soils Report along with the permit application documents and construction set of plans for the review of ICPDS staff. The engineer who prepares the soils report shall determine the recommendations to follow to avoid or lessen impacts to soil. Following said recommendations as we as any indications by ICPDS, will cause for less than

¹⁰ Department of Conservation Regulatory Maps

¹¹ California Department of Conservation, California Geology Survey (CGS) website <https://maps.conservation.ca.gov/cgs/EQZApp/app/>

	Potentially Significant Impact (PSI)	Potentially Significant Unless Mitigation Incorporated (PSUMI)	Less Than Significant Impact (LTSI)	No Impact (NI)
significant impacts to occur.				
c) Be located on a geologic unit or soil that is unstable or that would become unstable as a result of the project, and potentially result in on- or off-site landslides, lateral spreading, subsidence, liquefaction or collapse? c) The site has not been identified as being on a geologic unit or soil that is unstable. The applicant and construction contractor shall apply the latest building codes as indicated by state and local agencies as well as follow the recommendations of the licensed California engineers involved in the project to avoid or lessen any potentially significant impacts.	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
d) Be located on expansive soil, as defined in the latest Uniform Building Code, creating substantial direct or indirect risk to life or property? d) In addition to providing the permit application documents and construction set of plans, the applicant shall provide all documentation required by ICPDS staff regarding grading and drainage (i.e. Soils Report) and will be required to show compliance with state and local codes, including the latest Uniform Building Code. Less than significant levels are expected if the facility is built following the approved set of plans.	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
e) Have soils incapable of adequately supporting the use of septic tanks or alternative waste water disposal systems where sewers are not available for the disposal of waste water? e) The area is surrounded by residential units and no issues regarding inadequacy of soils supporting septic systems are known. The proposed septic system is subject for review of the County's Environmental Health Services Department. The proposed retention basin is subject for ICPDS and PWD's review. Less than significant impacts are expected if applying all their requirements on the grading and construction plans.	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
f) Directly or indirectly destroy a unique paleontological resource or site or unique geologic feature? f) No paleontological resources were identified in the studies prepared for the Environmental Assessment document provided by the applicant¹²; however, following the mitigation measures MM- CUL 2 would cause for potentially significant impacts to be reduced to less than significant levels.	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

VIII. **GREENHOUSE GAS EMISSION** *Would the project:*

- | | | | | |
|--|--------------------------|-------------------------------------|--------------------------|-------------------------------------|
| a) Generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment?
a) A temporary increase in greenhouse gas emissions is expected due to the grading and construction phases of the project. The project construction plans are subject for the review of the Air Pollution Control District and the implementation of all MM AQ -1 mitigation measures to reduce any potentially significant impacts to less than significant levels. | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| b) Conflict with an applicable plan or policy or regulation adopted for the purpose of reducing the emissions of greenhouse gases?
b) No conflicts with any plans or policies are expected regarding greenhouse gases. | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> |

IX. **HAZARDS AND HAZARDOUS MATERIALS** *Would the project:*

- | | | | | |
|---|--------------------------|--------------------------|--------------------------|-------------------------------------|
| a) Create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials?
a) According to the Environmental Assessment document provided by the applicant, the "...Project parcel and surrounding area was not found on a list of hazardous materials sites. The closest site (Permitted Underground Storage Tank at Pilot Travel Center located at 1850 Main Street approximately 650 feet northeast of the Project site) identified on Geotracker was | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
|---|--------------------------|--------------------------|--------------------------|-------------------------------------|

¹² Environmental assessment determinations and compliance findings for HUD-assisted projects

	Potentially Significant Impact (PSI)	Potentially Significant Unless Mitigation Incorporated (PSUMI)	Less Than Significant Impact (LTSI)	No Impact (NI)
within 1/2 mile of the project parcel. No explosive or flammable hazards are within or proximate to the Project parcel... The Project would not be exposed to explosive or flammable hazards..." ¹³ No impacts are expected.				
b) Create a significant hazard to the public or the environment through reasonable foreseeable upset and accident conditions involving the release of hazardous materials into the environment? b) The project does not include any hazardous materials in their scope of work; therefore, less than significant impacts are expected.	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
c) Emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school? c) No hazardous materials are being proposed. The closest school, which is the Seeley Union School District is located approximately one-quarter mile northeast of the project site; therefore, less than significant impacts are expected.	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
d) Be located on a site, which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment? d) According to the Department of Toxic Substances Control (DTSC) EnviroStor GIS Map,¹⁴ there are no hazardous sites within 1,000 feet of the project site. The closest site shown is a military site and it is shown as being "inactive" and is within 1.5 miles of the site; therefore, no impacts are expected.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
e) For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project result in a safety hazard or excessive noise for people residing or working in the project area? e) The project site is within Zone C of the El Centro Naval Air Facility. Impacts within Zone C include aircraft at or below 1,000 feet above ground level with frequent noise intrusion.¹⁵ An increase in noise levels is expected during the grading and construction period. In order to minimize impacts, the contractor is expected to follow the guidelines found under the Imperial County Noise Ordinance, especially the work schedule (Monday through Friday from 7 am to 7 pm and Saturdays from 9 am to 5 pm)¹⁶. Potentially significant impacts are expected unless the following mitigation measures are implemented.	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
MM – NOI 1: During construction, the project shall be subject to noise control via implementation of the County of Imperial Noise Ordinance.				
[Monitoring Responsibility: Imperial County Planning & Development Services (ICPDS), Timing: during construction]				
MM – NOI 2: Construction equipment operation shall be limited to the hours of 7 a.m. to 7 p.m., Monday through Friday, and 9 a.m. to 5 p.m. Saturday. No commercial construction operations are permitted on Sunday or holidays.				
[Monitoring Responsibility: Imperial County Planning & Development Services (ICPDS), Timing: during construction]				
MM – NOI 3: No construction equipment, or combination of equipment regardless of age or date of acquisition, shall be operated so as to cause noise at a level in excess of seventy-five (75) decibels for more than eight (8) hours during any twenty-four (24) hour period when measured at or within the property lines of any property which is developed and used either in part or in whole for residential purposes.				
[Monitoring Responsibility: Imperial County Planning & Development Services (ICPDS), Timing: during construction]				
f) Impair implementation of or physically interfere with an	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

	Potentially Significant Impact (PSI)	Potentially Significant Unless Mitigation Incorporated (PSUMI)	Less Than Significant Impact (LTSI)	No Impact (NI)
adopted emergency response plan or emergency evacuation plan?				
f) The proposed project is not expected to interfere with an adopted emergency response plan, to the contrary it is expected to help the community by providing adequate fire services; therefore, less than significant impacts are expected.				
g) Expose people or structures, either directly or indirectly, to a significant risk of loss, injury or death involving wildland fires?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
g) According to the California Department of Forestry and Fire Protection "Fire and Resource Assessment Program Map" ¹⁷ for Imperial County, the project site is not within a fire hazard zone; therefore, no impacts are expected.				

X. HYDROLOGY AND WATER QUALITY *Would the project:*

- | | | | | |
|--|--------------------------|--------------------------|-------------------------------------|--------------------------|
| a) Violate any water quality standards or waste discharge requirements or otherwise substantially degrade surface or ground water quality? | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| a) The project site is not within a flood plain according to the Federal Emergency Management Agency (FEMA) Flood Insurance Rate Maps, panel 06025C1700C, and no water nor wastewater quality standards are expected to be violated. Water will be provided by Seeley Water District. Since the existing fire station will be relocated, no substantial increase in water is expected than what is currently being used; therefore, less than significant impacts are expected regarding water quality. | | | | |
| b) Substantially decrease groundwater supplies or interfere substantially with groundwater recharge such that the project may impede sustainable groundwater management of the basin? | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| b) The Elder Lateral 13 borders the eastern half of the Colonia's northern boundary. The New River is approximately 500 feet west of the Colonia's western boundary.¹⁸ The current fire facility is being serviced by the Seeley Water District and the new facility is expected to be serviced by them as well. No groundwater supplies are expected to be decreased. For operational purposes, the amount of water to be used is expected to be the same on the new facility than on the existing one. The applicant and contractor shall be responsible for obtaining the proper permits with the District. Compliance with their requirements will cause for less than significant impacts to occur. | | | | |
| c) Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river or through the addition of impervious surfaces, in a manner which would: | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| c) The project site is not near a stream or river and is subject for the review of a drainage and grading plan. Public Works Department's review and approval is needed prior to construction. Compliance with the requirements by PWD will cause for less than significant impacts to occur. | | | | |
| (i) result in substantial erosion or siltation on- or off-site; | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| (i) The earthmoving activities are not expected to cause for soil erosion nor siltation. The implementation of proper measures concerning groundbreaking and earthmoving activities as indicated by the Soils Report and by ICPDS and PWD will cause for less than significant impacts. | | | | |
| (ii) substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or offsite; | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| (ii) Providing a drainage and grading plan that avoid surface runoff by directing flows appropriately will cause for less than significant impacts to occur. The applicant and contractor shall work with a plan that has been previously approved by ICPDS and PWD. | | | | |
| (iii) create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |

¹⁷ FRAP Fire Hazard Severity Zones

<http://www.arcgis.com/home/webmap/viewer.html?url=https%3A%2F%2Fegis.fire.ca.gov%2Farcgis%2Frest%2Fservices%2FFRAP%2FFHSZ%2FMapServer&source=sd>

¹⁸ Environmental Assessment Determinations and Compliance Findings for HUD-assisted Projects, page 12

	Potentially Significant Impact (PSI)	Potentially Significant Unless Mitigation Incorporated (PSUMI)	Less Than Significant Impact (LTSI)	No Impact (NI)
systems or provide substantial additional sources of polluted runoff; or;				
(iii) The applicant shall submit a drainage and grading plan to Public Works Department for review. Implementation of the approved plan would cause for less than significant impacts regarding stormwater drainage.				
(iv) impede or redirect flood flows?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
(iv) No impacts are expected regarding flood flow impediments.				
d) In flood hazard, tsunami, or seiche zones, risk release of pollutants due to project inundation?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
d) According to the California Emergency Management Agency and the Department of Conservation ¹⁹ , the project site is not within a Tsunami Inundation Area for Emergency Planning; therefore, no impacts are expected.				
e) Conflict with or obstruct implementation of a water quality control plan or sustainable groundwater management plan?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
e) The proposed project would not affect any plan related to water quality nor groundwater management. The use of water will be subject to the review of the Seeley Water District. Since the existing ICFD station 3 will be relocated to this project site, no additional water nor wastewater is anticipated than what is currently used; therefore, less than significant impacts are expected.				

XI. **LAND USE AND PLANNING** Would the project:

- | | | | | |
|---|--------------------------|--------------------------|-------------------------------------|-------------------------------------|
| a) Physically divide an established community? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
| a) The project site is not expected to divide an established community; therefore, no impacts can be expected. | | | | |
| b) Cause a significant environmental impact due to a conflict with any land use plan, policy, or regulation adopted for the purpose of avoiding or mitigating an environmental effect? | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| b) The project does not include any component that would conflict with any land use plans. The proposed use is listed within the allowed uses of the R-1 (Low Density Residential) Zone. The implementation of all of the listed mitigation measures will help lessen any potentially significant impacts to the environment. | | | | |

XII. **MINERAL RESOURCES** Would the project:

- | | | | | |
|--|--------------------------|--------------------------|--------------------------|-------------------------------------|
| a) Result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the state? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
| a) The project site is not within an area identified with mineral resources per Imperial County Conservation and Open Space Element, Figure 8; therefore, no impacts are expected. | | | | |
| b) Result in the loss of availability of a locally-important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
| b) The project site is not within an area of identified mineral resources; no impacts are expected. | | | | |

XIII. **NOISE** Would the project result in:

- | | | | | |
|---|--------------------------|-------------------------------------|--------------------------|--------------------------|
| a) Generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies? | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| a) The earthmoving activities during the construction phase of the new fire facility would cause for an increase in noise levels, while the operational phase would generate noise occasionally and in isolated cases. The existing County Fire Station is not far from the project site and some community residents would still be able to listen to the sirens of the fire trucks when | | | | |

¹⁹ Department of Conservation Tsunami Inundation Maps

	Potentially Significant Impact (PSI)	Potentially Significant Unless Mitigation Incorporated (PSUMI)	Less Than Significant Impact (LTSI)	No Impact (NI)
--	---	--	--	-------------------

operational. Impacts could be potentially significant unless the Noise mitigation measures (MM NOI 1 through 3), at outlined under Category IX Hazards and Hazardous Materials, are incorporated.

MM – NOI 1:

During construction, the project shall be subject to noise control via implementation of the County of Imperial Noise Ordinance.

[Monitoring Responsibility: Imperial County Planning & Development Services (ICPDS), Timing: during construction]

MM – NOI 2:

Construction equipment operation shall be limited to the hours of 7 a.m. to 7 p.m., Monday through Friday, and 9 a.m. to 5 p.m. Saturday. No commercial construction operations are permitted on Sunday or holidays.

[Monitoring Responsibility: Imperial County Planning & Development Services (ICPDS), Timing: during construction]

MM – NOI 3:

No construction equipment, or combination of equipment regardless of age or date of acquisition, shall be operated so as to cause noise at a level in excess of seventy-five (75) decibels for more than eight (8) hours during any twenty-four (24) hour period when measured at or within the property lines of any property which is developed and used either in part or in whole for residential purposes.

[Monitoring Responsibility: Imperial County Planning & Development Services (ICPDS), Timing: during construction]

- b) Generation of excessive groundborne vibration or groundborne noise levels? ☐ ☐ ☒ ☐

b) The foundation of the proposed structure is not expected to require excavation beyond the standard levels for a 25-foot building; therefore, no excessive noise levels are expected. In addition, the earthmoving and construction phases of the project will be temporary and subject to the review of local agencies. Less than significant impacts are expected.

- c) For a project located within the vicinity of a private airstrip or an airport land use plan or where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels? ☐ ☐ ☒ ☐

c) The project site is located within Zone C of the Naval Air Facility of El Centro, according to the ALUC Plan Figure 3²⁰. Zone C requires 15% of open land and it requires that a "Dedication of Overflight Easement" be recorded²¹. Although the project would occasionally create noises (i.e. when sirens are on), the nearby residents would not experience an increase in noise since the facility is being relocated from a neighboring site; therefore, less than significant impacts are expected.

XIV. POPULATION AND HOUSING *Would the project:*

- a) Induce substantial unplanned population growth in an area, either directly (for example, by proposing new homes and business) or indirectly (for example, through extension of roads or other infrastructure)? ☐ ☐ ☒ ☐

a) The project is intended to help the community of Seeley by providing better fire protection services and is not directly intended to induce population growth. In fact, by using this R-1 (Low Density Residential) zoned parcel, no residential units will be built on Lots 9 and 10, thereby reducing the potential of residential growth. The rest of the 10 lots within the parcel could still be used for residential development although it would be unlikely that it would be as a consequence of the fire facility project; therefore, less than significant impacts are expected to occur.

- b) Displace substantial numbers of existing people or housing, necessitating the construction of replacement housing elsewhere? ☐ ☐ ☐ ☒

b) The proposed project does not include any future development or type of work that would cause for displacement of people; therefore, no impacts are expected.

²⁰ ALUC Plan Figure 3 (PDF Page 45/128)

²¹ ALUC Plan Table 2A Compatibility Criteria (PDF Page 28/128)

Potentially Significant Impact (PSI)	Potentially Significant Unless Mitigation Incorporated (PSUMI)	Less Than Significant Impact (LTSI)	No Impact (NI)
---	--	--	-------------------

XV. PUBLIC SERVICES

- a) Would the project result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services:

☐ ☐ ☒ ☐

a) The Seeley Water District provides the utilities (i.e. water and wastewater) in the area. The water and sewer lines would need to be extended to accommodate the proposed use. There is a narrow strip extending east to Mount Signal Avenue that was abandoned.²² No government facilities are expected to be needed or altered to accommodate this project. The purpose of the project is to be able to provide better public services to the community members; therefore, less than significant impacts are expected.

- 1) Fire Protection?

☐ ☐ ☒ ☐

1) The proposed project would improve fire facilities in Seeley and the proposed cooling center would serve the residents during the days of high temperatures throughout the summer months as well as a gathering place in the event of an earthquake. Since the applicant is not proposing to add a new facility, but to relocate to a new one, no additional demand of services is expected. The purpose of the project is to provide adequate fire protection services to the Seeley residents and neighboring community members; therefore, less than significant adverse impacts are expected.

- 2) Police Protection?

☐ ☐ ☒ ☐

2) The proposed fire station will replace the existing one, so no additional facilities would be added that would require additional police protection. Less than significant impacts are expected.

- 3) Schools?

☐ ☐ ☐ ☒

3) The nearest school is approximately one-quarter mile to the northeast of the site. The project would help provide better fire protection services to the area; therefore, no adverse impacts are expected.

- 4) Parks?

☐ ☐ ☐ ☒

4) No activities related to parks are included in the scope of work. The project would not alter nor cause for parks to be impacted; therefore, no impacts are being expected.

- 5) Other Public Facilities?

☐ ☐ ☐ ☒

5) The need for alteration of other public facilities services are not foreseen; therefore, no impacts are expected.

XVI. RECREATION

- a) Would the project increase the use of the existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated?

☐ ☐ ☐ ☒

a) An increase in use of recreational facilities is generally caused by population growth in an area, but the proposed project is not expected to cause for substantial growth; therefore, no impacts are expected.

- b) Does the project include recreational facilities or require the construction or expansion of recreational facilities which might have an adverse effect on the environment?

☐ ☐ ☐ ☒

b) No recreational facilities are being included in the scope of work for this project; therefore, no impacts are expected.

XVII. TRANSPORTATION *Would the project:*

- a) Conflict with a program plan, ordinance or policy addressing the circulation system, including transit, roadway, bicycle and pedestrian facilities?

☐ ☐ ☒ ☐

a) The proposed project is not expected to conflict with the Imperial County General Plan's Circulation and Scenic Highways

²² Environmental Assessment Determinations and Compliance findings for HUD-assisted Projects for Seeley Fire and Cooling Center

	Potentially Significant Impact (PSI)	Potentially Significant Unless Mitigation Incorporated (PSUMI)	Less Than Significant Impact (LTSI)	No Impact (NI)
Element and/or any applicable plan, ordinance or policy related to the transportation since no activities are being proposed that would cause an increase in traffic compared to the existing fire station; therefore, less than significant impacts are expected.				
b) Would the project conflict or be inconsistent with the CEQA Guidelines section 15064.3, subdivision (b)? b) Even though there are no "vehicle miles traveled" being referenced on the project, it is stated that "...As no new firefighters would be hired, operation of the fire station would not increase traffic beyond what is already occurring at the existing Fire Station 3 at 1828 Park Street in Seeley..."²³; therefore, less than significant impacts are expected.	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
c) Substantially increases hazards due to a geometric design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment)? c) The proposed project does not have any design features that could cause concern regarding traffic; therefore, no impacts are expected.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
d) Result in inadequate emergency access? d) The current access to the site off of Evan Hewes Highway is not known to be inadequate and the project would not block any emergency access; therefore, less than significant impacts are expected. Although Caltrans was invited to participate in the review and comments phase of the project, our office received no response.	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

XVIII. TRIBAL CULTURAL RESOURCES

- a) Would the project cause a substantial adverse change in the significance of a tribal cultural resource, defined in Public Resources Code Section 21074 as either a site, feature, place, cultural landscape that is geographically defined in terms of the size and scope of the landscape, sacred place or object with cultural value to a California Native American tribe, and that is:
a) According to the General Plan's Conservation and Open Space Element, Figure 6, the project site is not with any Native American Cultural Sensitivity Area. The Native American Heritage Commission (NAHC) was contacted regarding this project but no comments affecting the project were received. Less than significant impacts are expected.
- (i) Listed or eligible for listing in the California Register of Historical Resources, or in a local register of historical resources as define in Public Resources Code Section 5020.1(k), or
(i) The proposed site was not listed under the California Historical Resources in County of Imperial²⁴ nor seems to be eligible under Public Resources Code Section 21074 or 5020.1 (k); therefore, no impacts are expected.
- (ii) A resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision (c) of Public Resources Code Section 5024.1. In applying the criteria set forth is subdivision (c) of Public Resource Code Section 5024.1, the lead agency shall consider the significance of the resource to a California Native American Tribe.
(ii) The property has been previously disturbed and there appears to be no evidence of historical resources for the property; therefore, less than significant impacts are expected.

XIX. UTILITIES AND SERVICE SYSTEMS *Would the project:*

- a) Require or result in the relocation or construction of new or expanded water, wastewater treatment or stormwater

☐ ☐ ☒ ☐

²³ Environmental Assessment Determinations and Compliance findings for HUD-assisted Projects for Seeley Fire and Cooling Center, Page 24

²⁴ Office of Historic Preservation

	Potentially Significant Impact (PSI)	Potentially Significant Unless Mitigation Incorporated (PSUMI)	Less Than Significant Impact (LTSI)	No Impact (NI)
drainage, electric power, natural gas, or telecommunications facilities, the construction of which could cause significant environmental effects?				
<p>a) The proposed project would need new water and wastewater lines to be constructed in order to serve the new facility. The project is expected to be served by the Seeley County Water District (District). The District owns and operates the wastewater treatment and distribution system infrastructure in the Colonia. New wastewater infrastructure to serve the Project includes a sanitary sewer manhole south of West Evan Hewes Highway; a new 4-inch sanitary sewer extending north across West Evan Hewes Highway into the site; a new 8-inch diameter sanitary parallel to the south side of West Evan Hewes Highway; and a new 4-inch diameter sanitary sewer lateral. Based on the size and limited number of employees at the fire station, the Project is not anticipated to generate substantial quantities of wastewater or have a substantial impact on the capacity of the wastewater treatment plant. In addition, a new 8-inch water pipeline parallel to West Evan Hewes Highway; a new 2-inch water line extending north off the new 8-inch water pipeline; a new water meter, backflow preventer and clean-out along the 2-inch water line, and new fire hydrant on the south side of the fire station and cooling center.²⁵ Based on the provision of water infrastructure and adequate groundwater, less than significant impacts to water supply would occur.</p>				
b) Have sufficient water supplies available to serve the project from existing and reasonably foreseeable future development during normal, dry and multiple dry years?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
<p>b) The project is not expected to increase the need for additional water than what is used at the current ICFD facility; therefore, less than significant impacts are expected regarding water availability.</p>				
c) Result in a determination by the wastewater treatment provider which serves or may serve the project that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
<p>c) The project is not expected to increase the need for additional wastewater than what is used at the current ICFD facility; therefore, less than significant impacts are expected to occur.</p>				
d) Generate solid waste in excess of State or local standards, or in excess of the capacity of local infrastructure, or otherwise impair the attainment of solid waste reduction goals?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
<p>d) Solid waste is not expected to exceed the capacity of local infrastructure as the project would relocate the existing ICFD station users to this project site; therefore, less than significant impacts are expected.</p>				
e) Comply with federal, state, and local management and reduction statutes and regulations related to solid waste?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
<p>e) No impacts regarding federal, state and local management of solid waste are expected.</p>				

XX. WILDFIRE

If located in or near state responsibility areas or lands classified as very high fire hazard severity zones, would the Project:

- | | | | | |
|--|--------------------------|--------------------------|-------------------------------------|-------------------------------------|
| a) Substantially impair an adopted emergency response plan or emergency evacuation plan? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
| a) The project site is not located near or within any wildfire or fire hazard severity zone; therefore, no impacts are expected. | | | | |
| b) Due to slope, prevailing winds, and other factors, exacerbate wildfire risks, and thereby expose project occupants to pollutant concentrations from a wildfire or the uncontrolled spread of a wildfire? | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
| b) The project site is not located near or within any wildfire or fire hazard severity zone. No impacts are expected. | | | | |
| c) Require the installation or maintenance of associated infrastructure (such as roads, fuel breaks, emergency water sources, power lines or other utilities) that may exacerbate fire risk or that may result in temporary or ongoing impacts to the environment? | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| c) Rather than cause for adverse impacts regarding fire risks, the project is intended to improve the fire protection services | | | | |

²⁵ Environmental Assessment Determinations and Compliance findings for HUD-assisted Projects for Seeley Fire and Cooling Center, Page 23

	Potentially Significant Impact (PSI)	Potentially Significant Unless Mitigation Incorporated (PSUMI)	Less Than Significant Impact (LTSI)	No Impact (NI)
--	---	--	--	-------------------

within the Seeley community; therefore, less than significant impacts are expected.

- d) Expose people or structures to significant risks, including downslope or downstream flooding or landslides, as a result of runoff, post-fire slope instability, or drainage changes? ☐ ☐ ☒ ☐

d) No impacts are expected regarding drainage changes, runoff or post-fire slope instability as this project is intended to help improve the fire protection services in the area. The grading required for this project is subject to ICPDS and PWD's review to assure that drainage flows properly and in accordance with state and local laws/codes. Compliance with said requirements would cause for less than significant impacts to occur.

SECTION 3

III. MANDATORY FINDINGS OF SIGNIFICANCE

The following are Mandatory Findings of Significance in accordance with Section 15065 of the CEQA Guidelines.

a) Does the project have the potential to substantially degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, substantially reduce the number or restrict the range of a rare or endangered plant or animal, eliminate tribal cultural resources or eliminate important examples of the major periods of California history or prehistory?

☐
☐
☐
☐

b) Does the project have impacts that are individually limited, but cumulatively considerable? ("Cumulatively considerable" means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects.)

☐
☐
☐
☐

c) Does the project have environmental effects, which will cause substantial adverse effects on human beings, either directly or indirectly?

☐
☐
☐
☐

IV. PERSONS AND ORGANIZATIONS CONSULTED

This section identifies those persons who prepared or contributed to preparation of this document. This section is prepared in accordance with Section 15129 of the CEQA Guidelines.

VI. NEGATIVE DECLARATION – County of Imperial

The following Negative Declaration is being circulated for public review in accordance with the California Environmental Quality Act Section 21091 and 21092 of the Public Resources Code.

Project Name: Initial Study #20-0018 Seeley Fire Facility and Cooling Center Project ("Project")

Project Applicant: Imperial County Executive Office and Imperial County Workforce and Economic Development

Project Location: The project is located at 1862 W. Evan Hewes Highway, Seeley, CA; on a parcel identified as Assessor's Parcel Number (APN) 051-241-006-000, and legally described as Lots 7 to 12 Block 14 and Lots 5 to 10 Block 19 Amended Map of a part of Crabtree Addition to Seeley. The project site is approximately 8.5 acres. See "Exhibits A and B" for reference to location.

Description of Project: This Initial Study was prepared to assess the potential environmental impacts deriving from the construction of the proposed Seeley Fire Facility and Cooling Center ("Project"). The existing project site ("Site") totals approximately 8.5 acres, and consists of twelve (12) lots within one parcel (APN 051-241-006-000). Pursuant to Title 9 Land Use Ordinance setback requirements, no structures can encroach any property lines (or lot lines); therefore, a lot merger application was requested to join lots 9 and 10 in order to accommodate the proposed building, whereas the rest of the 10 lots will remain unchanged. The total area of the parcel will not change after the proposed lot merger.

The proposed Seeley Fire Station and Cooling Center is a 4,526 square-foot (sq. ft.) building consisting of a fire station (3,725 sq. ft.), a cooling center (801 sq. ft.), and the infrastructure to accommodate the building such as parking, sidewalks, and perimeter fencing. In addition, the Fire Station includes two 108 sq. ft. uni-sex restrooms; a 123 sq. ft. locker room; a 213 sq. ft. living area; a 151-sq. ft. dorm room; a 90-sq. ft. kitchen; a 91-sq. ft. office; a 128 sq. ft. washroom; a 138 sq. ft. gym; and one 92 sq. ft. bedroom. The Project also includes a 1,881 sq. ft. Apparatus Room to park vehicles and equipment.²⁶

Additional information about the existing structures, the proposed site improvements (i.e. on-site retention basin) and new infrastructure (i.e. water and sewer lines) can be found under "Attachment A. Application and Supporting Documents" of this package.

The proposed project would replace the existing Imperial County Fire Department (ICFD) Station 3, located at 1828 Park Street, Seeley. The proposed cooling center will serve as a space for the community to go to during the hot or excessive heat warning days of the summer months.

²⁶ Environmental Assessment Determinations and Compliance Findings for HUD-assisted Projects, Page 4

VII. FINDINGS

This is to advise that the County of Imperial, acting as the lead agency, has conducted an Initial Study to determine if the project may have a significant effect on the environmental and is proposing this Negative Declaration based upon the following findings:

☐ The Initial Study shows that there is no substantial evidence that the project may have a significant effect on the environment and a NEGATIVE DECLARATION will be prepared.

☐ The Initial Study identifies potentially significant effects but:

- (1) Proposals made or agreed to by the applicant before this proposed Mitigated Negative Declaration was released for public review would avoid the effects or mitigate the effects to a point where clearly no significant effects would occur.
- (2) There is no substantial evidence before the agency that the project may have a significant effect on the environment.
- (3) Mitigation measures are required to ensure all potentially significant impacts are reduced to levels of insignificance.

A NEGATIVE DECLARATION will be prepared.

If adopted, the Negative Declaration means that an Environmental Impact Report will not be required. Reasons to support this finding are included in the attached Initial Study. The project file and all related documents are available for review at the County of Imperial, Planning & Development Services Department, 801 Main Street, El Centro, CA 92243 (442) 265-1736.

NOTICE

The public is invited to comment on the proposed Negative Declaration during the review period.

Date of Determination Jim Minnick, Director of Planning & Development Services

The Applicant hereby acknowledges and accepts the results of the Environmental Evaluation Committee (EEC) and hereby agrees to implement all Mitigation Measures, if applicable, as outlined in the MMRP.

VIII. RESPONSE TO COMMENTS

(ATTACH DOCUMENTS, IF ANY, HERE)

IX. MITIGATION MONITORING & REPORTING PROGRAM (MMRP)

(ATTACH DOCUMENTS, IF ANY, HERE)

S:\AllUsers\APN\051\241\006\IS20-0018 Seeley Fire Station and Cooling Center Project\EEC\MERG00147 IS20-0018 Initial Study.docx

MITIGATION, MONITORING AND REPORTING PROGRAM

**MITIGATION MEASURES
PURSUANT TO THE ENVIRONMENTAL EVALUATION COMMITTEE**

November 19, 2020

**Seeley Fire Facility and Cooling Center Project
[Lot Merger #00147 Initial Study #20-0018]**

(APN 051-241-006-000)

(CEQA – Mitigated Negative Declaration)

Pursuant to the review and recommendations of the Imperial County Environmental Evaluation Committee (EEC) on November 19, 2020, the following Mitigation Measures are hereby proposed for the project:

MITIGATION MEASURE BIOLOGICAL RESOURCES (MM BIO)

MM – BIO 1:

A pre-construction survey shall be conducted by a Biologist to identify any sensitive biological resources in the areas affected by construction.

[Monitoring Responsibility: Imperial County Planning & Development Services (ICPDS), Biological Monitor; Timing: prior to construction]

MM – BIO 2:

If warranted by the results of the pre-construction survey, a Biological Monitor shall be present during construction to ensure that resources are avoided and protected.

[Monitoring Responsibility: Imperial County Planning & Development Services (ICPDS), Biological Monitor; Timing: during construction]

MM – BIO 3:

A third-party compliance monitor shall be present during pre-construction activities/final design and construction to ensure that activities remain within designated boundaries and that no biological resources are unduly disturbed or harmed.

[Monitoring Responsibility: Imperial County Planning & Development Services (ICPDS), Biological Monitor and Third-Party Compliance Monitor, Timing: prior to and during construction]

MITIGATION MEASURE CULTURAL RESOURCES (MM CUL)

MM - CUL 1:

Should archaeological resources be encountered during construction of the project, all work in that area shall be halted and a qualified archaeologist shall be summoned and shall have the authority to halt and redirect construction until the significance of the find can be determined. If the resource is determined to be significant, a recovery and catalog program shall be implemented.

[Monitoring Responsibility: Imperial County Planning & Development Services (ICPDS), Archaeologist; Timing: during construction]

MM - CUL-2: Should artifacts or items of potential paleontological significance be discovered during the project construction activities, all work in that area shall be halted and a qualified paleontologist shall be summoned to the site to evaluate the find. If the resource is determined to be significant, a recovery and catalog program shall be implemented.

[Monitoring Responsibility: Imperial County Planning & Development Services (ICPDS), Qualified paleontologist;
Timing: during construction]

MM - CUL-3: If human remains are uncovered during project construction, State Health and Safety Code Section 7050.5 states that no further disturbance shall occur in the immediate area until the County Coroner has made the necessary findings as to origin and disposition pursuant to Public Resources Code Section 5097.98. If the coroner recognizes the human remains to be those of a Native American, or has reason to believe that they are those of a Native American, he or she shall contact, by telephone within 24 hours, the State Native American Heritage Commission (NAHC) who will then contact the appropriate tribal representative.

[Monitoring Responsibility: Imperial County Planning & Development Services (ICPDS), County Coroner, Timing: during construction]

MITIGATION MEASURE NOISE – 1 (MM NOI)

MM – NOI 1:

During construction, the project shall be subject to noise control via implementation of the County of Imperial Noise Ordinance.

[Monitoring Responsibility: Imperial County Planning & Development Services (ICPDS), Timing: during construction]

MM – NOI 2:

Construction equipment operation shall be limited to the hours of 7 a.m. to 7 p.m., Monday through Friday, and 9 a.m. to 5 p.m. Saturday. No commercial construction operations are permitted on Sunday or holidays.

[Monitoring Responsibility: Imperial County Planning & Development Services (ICPDS), Timing: during construction]

MM – NOI 3:

No construction equipment, or combination of equipment regardless of age or date of acquisition, shall be operated so as to cause noise at a level in excess of seventy-five (75) decibels for more than eight (8) hours during any twenty-four (24) hour period when measured at or within the property lines of any property which is developed and used either in part or in whole for residential purposes.

IMPERIAL COUNTY
PLANNING & DEVELOPMENT SERVICES

RE: Request for CEQA Review – 1862 W. Evan Hewes Hwy, Seeley

Dear Mr. Minnick:

The Executive Office requests that the Imperial County Planning and Development Services Department ("ICPDSD") please conduct a California Environmental Quality Act ("CEQA") review of the County of Imperial's proposed acquisition and development of the property located at 1862 W. Evan Hewes Hwy, Seeley, also identified as Assessor's Parcel Number 051-241-006 ("property"). The intended future development project is a new Fire Substation Facility and Cooling Center in the townsite of Seeley as shown in the enclosed **Attachment "A"** site plan.

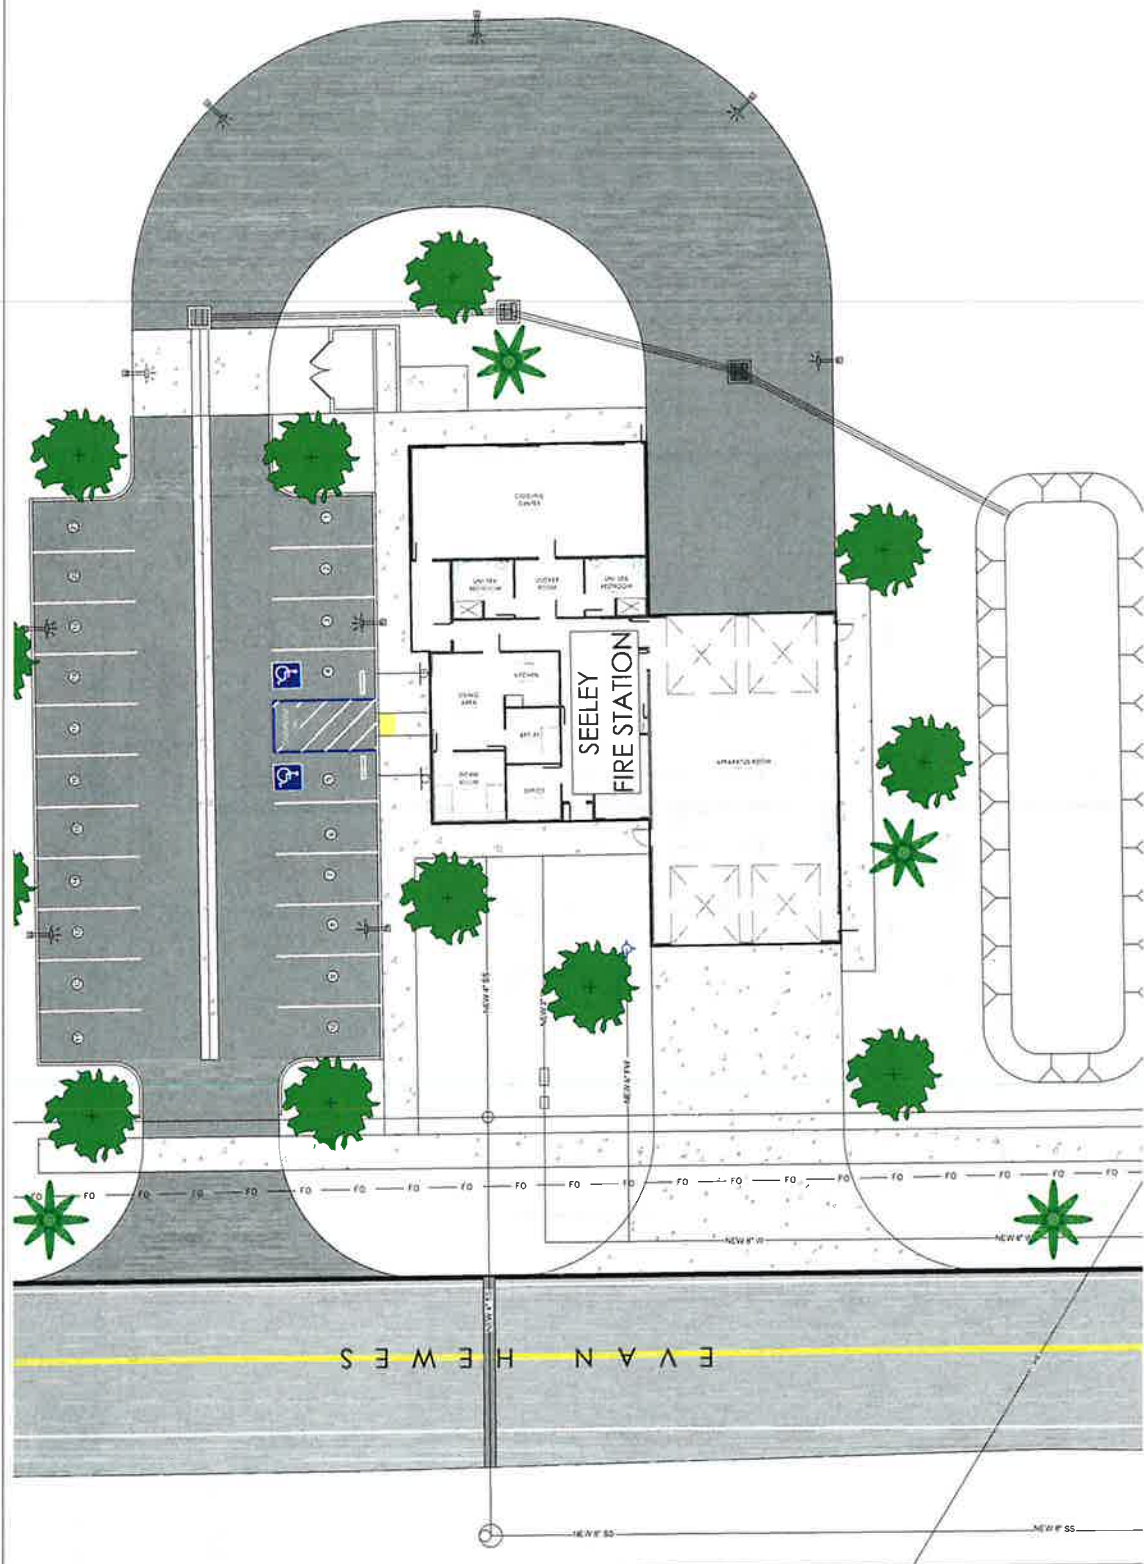

As some background, the Imperial County Board of Supervisors approved an "Option to Purchase Agreement" on February 12, 2019 between the County of Imperial and The Smith Family Living Trust for an exclusive option to purchase the property. This Agreement was entered into in order for the County to demonstrate site control of the subject property so that it would be eligible to pursue a funding application opportunity through the State of California for Community Development Block Grant ("CDBG") funds. This grant funding application was successful in securing the County an "initial notice of award" from the State of California for the intended project to advance. The Executive Office is now tasked with completing all of the required deliverables for timely submittal to the State of California and a CEQA review of the project is one of the required deliverables.

Enclosed hereto are the following submittals for further processing of a CEQA review by the ICPDSD:

- **Attachment "A"** - Proposed Development Site Plan
- **Attachment "B"** - Owner's Affidavit
- **Attachment "C"** - General Indemnification Agreement

IMPERIAL COUNTY PLANNING & DEVELOPMENT SERVICES GENERAL INDEMNIFICATION AGREEMENT

As part of this application, applicant and real party in interest, if different, agree to defend, indemnify, hold harmless, and release the County of Imperial ("County"), its agents, officers, attorneys, and employees (including consultants) from any claim, action, or proceeding brought against any of them, the purpose of which is to attack, set aside, void, or annul the approval of this application or adoption of the environmental document which accompanies it. This indemnification obligation shall include, but not be limited to, damages, costs, expenses, attorney fees, or expert witness fees that may be asserted by any person or entity, including the applicant, arising out of or in connection with the approval of this application, whether or not there is concurrent negligence on the part of the County, its agents, officers, attorneys, or employees (including consultants).

If any claim, action, or proceeding is brought against the County, its agents, officers, attorneys, or employees (including consultants), to attack, set aside, void, or annul the approval of the application or adoption of the environmental document which accompanies it, then the following procedures shall apply:

1. The Planning Director shall promptly notify the County Board of Supervisors of any claim, action or proceeding brought by an applicant challenging the County's action. The County, its agents, attorneys and employees (including consultants) shall fully cooperate in the defense of that action.
2. The County shall have the final determination on how to best defend the case and will consult with applicant regularly regarding status and the plan for defense. The County will also consult and discuss with applicant the counsel to be used by County to defend it, either with in-house counsel, or by retaining outside counsel provided that the County shall have the final decision on the counsel retained to defend it. Applicant shall be fully responsible for all costs incurred. Applicant shall be entitled to provide his or her own counsel to defend the case, and said independent counsel shall work with County Counsel to provide a joint defense.

RE: Seeley Fire Facility and Cooling Center

Ms. Lauchner,

The County of Imperial has been awarded funding from the California Department of Housing and Community Development (HCD) through the Community Development Block Grant (CDBG) Program to construct the Seeley Fire Facility and Cooling Center. The Project is in the Colonia of Seeley in southern Imperial County, California. According to the CDBG Grant Management Manual, the County of Imperial is required to comply with all historical preservation regulations when conducting funding opportunities. This letter serves to fulfill compliance by contacting the State Historic Preservation Office (SHPO) and allowing the opportunity for review and comment.

After a search through the National Register Information System, no historically significant structures were located within a 1-mile radius of the project site. To ensure that historically significant structures are not affected, we have attached a project description with a project location to assist your office in evaluation prior to any construction activities. The County will not proceed until we have received a response, or the thirty-day response period has expired.

Please provide our office with any other pertinent information that will assist us in determining if any other historically significant structures exist in the Colonia of Seeley.

If you have any questions regarding this matter, please feel free to contact me at (442) 265-1000 or by e-mail at tonyrouhotas@co.imperial.ca.us, or you may contact Priscilla Lopez at (442) 265-4985 or by e-mail at priscillalopez@co.imperial.ca.us.

Sincerely,

Tony Rouhotas
Imperial County Executive Officer

AN EQUAL OPPORTUNITY/AFFIRMATIVE ACTION EMPLOYER

The Seeley Fire Station and Cooling Center (proposed Project) is a 4,526 square-foot (sq. ft.) building consisting of a 3,725 sq. ft. fire station and an 801 sq. ft. cooling center. The Project will be constructed by the County of Imperial on a piece of land located at 1862 West Evan Hewes Highway, Seeley, California 92273 (APN 051-241-006-00). The Project site consists of a single parcel approximately 8.5 acres in size in the Colonia of Seeley. The parcel is bordered by vacant land to the west, Main Street on the north, mobile homes on the east, and West Evan Hewes Highway on the south. In addition to the fire facility and cooling center, the Project will also include parking, sidewalks, and perimeter fencing. The site has an existing structure, some vegetation and scattered debris that will have to be removed.

Direct Comments to: Priscilla Lopez, Director of Imperial County Workforce & Economic
Development

Project Location: The Project site is located in the Colonia of Seeley, an unincorporated area of Imperial County. Seeley is approximately 11 miles southwest of the City of Imperial, 8 miles west of the City of El Centro and 14 miles northwest of Heber (Figure 1). The proposed Seeley Fire Station and Cooling Center is planned on a 8.54-acre parcel located at 1862 West Evan Hewes Highway, Seeley, California. The rectangular parcel (Assessor's Parcel Number 051-241-006) has a narrow strip extending east to Mount Signal Avenue on the east (Figure 2) and is bordered by Main Street on the north, West Evan Hewes Highway on the south, rural residential uses on the east and vacant land on the west. The Project would occupy an area approximately 170 feet x 220 feet (0.78 acre) in the southeast corner of the parcel (Figure 3). The area currently has utilities in place serving the Colonia of Seeley, which would be extended to the Project site.

Figure 2 – Project Vicinity Map

Description of the Proposed Project (Project area) [24 CFR 50.12 & 58.32; 40 CFR 1508.25]:

The proposed Project is a combined Fire Station and Cooling Center to be placed in the Colonia of Seeley. The proposed Project is a 4,526 square-foot (sq. ft.) building consisting of a 3,725 sq. ft. fire station and an 801 sq. ft. cooling center on approximately 0.78 acres of a 8.54-acre parcel (Figures) 3 thru 5). The Fire Station includes two 108 sq. ft. uni-sex restrooms; a 123 sq. ft. locker room; a 213 sq. ft. living area; a 151-sq. ft. dorm room; a 90-sq. ft. kitchen; a 91-sq. ft. office; a 128 sq. ft. washroom; a 138 sq. ft. gym; and one 92 sq. ft. bedroom. The Project also includes a 1,881 sq. ft. Apparatus Room (Figure 6).

Other features of the Project include a 33.5-foot wide concrete driveway entrance off West Evan Hewes Highway; a paved parking lot with 21 parking spaces, including two handicapped spots; and curb, gutter and sidewalk installed throughout the Project site. A masonry trash enclosure and emergency generator set is proposed on the north end of the site and an on-site retention basin is proposed along the east side of the site. The basin would measure 107.39 feet long and 30 feet wide (Figure 5).

The fire and cooling station building would be single-story with a maximum height of 25 feet. The building would have windows and entrances on all sides (Figures 7A and 7B). Two 12-foot wide by 14-foot high roll-up doors would be located on the north and south side of the building allowing access to the Apparatus Room to park vehicles and equipment.

New infrastructure to serve the Project includes an 8-inch water pipeline parallel to West Evan Hewes Highway; a sanitary sewer manhole south of West Evan Hewes Highway; a new 4-inch sanitary sewer extending north across West Evan Hewes Highway into the site; a new 2-inch water line extending north off the new 8-inch water pipeline; a new water meter, backflow preventer and clean-out along the 2-inch water line. A new 36-inch x 36-inch x 36-inch stormwater drop inlet on the north side of the fire station and cooling center; a 12-inch diameter stormwater pipeline on the north side of the fire station and cooling center; new 8-inch diameter sanitary parallel to the south side of West Evan Hewes Highway, new 4-inch diameter sanitary sewer lateral and new fire hydrant on the south side of the fire station and cooling center.

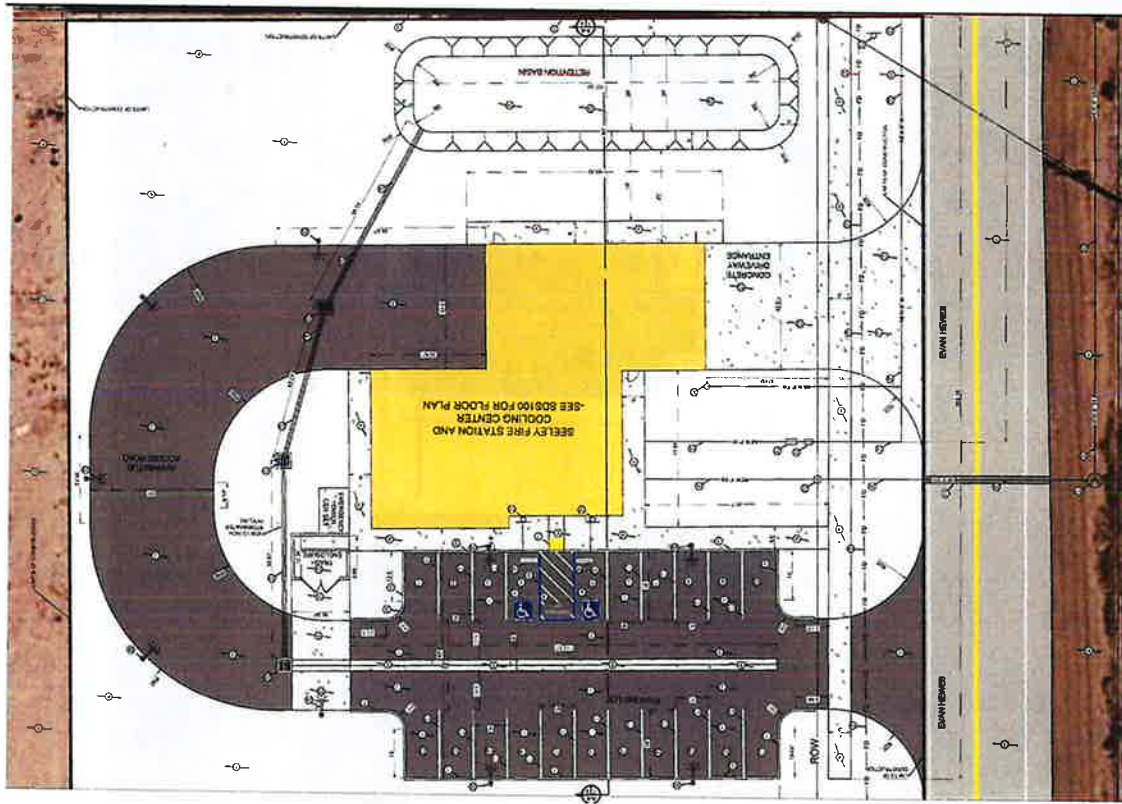

The site is currently surrounded by fencing on the east including a tubular fence near the southeast corner; a 6-foot high wooden fence; and a 6-foot high slatted chain-link fence. All fencing along the eastern boundary would remain in place. However, the chain-link fence along the southern boundary would be removed. Two existing power poles within the boundaries of the site would also be removed.

All improvements would be within the boundaries of the project site with the exception of the following: concrete sidewalks improvements; driveway entrance improvements; water pipeline improvements; and sanitary sewer pipeline improvements that would connect to existing infrastructure within Evan Hewes Highway.

Statement of Purpose and Need for the Proposal [40 CFR 1508.9(b)]:

The Imperial County Fire Department is currently operating out of a severely deteriorating facility. The proposed Project would replace the existing ICFD Station 3 located at 1828 Park Street in Seeley, California. The existing facility is approximately ¼-mile to the northeast of the proposed Fire Station and Cooling Center. The current station is owned by the Seeley County Water District (SCWD) and is being rented by the County of Imperial in order to provide the fire prevention services to the Colonia of Seeley. The SCWD will be increasing its rental fees on the facility to more closely match market rates for rent.

Currently, the ICFD is receiving its only income from property taxes, which is insufficient compared to the monthly expenses. Staffing the facility alone equates to well over three-quarters of a million dollars in expenses by the County. From a financial standpoint, the property tax revenue is not sufficient to fund rehabilitation expenses and the ICFD cannot afford an increase in rent.

A new facility would allow the personnel the ability to have enough room to conduct many daily operations associated with emergency services. The proposed Fire Substation will be relocated to a County owned property located at 1862 Evan Hewes in Seeley. The property purchased for the new facility is approximately 8.54 acres. The existing Station at 1828 Park Avenue will not be demolished and will remain in the possession of the SCWD. The County of Imperial is requesting \$3,000,000 of CDBG Funds to fully complete the ICFD Fire Station and Cooling Center project.

In addition to the building, civil improvements include: sidewalks, driveway, and parking spaces. The proposed facility in total, will be approximately 4,526 sq. ft., and the cooling center will be 801 sq. ft. With a new ADA and Building code compliant fire station, the ICFD staff will have the opportunity to provide the public with a place to receive assistance for many day-to-day activities such as: fire prevention inspection questions and follow up; community outreach programs; first aid; and training space for both internal personnel and the public.

The ICFD portion of the facility consists of living quarters, living area, restrooms with showers, lockers, kitchen, and the apparatus bay. An attached cooling center will give the community a safe area to go to during the hot or excessive heat warning days of the summer months.

The proposed facility will have a cooling center that is intended to be used in accordance with the safety and welfare of the community. As the temperature can often range between 110 and 120 degrees during the summer, the primary purpose of this room is to serve as a cool down location for residents who do not have and cannot afford air conditioning units. The designated cooling center consists of counter space, sink, access to a family restroom, and a storage closet.

The Imperial County lies along the San Andreas Fault line, and it is highly susceptible to natural disasters, such as earthquakes. Some of the homes in the area are old and not structurally sound. Along with the cooling center serving as an emergency site location, in the event a disaster should occur, the fire engines can be pulled out of the apparatus bay, to provide the community with additional shelter.

The facility will not only relieve the financial burden on ICFD, but more importantly, it will provide the Colonia of Seeley adequate fire emergency services.

Existing Conditions and Trends [24 CFR 58.40(a)]:

The proposed project site at 1862 Evan Hewes Highway is located in the Colonia of Seeley, a small urban area in an unincorporated portion of western Imperial County. Seeley is approximately 11 miles southwest of the City of Imperial, 8 miles west of the City of El Centro and 14 miles northwest of Heber (Figure 1). The Colonia has utilities including water and wastewater service from the Seeley County Water District,

and overhead electrical and telephone service. However, the Colonia does not have sidewalks, curbs or gutters. Seeley is approximately 1.2 square miles bordered by Interstate 80 on the south and bisected north-south by Drew Road. The Elder Lateral 13 borders the eastern half of the Colonia's northern boundary. The New River is approximately 500 feet west of the Colonia's western boundary (see Figure 1, above).

The existing ICFD Station 3 located at 1828 Park Avenue, rented from the SCWD, was not constructed to be used as a fire substation; rather, it was a facility used as a training post in World War II. The facility structure fails to meet several required Local, State, Building, and Fire Codes. The facility was not constructed for ADA compliance and accessibility and lacks ADA compliant restrooms for employees and the public. The facility is barely large enough to accommodate the ICFD's equipment which is being stored outside exposing it to the elements as well as theft.

The County itself has paid for numerous repairs to the facility such as replacement/ installation of four apparatus roll-up doors, purchase/installation of new pre-engineered metal interior stairs, and purchase/installation of new flooring on the second floor dormitory/kitchen area. Despite the maintenance, deteriorating conditions remain, but are not limited to: a leaking roof throughout the building; the uneven flooring throughout the interior; non-conforming electrical that needed to be removed; and a lack of existing living space.

Over the years, the leaking roof has damaged flooring and equipment and has undergone several repairs. The old wiring is prone to electricity outages whenever minor storms arrive. The heating and air conditioning of the facility is insufficient, as the electrical capabilities to handle upgraded service cannot be accommodated without a major upgrade. The second-story living and kitchen area is lacking a secondary exit, which is also a safety concern. Should an event occur in which the exit was blocked, any persons in the living and kitchen areas will be trapped.

STATUTES, EXECUTIVE ORDERS, AND REGULATIONS LISTED AT 24 CFR 50.4 and 58.6		
Airport Hazards 24 CFR Part 51 Subpart D	Yes No <input type="checkbox"/> <input checked="" type="checkbox"/>	<p>The proposed Project is approximately 2 miles southwest of the Naval Air Facility (NAF) El Centro. The Project is within Zone C of the NAF El Centro Compatibility Map (See Attachment G Airport Compatibility Map.). Zone C is the Common Traffic Pattern with limited risk. Impacts within the zone include aircraft at or below 1,000 feet above ground level with frequent noise intrusion. The maximum residential density is 6 dwelling units per acre and 200 people per acre. Fifteen percent (15%) of the land must be open space (ALUP 1996, p. 2-16). The project is a Fire Station and Cooling Center and would not be located within a Clear Zone or Accident Potential Zone at the NAF El Centro.</p>
Coastal Barrier Resources Coastal Barrier Resources Act, as amended by the Coastal Barrier Improvement Act of 1990 [16 USC 3501]	Yes No <input type="checkbox"/> <input checked="" type="checkbox"/>	<p>The proposed Project is in the Colonia of Seeley, approximately 90 miles east of the California Coast. It is not along the Atlantic or Gulf coast or along the shore areas of the Great Lakes of the United States. The Project would not result in an adverse effect to Coastal Barrier Resources.</p>
Flood Insurance Flood Disaster Protection Act of 1973 and National Flood Insurance Reform Act of 1994 [42 USC 4001-4128 and 42 USC 5154a]	Yes No <input type="checkbox"/> <input checked="" type="checkbox"/>	<p>The proposed Project is not within Flood Plain as depicted on Federal Emergency Management Agency (FEMA) Flood Insurance Rate Map (FIRM) panel 06025C1700C (See Attachment A, EDR Report, p. 63; and Attachment B FEMA FIRM). The Project is not in a flood disaster area and no flood insurance would be necessary.</p>

Compliance Factors: Statutes, Executive Orders, and Regulations listed at 24 CFR §58.5 and §58.6	Are formal compliance steps or mitigation required?	Compliance determinations
STATUTES, EXECUTIVE ORDERS, AND REGULATIONS LISTED AT 24 CFR 50.4 & 58.5		
<p>Clean Air Clean Air Act, as amended, particularly section 176(c) & (d); 40 CFR Parts 6, 51, 93</p>	<p>Yes No <input type="checkbox"/> <input checked="" type="checkbox"/></p>	<p>Imperial County has been designated as a non-attainment area for both ozone and PM₁₀ (fugitive dust, 10 micrometers or less) standards. Construction of the Project would result in a temporary increase in PM₁₀ in association with demolition, clearing, grading and excavation to install infrastructure. The area to be disturbed on-site is approximately 34,000 square feet (0.78 acres). Total area to be disturbed is 48,552 square feet (1.11 acres) (Mayo, pers. comm., 2020). The project is anticipated to require some imported fill, but the quantity is not known at this time. In addition, granular sand and Class 2 base will be imported to the site for construction of the building pad, driveways, pavement access road, parking lot areas, etc. (Mayo, pers. comm., 2020). The Imperial County Air Pollution Control District (ICAPCD) has construction emissions thresholds of 150 pounds per day (lbs/day) for PM₁₀ and PM_{2.5}; 75 lbs/day for Nitrogen Oxide (NO_x); 100 lbs/day for Carbon Monoxide (CO); and 500 lbs/day for Reactive Organic Gases (ROG) (ICAPCD 2007, p. 19). Based on the size of the area to be disturbed (less than one acre) and the duration of the project (approximately 8 months with grading and excavation activities occurring during the first few weeks of construction), no significant emissions of ozone precursors or other criteria pollutants would occur (i.e. ICAPCD thresholds would not be exceeded). Operation of the proposed Seeley Fire Station and Cooling Center would not result in the generation of significant quantities of ozone precursors, or PM₁₀. Although the project is expected to be well below emission thresholds and no significant air quality impacts are anticipated, the project contractor will use standard dust suppression measures to further minimize dust generation during construction (see Mitigation Measure AQ-</p>

Compliance Factors: Statutes, Executive Orders, and Regulations listed at 24 CFR §58.5 and §58.6	Are formal compliance steps or mitigation required?	Compliance determinations
		<p>1). The project site will be paved and the amount of operational traffic is not anticipated to substantially increase as the Seeley Fire Station and Cooling Center would merely re-locate the existing ICFD Station 3 rather than adding a new fire facility to serve the area. The ICFD has a minimum of 9 firefighters working on site on a 24/7, 7 days of the week basis. (Mayo, pers., comm., 2020). The minimum number of staff during a shift at the facility at any given time is three (3). Currently, increased staffing levels for the ICFD is not planned as that would require budget amendments only approved by the Board of Supervisors. Thus, the maximum number of employees at the proposed Seeley Fire Station and Cooling Center at one time may vary depending on incident priority and necessity. At this time, there will remain 3 firefighters working per shift (3 shifts). This number will not result in substantial vehicle trip emissions during operation. The Cooling Center would be used intermittently as needed and would not substantially add to operational emissions. Documentation: ICAPCD CEQA Air Quality Handbook 2007.</p>
Coastal Zone Management Coastal Zone Management Act, sections 307(c) & (d)	Yes No <input type="checkbox"/> <input checked="" type="checkbox"/>	The Project is in the Colonia of Seeley approximately 90 miles east of the California Coast. The Project would have no impact on Coastal Zone Management.
Contamination and Toxic Substances 24 CFR Part 50.3(i) & 58.5(i)(2)	Yes No <input type="checkbox"/> <input checked="" type="checkbox"/>	The Project is in the Colonia of Seeley. The project parcel is bordered by Main Street on the north, West Evan Hewes Highway on the south, and vacant land on the east and west. The parcel has an existing structure, some vegetation and scattered debris that will have to be removed. A search of a one-half mile radius from the Project site using the Department of Toxic Substances (DTSC's) Envirostor website revealed no active cleanup sites, permitted sites or Leaking Underground Storage Tank sites. A one-half mile radius search of the California State Water

Compliance Factors: Statutes, Executive Orders, and Regulations listed at 24 CFR §58.5 and §58.6	Are formal compliance steps or mitigation required?	Compliance determinations
		Resources Control Board's GeoTracker website revealed one Permitted Underground Storage Tank at Pilot Travel Center located at 1850 Main Street approximately 650 feet northeast of the Project site. No Waste Discharge Requirement Sites, DTSC Hazardous Waste Sites, Land Disposal Sites, etc. were identified. (See Attachment C Envirostor and Geotracker). The Project would not be in an area affected by contamination and toxic substances.
Endangered Species Endangered Species Act of 1973, particularly section 7; 50 CFR Part 402	Yes No <input type="checkbox"/> <input checked="" type="checkbox"/>	Based on a search of the California Endangered Species Database, two California Endangered Species were identified within a one-half mile radius of the site. Chaparral sand-verbena and mud nama, both plants, are within 1/8 mile of the site. (Refer to Attachment A, EDR NEPACheck, p. 3 "Natural Areas Map", and Natural Areas Map Findings, pp. 55-57). No endangered species were identified on the Project parcel. The parcel and surrounding area are highly disturbed and include development to the east and to the north across Main Street. Mitigation measure BIO-1 requires a pre-construction survey to identify any biological resources that could be present on the site that could be impacted by construction. The Project is not anticipated to have a negative effect on endangered species based on existing conditions.
Explosive and Flammable Hazards 24 CFR Part 51 Subpart C	Yes No <input type="checkbox"/> <input checked="" type="checkbox"/>	The Project parcel and surrounding area was not found on a list of hazardous materials sites. The closest site (Permitted Underground Storage Tank at Pilot Travel Center located at 1850 Main Street approximately 650 feet northeast of the Project site) identified on Geotracker was within 1/2mile of the project parcel. No explosive or flammable hazards are within or proximate to the Project parcel (See Attachment C Envirostor and Geotracker). The Project would not be exposed to explosive or flammable hazards.
Farmlands Protection	Yes No	Based on the "Imperial County Important Farmland 2016 Map" prepared by the

Compliance Factors: Statutes, Executive Orders, and Regulations listed at 24 CFR §58.5 and §58.6	Are formal compliance steps or mitigation required?	Compliance determinations
Farmland Protection Policy Act of 1981, particularly sections 1504(b) and 1541; 7 CFR Part 658	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	California Department of Conservation, the Project site is designated as "Urban and Built-Up Land." The Project is not within an area designated as Prime, Unique or Farmland of Statewide Importance (See Attachment D Imperial County Important Farmland 2016 Map). The proposed project would not result in any adverse effect regarding Farmland Protection Policy Act.
Floodplain Management Executive Order 11988, particularly section 2(a); 24 CFR Part 55	Yes No <input type="checkbox"/> <input checked="" type="checkbox"/>	The Project is within Zone X per FEMA FIRM Map No. 06025C1725C, (Refer Attachment A, EDR NEPACheck, pp. 63-64 "Flood Plain Map and Flood Plain Map Findings," and Attachment B FEMA FIRM). Zone X is defined as an area of minimal flood hazard (i.e. a 0.2% Annual Chance Flood Hazard, Area of 1% annual chance flood with average depth less than one foot or with drainage areas of less than one square mile). The Project would not have an adverse effect on Floodplain Management.
Historic Preservation National Historic Preservation Act of 1966, particularly sections 106 and 110; 36 CFR Part 800	Yes No <input type="checkbox"/> <input checked="" type="checkbox"/>	The Project is not listed in the CA Historic Sites Database or the National Register of Historical Places Database. (Refer to Attachment A, EDR NEPACheck, p. 2 and p. 60). All work will be done within previously disturbed areas within the Project parcel and Evan Hewes Highway where off-site water and wastewater connections would be installed. Construction workers, vehicles and staged materials will be monitored to ensure that project boundaries are maintained and that no areas outside of the parcel are disturbed. The likelihood of encountering cultural resources within the project parcel is low. However, as with any activity involving earthmoving, specifically excavation/trenching for foundations and utility installation, the potential exists to uncover unknown subsurface cultural resources or human remains. Mitigation Measures CUL-1, CUL-2, and CUL-3 would be implemented if any previously unknown resources or human remains are discovered during construction. The Project

Compliance Factors: Statutes, Executive Orders, and Regulations listed at 24 CFR §58.5 and §58.6	Are formal compliance steps or mitigation required?	Compliance determinations
		would not have an adverse effect on Historic Preservation.
Noise Abatement and Control Noise Control Act of 1972, as amended by the Quiet Communities Act of 1978; 24 CFR Part 51 Subpart B	Yes No <input type="checkbox"/> <input checked="" type="checkbox"/>	An increase in noise levels would occur during construction in association with equipment and material deliveries, demolition, equipment operation, workers, and overall construction activities. Noise generated by these activities would be temporary (8 months) and would be subject to Mitigation Measures NOI-1, NOI-2 and NOI-3 to ensure compliance with the Imperial County Noise Ordinance. Once the Fire Station is operational, the use of fire engine sirens is not anticipated to increase substantially over the frequency that is currently occurring from the ICFD Station 3 located one-quarter mile northeast of the Project site at 1828 Park Street, Seeley. The ICFD use of sirens is based on the surrounding traffic and intersections, time of day and general area (rural vs. urban). The Seeley Fire Station and Cooling Center is proposed in a rural portion of the County that is not congested. Thus, residents would not be anticipated to notice an increase in siren noise, only a change in location from the existing facility to the new location at 1862 West Evan Hewes Highway. Documentation: Imperial County General Plan Noise Element, 1993.
Sole Source Aquifers Safe Drinking Water Act of 1974, as amended, particularly section 1424(e); 40 CFR Part 149	Yes No <input type="checkbox"/> <input checked="" type="checkbox"/>	EPA Region 9 (Pacific Southwest) includes California, Arizona, Nevada and the Hawaiian Islands. No sole source aquifers are located beneath or in proximity to the Project (Refer to Attachment E Map of Region 9 Sole Source Aquifers in California).
Wetlands Protection Executive Order 11990, particularly sections 2 and 5	Yes No <input type="checkbox"/> <input checked="" type="checkbox"/>	A search of the National Wetland Inventory Data identified 48 wetlands within a one-mile radius of the Project, including one within 1/8-mile of the Project. A one-mile search radius from the Project did not identify any State Wetlands Data (Refer to EDR Report Attachment A, p. 1 & 2 and pp. 66–71). There are no wetlands identified on or adjacent to the project parcel. The proposed Project would have no effect on wetland protection.

Compliance Factors: Statutes, Executive Orders, and Regulations listed at 24 CFR §58.5 and §58.6	Are formal compliance steps or mitigation required?	Compliance determinations
Wild and Scenic Rivers Wild and Scenic Rivers Act of 1968, particularly section 7(b) and (c)	Yes No <input type="checkbox"/> <input checked="" type="checkbox"/>	California has approximately 189,454 miles of rivers. Of this total, approximately 1,999.6 miles are designated as "Wild and Scenic." None of these rivers extend through the County of Imperial. (Refer to Attachment F, California Wild and Scenic River System and Management Agencies). The proposed Project would have no effect on Wild and Scenic River System and Management Agencies.
ENVIRONMENTAL JUSTICE		
Environmental Justice Executive Order 12898	Yes No <input type="checkbox"/> <input checked="" type="checkbox"/>	The proposed Project is needed to provide a new Fire Station and Cooling Center in the Colonia of Seeley in order to continue providing services to the community; which will be improved through this facility. The construction of the project would not result in a disproportionately high or adverse human health or environmental impact on a minority population, low-income population or Indian tribe, because there is no disproportionate impact from one or more environmental hazards and no health risks are present in association with the proposed Project. On the contrary, the Project would provide a new Fire Station and Cooling Center for the residents of the Colonia of Seeley.

Environmental Assessment Factors [24 CFR 58.40; Ref. 40 CFR 1508.8 & 1508.27] Recorded below is the qualitative and quantitative significance of the effects of the proposal on the character, features and resources of the project area. Each factor has been evaluated and documented, as appropriate and in proportion to its relevance to the proposed action. Verifiable source documentation has been provided and described in support of each determination, as appropriate. Credible, traceable and supportive source documentation for each authority has been provided. Where applicable, the necessary reviews or consultations have been completed and applicable permits of approvals have been obtained or noted. Citations, dates/names/titles of contacts, and page references are clear. Additional documentation is attached, as appropriate. **All conditions, attenuation or mitigation measures have been clearly identified.**

Impact Codes: Use an impact code from the following list to make the determination of impact for each factor.

- (1) Minor beneficial impact
- (2) No impact anticipated
- (3) Minor Adverse Impact – May require mitigation
- (4) Significant or potentially significant impact requiring avoidance or modification which may require an Environmental Impact Statement

Environmental Assessment Factor	Impact Code	Impact Evaluation
LAND DEVELOPMENT		
Conformance with Plans/ Compatible Land Use and Zoning/Scale and Urban Design	2	The Project would result in construction of a Fire Station and Cooling Center in the Colonia of Seeley. The Imperial County Land Use Plan (Updated 2007) designates Seeley as an Urban Area. The proposed Project would be consistent with this land use designation. The Project parcel is zoned R-1. A fire station is an allowable use within this zone. The scale of the project would reach a maximum of 25-feet consistent with height limits identified for Zone R-1. Therefore, the proposed Projects would have no impact with regard to conformance with plans, compatibility with land use and zoning/scale and urban design.
Soil Suitability/Slope/ Erosion/ Drainage/Storm Water Runoff	2	The Colonia of Seeley is flat and currently supports limited development. Soils are suitable for development as evidenced by existing structures in the area. Currently, the Colonia has no storm drains, curbs, gutters or sidewalks. The Project includes construction of an on-site retention basin to capture stormwater flows from the Project. Therefore, the proposed Project would have no impact with regard to soil suitability/slope/erosion/drainage and storm water runoff.

Environmental Assessment Factor	Impact Code	Impact Evaluation
Hazards and Nuisances including Site Safety and Noise	3	<p>The proposed Seeley Fire Station and Cooling Center would provide facilities for the ICFD as well as a cooling center for the residents of Seeley. The primary seismic hazard at the site is the potential for strong groundshaking during earthquakes along the San Andreas, Imperial, Elmore Ranch, Brawley Seismic Zone and Superstition Hills faults. The site is not within an Alquist Priolo Earthquake Fault Zone, therefore, surface fault rupture is considered to be low at the site. Geologic and seismic hazards would be addressed through implementing the design criteria identified in the Uniform Building Code and California Building Code. Some short-term noise would be generated during demolition and construction but would be addressed through implementation of mitigation measures NOI-1, NOI-2 and NOI-3. Operational noise would be intermittent in association with sirens when fire vehicles leave the station. Further, this kind of noise currently exists in Seeley at the existing ICFD facility. No other site safety issues are present.</p>
Energy Consumption	1	<p>The project is a 4,526 sq. ft. building consisting of a 3,725 sq. ft. fire station and an 801 sq. ft. cooling center operating on a 24 hour per day/7 days per week basis. The facility would also serve intermittently as a cooling center during the summer and an emergency shelter in the event of an earthquake. Energy consumption would occur in association with heating, cooling and lighting the structure on a 24-hour basis, 365 days of the year. However, based on the size of the facility, the small number of firefighters (minimum of 3 per shift) and the use of energy efficient lighting and appliances, energy consumption is not anticipated to be substantial or wasteful.</p>
SOCIOECONOMIC		
Employment and Income Patterns	1	<p>The ICFD will have a minimum of 3 firefighters per shift occupying the proposed fire station at any one time (Mayo, pers. comm., 2020). No additional employees would be hired to occupy the facility. A few short-term construction jobs would be generated for approximately 8 months. The minimal number and temporary nature of the construction employment would not create a substantial increase in population in Imperial County. Therefore, on an overall basis, the proposed Project would have no effect on employment and income patterns.</p>

Environmental Assessment Factor	Impact Code	Impact Evaluation
Demographic Character Changes, Displacement	1	The proposed project would place a new fire station and cooling center in the Colonia of Seeley. The proposed Project would not result in any changes to the demographic character of the Colonia.
COMMUNITY FACILITIES AND SERVICES		
Educational and Cultural Facilities	2	The proposed Project would place a new fire station and cooling center in the Colonia of Seeley. The proposed Project would not result in any changes to the demographic character of the Colonia.
Commercial Facilities	2	The proposed Fire Station and Cooling Center consists of a 4,526 sq. ft. building including a 3,725 sq. ft. fire station and an 801 sq. ft. cooling center, 33.5-foot wide concrete driveway entrance off West Evan Hewes Highway; a paved parking lot, curb, gutter, and on-site retention basin. The Project would not induce population growth creating the need for more commercial facilities. Therefore, the Project would have no effect on commercial facilities.
Health Care and Social Services	1	The proposed Project is construction of the Seeley Fire Station and Cooling Center. The Project would not affect health care and social services in Imperial County. However, it would provide a minor beneficial impact by providing a location for residents to gather at the Cooling Center during periods of extreme heat or in the event of an earthquake.
Solid Waste Disposal / Recycling	2	The proposed Project is construction of the Seeley Fire Station and Cooling Center. Based on the nature of the project and limited staff occupancy (3 Firefighters per shift), the facility would not generate large quantities of solid waste. Trash and wastepaper generated by the facility would be disposed of at a local landfill.

Environmental Assessment Factor	Impact Code	Impact Evaluation
Waste Water / Sanitary Sewers	2	The proposed Seeley Fire Station and Cooling Center would connect to the existing wastewater system served by the Seeley County Water District (District). The District owns and operates the wastewater treatment and distribution system infrastructure in the Colonia. New wastewater infrastructure to serve the Project includes a sanitary sewer manhole south of West Evan Hewes Highway; a new 4-inch sanitary sewer extending north across West Evan Hewes Highway into the site; a new 8-inch diameter sanitary parallel to the south side of West Evan Hewes Highway; and a new 4-inch diameter sanitary sewer lateral. Based on the size and limited number of employees at the fire station, the Project is not anticipated to generate substantial quantities of wastewater or have a substantial impact on the capacity of the wastewater treatment plant.
Water Supply	2	The proposed Seeley Fire Station and Cooling Center would connect to the existing water system served by the Seeley County Water District (District). The District owns and operates the water treatment and distribution system infrastructure in the Colonia. New infrastructure to serve the Project includes an 8-inch water pipeline parallel to West Evan Hewes Highway; a new 2-inch water line extending north off the new 8-inch water pipeline; a new water meter, backflow preventer and clean-out along the 2-inch water line, and new fire hydrant on the south side of the fire station and cooling center. Based on the provision of water infrastructure and adequate groundwater, no impacts to water supply would occur.
Public Safety - Police, Fire and Emergency Medical	1	The Project would provide a new facility for the ICFD in the Colonia of Seeley. The Project would improve fire facilities in the Colonia and provide a cooling center for the residents during periods of extreme heat as well as a gathering place in the event of an earthquake. The project would not increase the demand on the ICFD. Likewise, the Project would not generate increased demand for emergency medical services and no impact would occur to this service.
Parks, Open Space and Recreation	2	The proposed Project provide a new facility for the ICFD in the Colonia of Seeley. The project site does not support park, open space or recreational use, nor are any included as part of the facility. The project would not require construction of new, or expansion of existing, parks, open space or recreational facilities.
Transportation and Accessibility	2	Construction of the Seeley Fire Station and Cooling Center would result in a short-term increase in traffic associated with demolition, material and equipment delivery and construction

Environmental Assessment Factor	Impact Code	Impact Evaluation
		workers. However, these trips would not have a substantial effect on local roadways given the low volumes of traffic in the area. In addition, construction trips would cease once demolition and construction is completed. As no new firefighters would be hired, operation of the fire station would not increase traffic beyond what is already occurring at the existing ICFD Station 3 at 1828 Park Street in Seeley. Operational trips associated with calls for service would now originate from the new facility at 1862 West Evan Hewes Highway. Limited and intermittent trips would be generated when the facility is used as a Cooling Center or emergency shelter and no impacts to access or the transportation network are anticipated in association with these activities. The proposed project does not include any aviation components, nor would it cause any aviation safety risks. Therefore, the proposed project would not result in a change of air traffic patterns or result in substantial safety risks.
NATURAL FEATURES		
Unique Natural Features, Water Resources	2	The Farmland Mapping and Monitoring Program monitors conversion of the state's agricultural lands. The Niland Colonia is primarily surrounded by Farmland of Local Importance with some areas of Prime Farmland and Farmland of Statewide Importance. However, the proposed project would be located on "Urban and Built-Up Land" in area that has been previously disturbed (See Attachment D, FMMP Map). No noteworthy unique natural features are located on the project parcel as it has been previously disturbed.
Vegetation, Wildlife		Vegetation on the project parcel includes several trees which could have nesting birds. The project parcel has minimal potential habitat for wildlife based on past disturbance. The project is not anticipated to affect Federally-listed or proposed threatened and endangered species (i.e., plants, animals, fish, or invertebrates) as none were identified on the site. However, mitigation measures BIO-1, BIO-2 and BIO-3 would avoid any impacts to birds or any other wildlife, if present. Documentation: Attachment A, EDR NEPACheck, p. 3 "Natural Areas Map", and Natural Areas Map Findings, pp. 55-57.
Other Factors		None applicable.

Additional Studies Performed:

Not applicable.

Field Inspection (Date and completed by):

On May 20, 2020, EGI staff performed a windshield survey of the parcel and took photographs of the site and surrounding area.

List of Permits Obtained:

Dust Control Permit – Imperial County Air Pollution Control District

Grading Permit – City of Imperial, Community Development Department, Building & Safety Division

Public Outreach [24 CFR 50.23 & 58.43]:

The EA/FONSI is available for review at the local Housing and Urban Development (HUD) office located at 1275 Main Street, El Centro, 92243 or the Imperial County Workforce Development Board at 2799 South 4th Street, El Centro, 92243. HUD will mail notices to any individual requesting notification.

The Imperial County Workforce Development Office will send notices to any interested individuals or groups interested in the project and will notice the Finding of No Significant Impact (FONSI) in the Imperial Valley Press (in English) and the El Sol del Valley Imperial (in Spanish). In addition, a notice regarding the FONSI will be sent to the State Historic Preservation Office for (SHPO) review and comment; to the HUD at 1725 23rd Street, Suite 100, Sacramento, CA 95816; and the Environmental Protection Agency, District #9 Regional Office at 75 Hawthorne Street, San Francisco, CA 94105-3901.

Cumulative Impact Analysis [24 CFR 58.32]:

The proposed Project is located in the Colonia of Seeley, a sparsely populated area in rural Imperial County. There is one ongoing project in Seeley, and that is the Seeley Pipe Improvement Project (Mayo, pers. comm., 2020). No other projects are currently under construction or planned in the area at the moment. Therefore, no cumulative impacts would occur.

Alternatives [24 CFR 58.40(e); 40 CFR 1508.9]

An alternative site in Sunbeam Lake was pursued. However, because Sun Beam Lake is a County Park, it was not feasible to move the Fire Department to that area (Mayo pers. comm., 2020). Additionally, there was only one area at Sunbeam Lake park to possibly place this facility; however, the space was very limited and it did not have any water/sewer lines in the area. Another consideration not to select this location was a railroad track that separated this park from the community. Should a train be passing during an emergency, ICFD would not be able to arrive at the scene until the train passed.

No Action Alternative [24 CFR 58.40(e)]:

Under the No Action Alternative, the proposed Seeley Fire Station and Cooling Center would not be constructed and the ICFD would maintain its existing facility at 1828 Park Street in Seeley, California.

The only potential adverse impacts that the proposed project would have on the human environment are temporary demolition and construction-related impacts, specifically noise and dust generated during construction. The No Action Alternative would eliminate the short-term impacts of construction noise, construction dust, potential disturbance of nesting birds, potential for erosion, and discovery of unknown cultural resources. However, building deficiencies, safety issues and lack of ADA compliance that the proposed project is designed to alleviate for the ICFD would continue. Further, the residents of Niland would not have access to a cooling center or emergency shelter. Overall, the long-term health and safety benefits of the project outweigh the temporary construction-related impacts.

Summary of Findings and Conclusions:

The proposed Project would result in an overall beneficial impact for ICFD staff as well as the residents of the Colonia of Seeley. The Project will provide a new fire station and cooling center to allow the safe and efficient operation of the ICFD to serve the Colonia of Seeley. The Project will also include space for a cooling center/emergency shelter. Short-term construction impacts can be addressed through implementation of the mitigation measures identified below. No adverse effects would result from implementation of the proposed Seeley Fire Station and Cooling Center.

Mitigation Measures and Conditions [40 CFR 1505.2(c)]

Summarize below all mitigation measures adopted by the Responsible Entity to reduce, avoid, or eliminate adverse environmental impacts and to avoid non-compliance or non-conformance with the above-listed authorities and factors. These measures/conditions must be incorporated into project contracts, development agreements, and other relevant documents. The staff responsible for implementing and monitoring mitigation measures should be clearly identified in the mitigation plan.

Law, Authority, or Factor	Mitigation Measure
Imperial County Air Pollution Control District	<p><i>Mitigation Measure AQ-1:</i> During clearing, grading, earth moving, or excavation operations, excessive fugitive dust emissions shall be controlled by the following techniques:</p> <ul style="list-style-type: none">• Prepare a high wind dust control plan and implement plan elements and terminate soil disturbance when winds exceed 25 mph.• Limit the simultaneous disturbance area to as small an area as practical when winds exceed 25 mph.• Stabilize previously disturbed areas if subsequent construction is delayed.• Water exposed surfaces 3 times per day.• Cover all stock piles with tarps.• Replace ground cover in disturbed areas quickly. <p>Reduce speeds on unpaved roads to less than 15 mph.</p>
Imperial County Community and Economic Development Department	<p><i>Mitigation Measure BIO-1</i> A pre-construction survey shall be conducted by a Biologist to identify any sensitive biological resources in the areas affected by construction.</p> <p><i>Mitigation Measure BIO-2</i> If warranted by the results of the pre-construction survey, a Biological Monitor shall be present during construction to ensure that resources are avoided and protected.</p> <p><i>Mitigation Measure BIO-3</i> A third-party compliance monitor shall be present during pre-construction activities/final design and construction to ensure that activities remain within designated boundaries and that no biological resources are unduly disturbed or harmed.</p>

Law, Authority, or Factor	Mitigation Measure
<p>Imperial County Community and Economic Development Department, Qualified Archaeologist, as necessary.</p>	<p><i>Mitigation Measure CUL-1:</i> Should archaeological resources be encountered during construction of the project, all work in that area shall be halted and a qualified archaeologist shall be summoned and shall have the authority to halt and redirect construction until the significance of the find can be determined. If the resource is determined to be significant, a recovery and catalog program shall be implemented.</p> <p><i>Mitigation Measure CUL-2:</i> Should artifacts or items of potential paleontological significance be discovered during the project construction activities, all work in that area shall be halted and a qualified paleontologist shall be summoned to the site to evaluate the find. If the resource is determined to be significant, a recovery and catalog program shall be implemented.</p> <p><i>Mitigation Measure CUL-3:</i> If human remains are uncovered during project construction, State Health and Safety Code Section 7050.5 states that no further disturbance shall occur in the immediate area until the County Coroner has made the necessary findings as to origin and disposition pursuant to Public Resources Code Section 5097.98. If the coroner recognizes the human remains to be those of a Native American, or has reason to believe that they are those of a Native American, he or she shall contact, by telephone within 24 hours, the State Native American Heritage Commission (NAHC) who will then contact the appropriate tribal representative.</p>
<p>County of Imperial Noise Ordinance, Imperial County Community and Economic Development Department</p>	<p><i>Mitigation Measure NOI-1:</i> During construction, the project shall be subject to noise control via implementation of the County of Imperial Noise Ordinance.</p> <p><i>Mitigation Measure NOI-2:</i> Construction equipment operation shall be limited to the hours of 7 a.m. to 7 p.m., Monday through Friday, and 9 a.m. to 5 p.m. Saturday. No commercial construction operations are permitted on Sunday or holidays.</p> <p><i>Mitigation Measure NOI-3:</i> No construction equipment, or combination of equipment regardless of age or date of acquisition, shall be operated so as to cause noise at a level in excess of seventy-five (75) decibels for more than eight (8) hours during any twenty-four (24) hour period when measured at or within the property lines of any property which is developed and used either in part or in whole for residential purposes.</p>

Determination:

☒ **Finding of No Significant Impact** [24 CFR 58.40(g)(1); 40 CFR 1508.27]
The project will not result in a significant impact on the quality of the human environment.

☐ **Finding of Significant Impact** [24 CFR 58.40(g)(2); 40 CFR 1508.27]
The project may significantly affect the quality of the human environment.

EDR NEPASearch DESCRIPTION

The National Environmental Policy Act of 1969 (NEPA) requires that Federal agencies include in their decision-making processes appropriate and careful consideration of all environmental effects and actions, analyze potential environmental effects of proposed actions and their alternatives for public understanding and scrutiny, avoid or minimize adverse effects of proposed actions, and restore and enhance environmental quality as much as possible.

The EDR NEPASearch Map Report provides information which may be used, in conjunction with additional research, to determine whether a proposed site or action will have significant environmental effect.

NATURAL AREAS MAP FINDINGS

Federal Endangered Species from the U.S. Fish and Wildlife for IMPERIAL County

Group: Birds

Common Name: Southwestern willow flycatcher
Status: Endangered

Scientific Name: *Empidonax traillii extimus*

Common Name: Western snowy plover
Status: Threatened

Scientific Name: *Charadrius alexandrinus nivosus*

Common Name: Least Bell's vireo
Status: Endangered

Scientific Name: *Vireo bellii pusillus*

Common Name: Yuma clapper rail
Status: Endangered

Scientific Name: *Rallus longirostris yumanensis*

Group: Fishes

Common Name: Desert pupfish
Status: Endangered

Scientific Name: *Cyprinodon macularius*

Common Name: Razorback sucker
Status: Endangered

Scientific Name: *Xyrauchen texanus*

Group: Flowering Plants

Common Name: Peirson's milk-vetch
Status: Threatened

Scientific Name: *Astragalus magdalenae* var. *peirsonii*

Group: Insects

Common Name: Quino checkerspot butterfly
Status: Endangered

Scientific Name: *Euphydryas editha quino* (=E. e. *wrighti*)

Group: Mammals

Common Name: Peninsular bighorn sheep
Status: Endangered

Scientific Name: *Ovis canadensis nelsoni*

Group: Reptiles

Common Name: Desert tortoise
Status: Threatened

Scientific Name: *Gopherus agassizii*

Federal Endangered Species from the U.S. Fish and Wildlife for CA State

Group: Amphibians

Common Name: Western spadefoot
Status: Under Review

Scientific Name: *Spea hammondi*

Common Name: Channel Islands slender salamander
Status: Species of Concern

Scientific Name: *Batrachoseps pacificus pacificus*

Common Name: Limestone salamander
Status: Under Review

Scientific Name: *Hydromantes brunus*

Common Name: Large-blotched ensatina
Status: Species of Concern

Scientific Name: *Ensatina eschscholtzii klauberi*

Common Name: Oregon spotted frog

Scientific Name: *Rana pretiosa*

NATURAL AREAS MAP FINDINGS

Federal Endangered Species from the U.S. Fish and Wildlife for CA State (Continued...)

Status: Threatened

Common Name: Lowland leopard (=San Felipe leopard) Scientific Name: *Rana yavapaiensis*
frog

Status: Species of Concern

Common Name: Del Norte salamander Scientific Name: *Plethodon elongatus*

Status: Species of Concern

Common Name: Owens Valley web-toes salamander Scientific Name: *Hydromantes* sp.

Status: Species of Concern

Common Name: Mount Lyell salamander Scientific Name: *Hydromantes platycephalus*

Status: Species of Concern

Common Name: Foothill yellow-legged frog Scientific Name: *Rana boylei*

Status: Under Review

Common Name: Breckenridge Mountain slender salamander Scientific Name: *Batrachoseps* sp.

Status: Species of Concern

Common Name: California tiger Salamander Scientific Name: *Ambystoma californiense*

Status: Endangered

Common Name: Kern Plateau salamander Scientific Name: *Batrachoseps robustus*

Status: Under Review

Common Name: Lesser slender salamander Scientific Name: *Batrachoseps minor*

Status: Under Review

Common Name: Yellow-blotched ensatina Scientific Name: *Ensatina eschscholtzii croceator*

Status: Species of Concern

Common Name: Northern red-legged frog Scientific Name: *Rana aurora aurora*

Status: Species of Concern

Common Name: Relictual slender salamander Scientific Name: *Batrachoseps relictus*

Status: Under Review

Common Name: Cascades frog Scientific Name: *Rana cascadae*

Status: Under Review

Common Name: Inyo Mountains slender salamander Scientific Name: *Batrachoseps campi*

Status: Under Review

Common Name: Shasta salamander Scientific Name: *Hydromantes shastae*

Status: Under Review

Common Name: Arizona toad Scientific Name: *Bufo microscaphus microscaphus*

Status: Under Review

Common Name: Kern Canyon slender salamander Scientific Name: *Batrachoseps simatus*

Status: Under Review

Common Name: Black toad Scientific Name: *Bufo exsul*

Status: Species of Concern

NATURAL AREAS MAP FINDINGS

Federal Endangered Species from the U.S. Fish and Wildlife for CA State (Continued...)

Common Name: Tailed frog
Status: Species of Concern

Scientific Name: *Ascaphus truei*

Group: Arachnids

Common Name: Carlow's Cave pseudoscorpion
Status: Species of Concern

Scientific Name: *Aphrastochthonius similis*

Common Name: Hom's micro-blind harvestman
Status: Species of Concern

Scientific Name: *Microcina homi*

Common Name: Lum's micro-blind harvestman
Status: Species of Concern

Scientific Name: *Microcina lumi*

Common Name: Edgewood blind harvestman
Status: Species of Concern

Scientific Name: *Calcina minor*

Common Name: Lee's micro-blind harvestman
Status: Species of Concern

Scientific Name: *Microcina leei*

Common Name: Jung's micro-blind harvestman
Status: Under Review

Scientific Name: *Microcina jungi*

Common Name: Grubbs' cave pseudoscorpion
Status: Species of Concern

Scientific Name: *Aphrastochthonius grubbsi*

Common Name: Music Hall Cave pseudoscorpion
Status: Species of Concern

Scientific Name: *Pseudogarypus orpheus*

Common Name: Lacey's cave pseudoscorpion
Status: Species of Concern

Scientific Name: *Larca laceyi*

Common Name: Empire Cave pseudoscorpion
Status: Species of Concern

Scientific Name: *Microcreagris imperialis*

Common Name: Santa Cruz telemid spider
Status: Species of Concern

Scientific Name: *Telema* sp.

Common Name: Aalbu's cave pseudoscorpion
Status: Species of Concern

Scientific Name: *Archeolarca aalbei*

Common Name: Monterey Dunes scorpion
Status: Species of Concern

Scientific Name: *Pauroctonus maritimus*

Common Name: Tiburon micro-blind harvestman
Status: Species of Concern

Scientific Name: *Microcina tiburona*

Group: Birds

Common Name: Xantus's Murrelet
Status: Candidate

Scientific Name: *Synthliboramphus hypoleucus*

Common Name: Spotted Towhee
Status: Species of Concern

Scientific Name: *Pipilo maculatus clementae*

Common Name: Cooper's hawk

Scientific Name: *Accipiter cooperii*

NATURAL AREAS MAP FINDINGS

Federal Endangered Species from the U.S. Fish and Wildlife for CA State (Continued...)

Status: Species of Concern

Common Name: Grasshopper sparrow

Scientific Name: *Ammodramus savannarum* ssp. *perpallidus*

Status: Species of Concern

Common Name: Black-backed woodpecker

Scientific Name: *picoides arcticus*

Status: Under Review

Common Name: Tufted Puffin

Scientific Name: *Fratercula cirrhata*

Status: Under Review

Common Name: Sharp shinned hawk

Scientific Name: *Accipiter striatus*

Status: Species of Concern

Common Name: Common Yellowthroat

Scientific Name: *Geothlypis trichas sinuosa*

Status: Species of Concern

Common Name: Yuma clapper rail

Scientific Name: *Rallus longirostris yumanensis*

Status: Endangered

Common Name: Southwestern willow flycatcher

Scientific Name: *Empidonax traillii extimus*

Status: Endangered

Common Name: Southern California rufous-crowned
sparrow

Scientific Name: *Aimophila ruficeps canescens*

Status: Species of Concern

Common Name: California spotted Owl

Scientific Name: *Strix occidentalis occidentalis*

Status: Under Review

Common Name: Tricolored blackbird

Scientific Name: *Agelaius tricolor*

Status: Under Review

Common Name: San Joaquin LeConte's thrasher

Scientific Name: *Toxostoma lecontei macmillanorum*

Status: Species of Concern

Common Name: Eagle Mountain scrub jay

Scientific Name: *Aphelocoma coerulescens cana*

Status: Species of Concern

Common Name: Elegant tern

Scientific Name: *Sterna elegans*

Status: Species of Concern

Common Name: Least bittern

Scientific Name: *Ixobrychus exilis hesperis*

Status: Species of Concern

Common Name: Song Sparrow

Scientific Name: *Melospiza melodia pusillula*

Status: Species of Concern

Common Name: Little willow flycatcher

Scientific Name: *Empidonax traillii brewsteri*

Status: Species of Concern

Common Name: Song Sparrow

Scientific Name: *Melospiza melodia samuelis*

Status: Species of Concern

Common Name: Large-billed savannah sparrow

Scientific Name: *Passerculus sandwichensis rostratus*

Status: Species of Concern

NATURAL AREAS MAP FINDINGS

Federal Endangered Species from the U.S. Fish and Wildlife for CA State (Continued...)

Common Name: Black tern
Status: Species of Concern

Scientific Name: *Chlidonias niger*

Common Name: Song Sparrow
Status: Species of Concern

Scientific Name: *Melospiza melodia maxillaris*

Common Name: Fulvous whistling duck
Status: Species of Concern

Scientific Name: *Dendrocygna bicolor*

Common Name: Belding's savannah sparrow
Status: Species of Concern

Scientific Name: *Passerculus sandwichensis beldingi*

Common Name: Bell's sage sparrow
Status: Species of Concern

Scientific Name: *Amphispiza belli belli*

Group: Conifers and Cycads

Common Name: Monterey cypress
Status: Species of Concern

Scientific Name: *Cupressus macrocarpa*

Common Name: Torrey, Del Mar pine
Status: Species of Concern

Scientific Name: *Pinus torreyana torreyana*

Common Name: Tecate cypress
Status: Species of Concern

Scientific Name: *Cupressus forbesii*

Common Name: Bolander's beach pine
Status: Species of Concern

Scientific Name: *Pinus contorta bolanderi*

Common Name: Monterey pine
Status: Species of Concern

Scientific Name: *Pinus radiata*

Common Name: Torrey Island pine
Status: Species of Concern

Scientific Name: *Pinus torreyana insularis*

Common Name: Mendocino cypress
Status: Species of Concern

Scientific Name: *Cupressus goveniana pigmaea*

Common Name: Yellow cedar
Status: Under Review

Scientific Name: *Callitropsis nootkatensis*

Group: Crustaceans

Common Name: [Unnamed] isopod
Status: Species of Concern

Scientific Name: *Caecidotea tomalensis*

Common Name: Vernal pool tadpole shrimp
Status: Endangered

Scientific Name: *Lepidurus packardii*

Common Name: Longhorn fairy shrimp
Status: Endangered

Scientific Name: *Branchinecta longiantenna*

Common Name: California freshwater shrimp
Status: Endangered

Scientific Name: *Syncaris pacifica*

Common Name: Mono Lake brine shrimp

Scientific Name: *Artemia monica*

NATURAL AREAS MAP FINDINGS

Federal Endangered Species from the U.S. Fish and Wildlife for CA State (Continued...)

Status: Species of Concern

Common Name: Conservancy fairy shrimp
Status: Endangered

Scientific Name: *Branchinecta conservatio*

Group: Ferns and Allies

Common Name: Crater Lake grape fern
Status: Species of Concern

Scientific Name: *Botrychium pumicola nealleyi*

Common Name: No common name
Status: Species of Concern

Scientific Name: *Botrychium crenulatum*

Group: Fishes

Common Name: Rough sculpin
Status: Species of Concern

Scientific Name: *Cottus asperimus*

Common Name: Kern River rainbow trout
Status: Species of Concern

Scientific Name: *Oncorhynchus mykiss gilberti*

Common Name: Steelhead
Status: Endangered

Scientific Name: *Oncorhynchus (=Salmo) mykiss*

Common Name: Goose Lake redband trout
Status: Species of Concern

Scientific Name: *Oncorhynchus mykiss ssp.*

Common Name: Eagle Lake rainbow Trout
Status: Under Review

Scientific Name: *Oncorhynchus mykiss aquilarum*

Common Name: Flannelmouth sucker
Status: Species of Concern

Scientific Name: *Catostomus latipinnis*

Common Name: Steelhead
Status: Under Review

Scientific Name: *Oncorhynchus (=Salmo) mykiss*

Common Name: longfin smelt
Status: Candidate

Scientific Name: *Spirinchus thaleichthys*

Common Name: Benton Valley speckled dace
Status: Species of Concern

Scientific Name: *Rhinichthys osculus ssp.*

Common Name: Jenny Creek sucker
Status: Species of Concern

Scientific Name: *Catostomus rimiculus ssp.*

Common Name: Arroyo chub
Status: Species of Concern

Scientific Name: *Gila orcuttii*

Common Name: Steelhead
Status: Threatened

Scientific Name: *Oncorhynchus (=Salmo) mykiss*

Common Name: Owens speckled dace
Status: Species of Concern

Scientific Name: *Rhinichthys osculus ssp.*

Common Name: Red Hills roach
Status: Species of Concern

Scientific Name: *Lavinia symmetricus ssp.*

NATURAL AREAS MAP FINDINGS

Federal Endangered Species from the U.S. Fish and Wildlife for CA State (Continued...)

Common Name: Santa Ana speckled dace
Status: Species of Concern

Scientific Name: *Rhinichthys osculus* ssp.

Common Name: Shoshone pupfish
Status: Species of Concern

Scientific Name: *Cyprinodon nevadensis shoshone*

Common Name: Long Valley speckled dace
Status: Species of Concern

Scientific Name: *Rhinichthys osculus* ssp.

Common Name: Klamath largescale sucker
Status: Species of Concern

Scientific Name: *Catostomus snyderi*

Common Name: Goose Lake sucker
Status: Species of Concern

Scientific Name: *Catostomus occidentalis lacusanserinus*

Common Name: Sacramento perch
Status: Species of Concern

Scientific Name: *Archoplites interruptus*

Common Name: green sturgeon
Status: Threatened

Scientific Name: *Acipenser medirostris*

Common Name: Pit roach
Status: Species of Concern

Scientific Name: *Lavinia symmetricus mitrulus*

Common Name: Warner Valley redband trout
Status: Species of Concern

Scientific Name: *Oncorhynchus mykiss* ssp.

Common Name: Amargosa Canyon speckled dace
Status: Species of Concern

Scientific Name: *Rhinichthys osculus* ssp.

Common Name: Russian River tule perch
Status: Species of Concern

Scientific Name: *Hysteroecarpus traskii* pomo

Common Name: Goose Lake lamprey
Status: Species of Concern

Scientific Name: *Lampetra tridentata* ssp.

Common Name: Gualala roach
Status: Species of Concern

Scientific Name: *Lavinia symmetricus parvipinnis*

Group: Flowering Plants

Common Name: Marin dwarf-flax
Status: Threatened

Scientific Name: *Hesperolinon congestum*

Common Name: Fleshy owl's-clover
Status: Threatened

Scientific Name: *Castilleja campestris* ssp. *succulenta*

Common Name: Pine Hill ceanothus
Status: Endangered

Scientific Name: *Ceanothus roderickii*

Common Name: Hoover's spurge
Status: Threatened

Scientific Name: *Chamaesyce hooveri*

Common Name: Suisun thistle
Status: Endangered

Scientific Name: *Cirsium hydrophilum* var. *hydrophilum*

NATURAL AREAS MAP FINDINGS

Federal Endangered Species from the U.S. Fish and Wildlife for CA State (Continued...)

Common Name: Vine Hill clarkia Status: Endangered	Scientific Name: <i>Clarkia imbricata</i>
Common Name: Soft bird's-beak Status: Endangered	Scientific Name: <i>Cordylanthus mollis</i> ssp. <i>mollis</i>
Common Name: Baker's larkspur Status: Endangered	Scientific Name: <i>Delphinium bakeri</i>
Common Name: Yellow larkspur Status: Endangered	Scientific Name: <i>Delphinium luteum</i>
Common Name: lone (incl. Irish Hill) buckwheat Status: Endangered	Scientific Name: <i>Eriogonum apricum</i> (incl. var. <i>prostratum</i>)
Common Name: Pine Hill flannelbush Status: Endangered	Scientific Name: <i>Fremontodendron californicum</i> ssp. <i>decumbens</i>
Common Name: El Dorado bedstraw Status: Endangered	Scientific Name: <i>Galium californicum</i> ssp. <i>sierrae</i>
Common Name: Sebastopol meadowfoam Status: Endangered	Scientific Name: <i>Limnanthes vinculans</i>

Status: Endangered

Scientific Name: *Clarkia franciscana*

Common Name: Palmate-bracted bird's beak
Status: Endangered

Scientific Name: *Cordylanthus palmatus*

Common Name: Tiburon paintbrush
Status: Endangered

Scientific Name: *Castilleja affinis* ssp. *neglecta*

Common Name: Sonoma alopecurus
Status: Endangered

Scientific Name: *Alopecurus aequalis* var. *sonomensis*

Common Name: lone manzanita
Status: Threatened

Scientific Name: *Arctostaphylos myrtifolia*

NATURAL AREAS MAP FINDINGS

Federal Endangered Species from the U.S. Fish and Wildlife for CA State (Continued...)

Common Name: Pallid manzanita Status: Threatened	Scientific Name: <i>Arctostaphylos pallida</i>
Common Name: Solano grass Status: Endangered	Scientific Name: <i>Tuctoria mucronata</i>
Common Name: San Mateo thornmint Status: Endangered	Scientific Name: <i>Acanthomintha obovata</i> ssp. <i>duttonii</i>
Common Name: Clara Hunt's milk-vetch Status: Endangered	Scientific Name: <i>Astragalus clarianus</i>
Common Name: Chinese Camp brodiaea Status: Threatened	Scientific Name: <i>Brodiaea pallida</i>
Common Name: Mariposa pussypaws Status: Threatened	Scientific Name: <i>Calyptidium pulchellum</i>
Common Name: Stebbins' morning-glory Status: Endangered	Scientific Name: <i>Calystegia stebbinsii</i>
Common Name: White sedge Status: Endangered	Scientific Name: <i>Carex albida</i>
Common Name: Santa Clara Valley dudleya Status: Endangered	Scientific Name: <i>Dudleya setchellii</i>
Common Name: Island tree poppy Status: Species of Concern	Scientific Name: <i>Dendromecon rigida</i> <i>rharnoides</i>
Common Name: Northcoast birds-beak Status: Species of Concern	Scientific Name: <i>Cordylanthus maritimus</i> <i>palustris</i>
Common Name: Loch Lomond coyote thistle Status: Endangered	Scientific Name: <i>Eryngium constancei</i>
Common Name: Red Hills vervain Status: Threatened	Scientific Name: <i>Verbena californica</i>
Common Name: San Francisco lessingia Status: Endangered	Scientific Name: <i>Lessingia germanorum</i> (=L.g. var. <i>germanorum</i>)
Common Name: Payson's jewelflower Status: Species of Concern	Scientific Name: <i>Caulanthus simulans</i>
Common Name: Santa Barbara false-lupine Status: Species of Concern	Scientific Name: <i>Thermopsis macrophylla</i> <i>agnina</i>
Common Name: Beaked clarkia Status: Species of Concern	Scientific Name: <i>Clarkia rostrata</i>
Common Name: Boundary Peak rock-cress Status: Species of Concern	Scientific Name: <i>Boechera pinzliae</i>
Common Name: Island jepsonia Status: Species of Concern	Scientific Name: <i>Jepsonia malvifolia</i>

NATURAL AREAS MAP FINDINGS

Federal Endangered Species from the U.S. Fish and Wildlife for CA State (Continued...)

Common Name: Channel Island tree poppy Status: Species of Concern	Scientific Name: <i>Dendromecon rigida</i> ssp. <i>harfordii</i>
Common Name: Springville clarkia Status: Threatened	Scientific Name: <i>Clarkia springvillensis</i>
Common Name: Pennell's bird's-beak Status: Endangered	Scientific Name: <i>Cordylanthus tenuis</i> ssp. <i>capillaris</i>
Common Name: Hollisteria Status: Species of Concern	Scientific Name: <i>Hollisteria lanata</i>
Common Name: Tuolumne fawn-lily Status: Species of Concern	Scientific Name: <i>Erythronium tuolumnense</i>
Common Name: No common name Status: Species of Concern	Scientific Name: <i>Holocarpha virgata elongata</i>
Common Name: Peirson's spring beauty Status: Species of Concern	Scientific Name: <i>Claytonia lanceolata peirsonii</i>
Common Name: Hispid birds-beak Status: Species of Concern	Scientific Name: <i>Cordylanthus mollis hispidus</i>
Common Name: Wart-stemmed ceanothus Status: Species of Concern	Scientific Name: <i>Ceanothus verrucosus</i>
Common Name: Oso manzanita Status: Species of Concern	Scientific Name: <i>Arctostaphylos osoensis</i>
Common Name: Dudley's lousewort Status: Species of Concern	Scientific Name: <i>Pedicularis dudleyi</i>
Common Name: Pierpoint Springs liveforever Status: Species of Concern	Scientific Name: <i>Dudleya cymosa costifolia</i>
Common Name: Mono milk-vetch Status: Species of Concern	Scientific Name: <i>Astragalus monoensis monoensis</i>
Common Name: Kern mallow Status: Endangered	Scientific Name: <i>Eremalche kernensis</i>
Common Name: San Mateo woolly sunflower Status: Endangered	Scientific Name: <i>Eriophyllum latilobum</i>
Common Name: Long-petaled lewisia Status: Species of Concern	Scientific Name: <i>Lewisia longipetala</i>
Common Name: Monterrey manzanita Status: Species of Concern	Scientific Name: <i>Arctostaphylos montereyensis</i>
Common Name: [Unnamed] checkermallow Status: Species of Concern	Scientific Name: <i>Sidalcea malvaeflora patula</i>
Common Name: Howe's hedgehog cactus Status: Species of Concern	Scientific Name: <i>Echinocereus engelmannii howei</i>

NATURAL AREAS MAP FINDINGS

Scientific Name: *Phacelia novemmillensis*

Common Name: Curve-podded Mojave milk-vetch
Status: Species of Concern

Scientific Name: *Astragalus mohavensis hemigyris*

Common Name: Freed's jewelflower
Status: Species of Concern

Scientific Name: *Streptanthus brachiatus hoffmanii*

Common Name: Snake cholla
Status: Species of Concern

Scientific Name: *Opuntia parryi serpentina*

Common Name: Wolf's evening-primrose
Status: Species of Concern

Scientific Name: *Oenothera wolfii*

Common Name: Stephens' beardtongue
Status: Species of Concern

Scientific Name: *Penstemon stephensii*

Common Name: Parish's phacelia
Status: Species of Concern

Scientific Name: *Phacelia parishii*

Common Name: Blasdale's bentgrass
Status: Species of Concern

Scientific Name: *Agrostis blasdalei blasdalei*

Common Name: [Unnamed] scurf-pea
Status: Species of Concern

Scientific Name: *Pediomelum castoreum*

NATURAL AREAS MAP FINDINGS

Federal Endangered Species from the U.S. Fish and Wildlife for CA State (Continued...)

Common Name: Shaggy-hair lupine Status: Species of Concern	Scientific Name: <i>Lupinus spectabilis</i>
Common Name: Short-lobed broomrape Status: Species of Concern	Scientific Name: <i>Orobanche parishii brachyloba</i>
Common Name: San Nicolas Island lomatium Status: Species of Concern	Scientific Name: <i>Lomatium insulare</i>
Common Name: Tecopa bird's-beak Status: Species of Concern	Scientific Name: <i>Cordylanthus tecopensis</i>
Common Name: Many-stemmed liveforever Status: Species of Concern	Scientific Name: <i>Dudleya multicaulis</i>
Common Name: Hearst's ceanothus Status: Species of Concern	Scientific Name: <i>Ceanothus hearstiorum</i>
Common Name: Variegated dudleya Status: Species of Concern	Scientific Name: <i>Dudleya variegata</i>
Common Name: Sandmat manzanita Status: Species of Concern	Scientific Name: <i>Arctostaphylos pumila</i>
Common Name: Northern California black walnut Status: Species of Concern	Scientific Name: <i>Juglans californica hindsii</i>
Common Name: Delta tule-pea Status: Species of Concern	Scientific Name: <i>Lathyrus jepsonii jepsonii</i>
Common Name: Stebbins lewisia Status: Species of Concern	Scientific Name: <i>Lewisia stebbinsii</i>
Common Name: Wilkin's harebell Status: Species of Concern	Scientific Name: <i>Campanula wilkinsiana</i>
Common Name: Cup Lake draba Status: Species of Concern	Scientific Name: <i>Draba asterophora macrocarpa</i>
Common Name: Mecca aster Status: Species of Concern	Scientific Name: <i>Xylorhiza cognata</i>
Common Name: Small-leaved rose Status: Species of Concern	Scientific Name: <i>Rosa minutifolia</i>
Common Name: Cambria morning-glory Status: Species of Concern	Scientific Name: <i>Calystegia subacaulis episcopalis</i>
Common Name: San Benito thornmint Status: Species of Concern	Scientific Name: <i>Acanthomintha obovata obovata</i>
Common Name: Bear Valley phlox Status: Species of Concern	Scientific Name: <i>Phlox dolichantha</i>
Common Name: Owens Peak lomatium Status: Species of Concern	Scientific Name: <i>Lomatium shevockii</i>

NATURAL AREAS MAP FINDINGS

Federal Endangered Species from the U.S. Fish and Wildlife for CA State (Continued...)

Common Name: Wild Rose Canyon buckwheat Status: Species of Concern	Scientific Name: <i>Eriogonum eremicola</i>
Common Name: Mt. Saint Helena morning-glory Status: Species of Concern	Scientific Name: <i>Calystegia collina oxyphylla</i>
Common Name: Large red buckwheat Status: Species of Concern	Scientific Name: <i>Eriogonum grande rubescens</i>
Common Name: Dog Valley ivesia Status: Species of Concern	Scientific Name: <i>Ivesia aperta canina</i>
Common Name: Del Norte manzanita Status: Species of Concern	Scientific Name: <i>Arctostaphylos nortensis</i>
Common Name: [Unnamed] milk-vetch Status: Species of Concern	Scientific Name: <i>Astragalus gilmanii</i>
Common Name: Seaside birds-beak Status: Species of Concern	Scientific Name: <i>Cordylanthus rigidus littoralis</i>
Common Name: Sp. nov. ined. (Del Norte) rock-cress Status: Species of Concern	Scientific Name: <i>Arabis</i> sp.
Common Name: California marina Status: Species of Concern	Scientific Name: <i>Marina orcuttii orcuttii</i>
Common Name: San Felipe monardella Status: Species of Concern	Scientific Name: <i>Monardella nana leptosiphon</i>
Common Name: San Francisco owl's-clover Status: Species of Concern	Scientific Name: <i>Triphysaria floribunda</i>
Common Name: San Benito fritillary Status: Species of Concern	Scientific Name: <i>Fritillaria viridea</i>
Common Name: Red-flowered lotus Status: Species of Concern	Scientific Name: <i>Lotus rubriflorus</i>
Common Name: Palmer's grapplinghook Status: Species of Concern	Scientific Name: <i>Harpagonella palmeri palmeri</i>
Common Name: No common name Status: Species of Concern	Scientific Name: <i>Stylocline citroleum</i>
Common Name: Humboldt lily Status: Species of Concern	Scientific Name: <i>Lilium humboldtii ocellatum</i>
Common Name: Death Valley sandpaperplant Status: Species of Concern	Scientific Name: <i>Petalonyx thurberi gilmanii</i>
Common Name: San Diego marsh elder Status: Species of Concern	Scientific Name: <i>Iva hayesiana</i>
Common Name: Merced phacelia Status: Species of Concern	Scientific Name: <i>Phacelia ciliata opaca</i>

Endangered Species Codes

Global Imperilment Rank Codes - GRANK: Priority rank (1-5) based on number of occurrences through element's range.

G1 - Critically imperiled globally because of extreme rarity (5 or fewer occurrences or very few remaining individuals or acres) or because of some factor(s) making it especially vulnerable to extinction.

G2 - Imperiled globally because of rarity (6-20 occurrences or few remaining individuals or acres) or because of some factor(s) making it especially vulnerable to extinction.

G3 - Vulnerable. Either very rare and local throughout its range or found locally (even abundantly at some of its locations) in a restricted range. (e.g., a single western state, a physiographic region in the East) or because of other factors making it vulnerable to extinction throughout its range; in terms of occurrences, in the range of 21 - 100.

G4 - Apparently secure globally, though it may be quite rare in parts of its range, especially at the periphery.

G5 - Demonstrably secure globally, though it may be quite rare in parts of its range, especially at the periphery.

GH - Possibly extinct or eliminated. Of historical occurrence throughout its range, i.e., formerly part of the established biota, with the expectation that it may be rediscovered (e.g., Bachman's Warbler). For historic and ecological communities, no likelihood for rediscovery, but possibility of restoration (e.g., American Chestnut Forest).

GNA - Not applicable to the element at a global level. Includes Hybrids, Invasive species, species of Domestic Origin, Cultural communities, and communities that have been managed.

GNR - Rank not assigned.

GU - Unrankable. Possibly in peril range-wide but status uncertain; more information is needed.

GX - Believed to be extinct throughout range (e.g., Passenger Pigeon) with virtually no likelihood that it will be rediscovered. For an ecological community, no restoration potential.

G#G# - Rank with a range. Used to show the range of uncertainty, will not skip more than 1 rank.

T-RANKS - T subranks are given to global ranks when a subspecies, variety, or race is considered at the state level. The subrank is made up of a "T" plus a number or letter (1, 2, 3, 4, 5, H, U, X) with the same ranking rules as a full species.

State Rank Codes - SRANK: Priority rank (1-5) based on number of occurrences through element's range.

S1 - Critically imperiled, Extremely rare. Typically 5 or fewer estimated occurrences in the state, or only a few remaining individuals, may be especially vulnerable to extirpation.

S2 - Imperiled, very rare. Typically between 5 and 20 estimated occurrences or with many individuals in fewer occurrences, often susceptible to becoming extirpated.

S3 - Vulnerable, rare to uncommon. Typically between 21 and 100 estimated occurrences, may have fewer occurrences but with large number of individuals in some populations, may be susceptible to large-scale disturbances.

S4 - Common, apparently secure under present conditions. Typically 100 or more estimated occurrences, but may be fewer with many large populations, may be restricted to only a portion of the state, usually not susceptible to immediate threats.

S5 - Demonstrably widespread, common, and secure in the state and essentially ineradicable under present conditions.

SA - Accidental.

SH - Historically known from the state, but not verified for an extended period, usually 15 years.

SU - Unrankable, not assessed. Possibly in peril in the state, but status uncertain, more information is needed. When possible, the most likely rank is assigned and a question mark is added to show uncertainty.

SX - Apparently extirpated from state.

SNR - Unranked. The state rank not yet assessed.

SRF - Reported falsely in the state.

SE - Exotic for local area.

SZ - Birds that migrate through the state but have no identifiable location.

S#S# - State level of G#G#.

Endangered Species Codes, (Continued...)

General Ranking Notes

Q - A "Q" in the global rank indicates the element's taxonomic classification as a species is a matter of conjecture among scientists.

A - Accidental - far outside usual range

C - Captive or Cultivated only

HYB - Element represents an interspecific hybrid, not a species

R - Reported but not confirmed

Z - Zero Occurrences

Breeding Status Qualifiers (animals only)

B - Breeding population of the element

N - Nonbreeding population of the element

M - Migrant population

WETLANDS CLASSIFICATION SYSTEM

National Wetland Inventory Maps are produced by the U.S. Fish and Wildlife Service, a sub-department of the U.S. Department of the Interior. In 1974, the U.S. Fish and Wildlife Service developed a criteria for wetland classification with four long range objectives:

- to describe ecological units that have certain homogeneous natural attributes,
- to arrange these units in a system that will aid decisions about resource management,
- to furnish units for inventory and mapping, and
- to provide uniformity in concepts and terminology throughout the U.S.

High altitude infrared photographs, soil maps, topographic maps and site visits are the methods used to gather data for the productions of these maps. In the infrared photos, wetlands appear as different colors and these wetlands are then classified by type. Using a hierarchical classification, the maps identify wetland and deepwater habitats according to:

- system
- subsystem
- class
- subclass
- modifiers

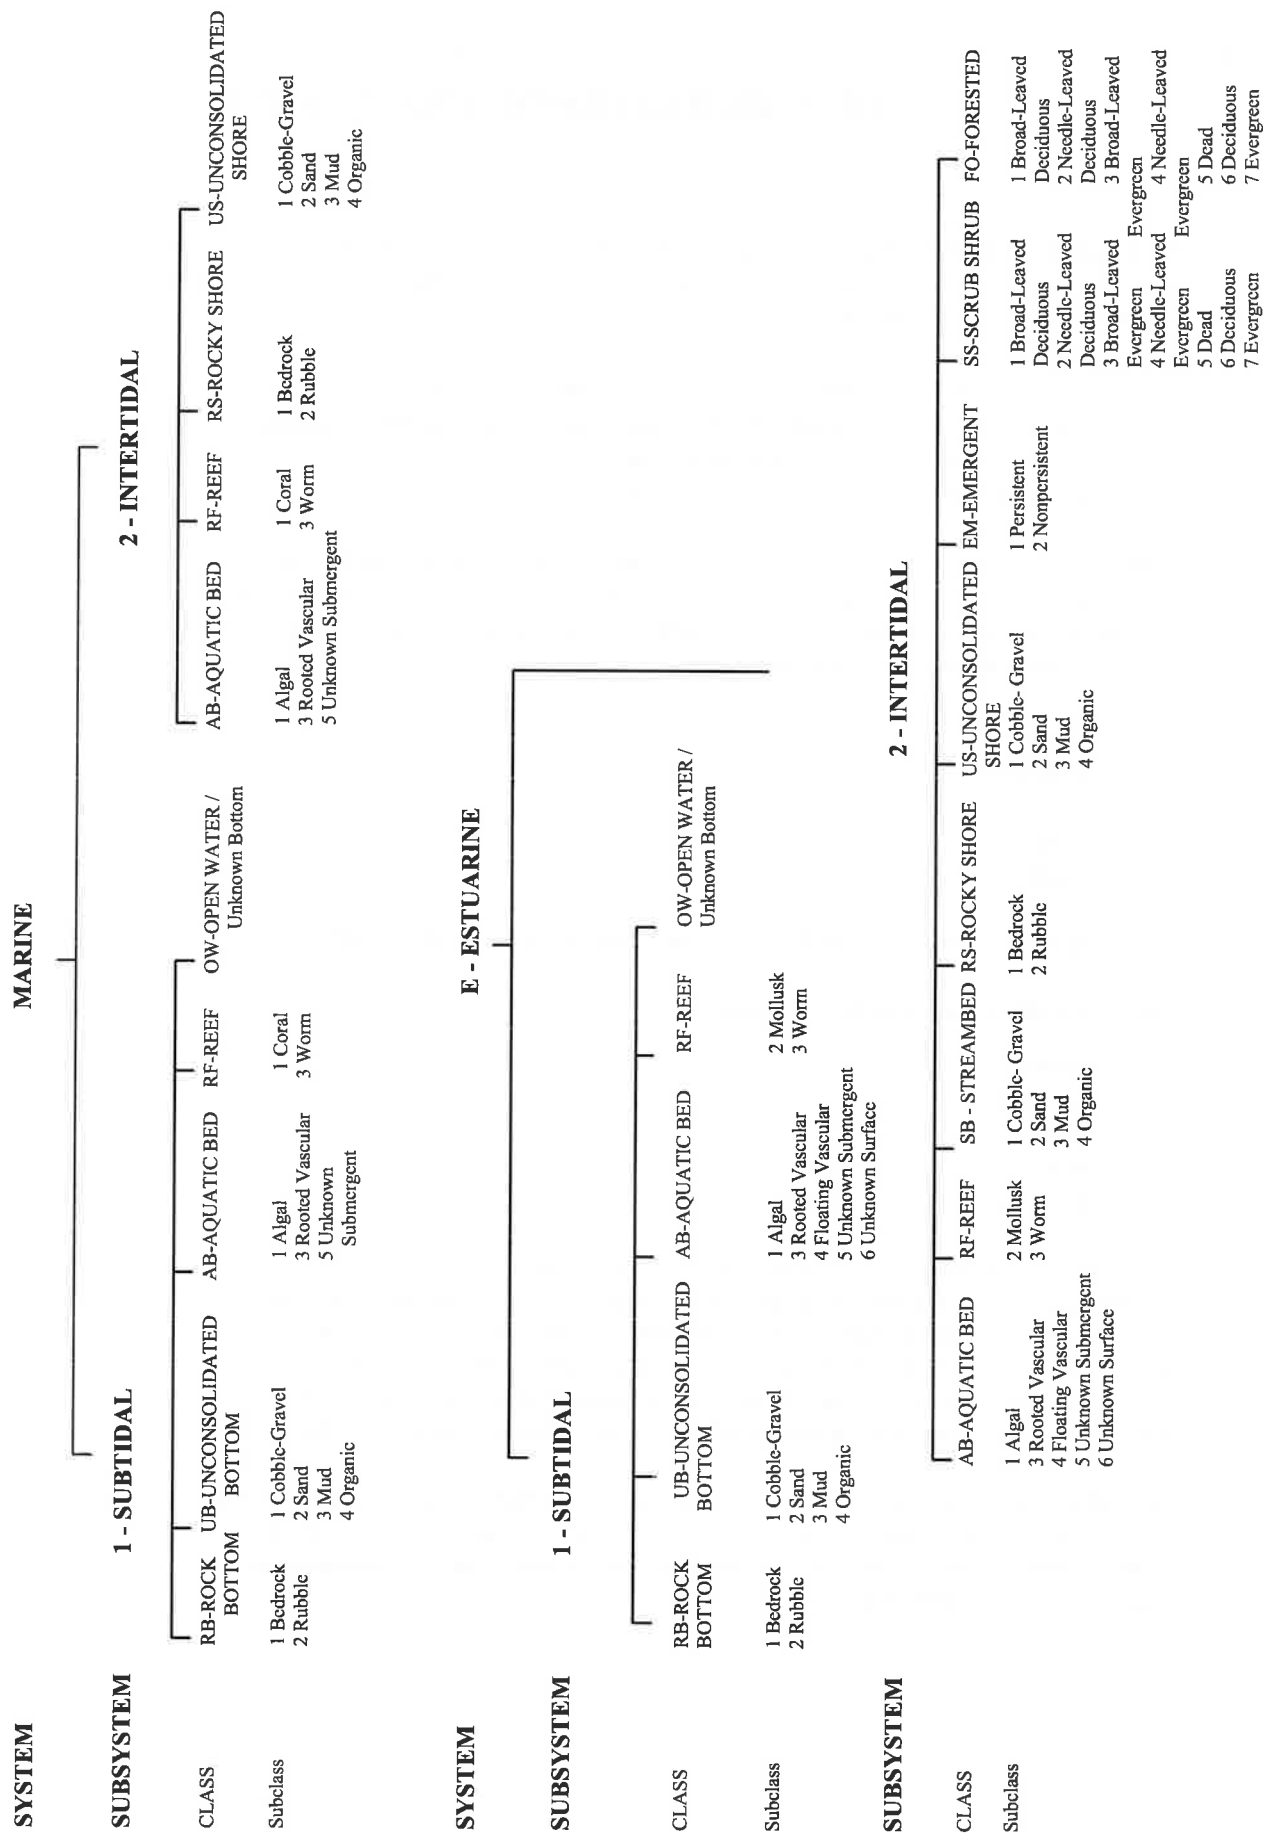

(as defined by Cowardin, et al. U.S. Fish and Wildlife Service FWS/OBS 79/31. 1979.)

The classification system consists of five systems:

1. marine
2. estuarine
3. riverine
4. lacustrine
5. palustrine

The marine system consists of deep water tidal habitats and adjacent tidal wetlands. The riverine system consists of all wetlands contained within a channel. The lacustrine systems includes all nontidal wetlands related to swamps, bogs & marshes. The estuarine system consists of deepwater tidal habitats and where ocean water is diluted by fresh water. The palustrine system includes nontidal wetlands dominated by trees and shrubs and where salinity is below .5% in tidal areas. All of these systems are divided in subsystems and then further divided into class.

National Wetland Inventory Maps are produced by transferring gathered data on a standard 7.5 minute U.S.G.S. topographic map. Approximately 52 square miles are covered on a National Wetland Inventory map at a scale of 1:24,000. Electronic data is compiled by digitizing these National Wetland Inventory Maps.

MODIFIERS

In order to more adequately describe wetland and deepwater habitats one or more of the water regime, water chemistry, soil, or special modifiers may be applied at the class or lower level in the hierarchy. The farmed modifier may also be applied to the ecological system.

WATER REGIME		WATER CHEMISTRY		SOIL	SPECIAL MODIFIERS

KEY CONTACTS & GOVERNMENT RECORDS SEARCHED

Various Federal laws and executive orders address specific environmental concerns. NEPA requires the responsible offices to integrate to the greatest practical extent the applicable procedures required by these laws and executive orders. EDR provides key contacts at agencies charged with implementing these laws and executive orders to supplement the information contained in this report.

National Register of Historic Places:

The National Register of Historic Places is the official federal list of districts, sites, buildings, structures, and objects significant in American history, architecture, archeology, engineering, and culture. These contribute to an understanding of the historical and cultural foundations of the nation.

The National Register includes:

- All prehistoric and historic units of the National Park System;
- National Historic Landmarks, which are properties recognized by the Secretary of the Interior as possessing national significance; and
- Properties significant in American, state, or local prehistory and history that have been nominated by State Historic Preservation Officers, federal agencies, and others, and have been approved for listing by the National Park Service.

FARMLAND MAPPING AND MONITORING PROGRAM

THIS PAGE INTENTIONALLY LEFT BLANK.

IMPERIAL COUNTY IMPORTANT FARMLAND 2016

PRIME FARMLAND
 Prime farmland is the most productive and fertile land in the county. It is typically found in the central and eastern parts of the county, particularly around the Salton River and the Colorado River. Prime farmland is used for a variety of crops, including cotton, alfalfa, and citrus. It is the most valuable type of farmland in the county.

FARMLAND OF STATEWIDE IMPORTANCE
 Farmland of statewide importance is land that is important to the state as a whole. It is typically found in smaller, irregular patches throughout the county. This type of farmland is used for a variety of crops, including cotton, alfalfa, and citrus. It is less valuable than prime farmland but still plays an important role in the state's agriculture.

UNIQUE FARMLAND
 Unique farmland is land that has special characteristics that make it valuable. It is typically found in the northern and western parts of the county. This type of farmland is used for a variety of crops, including cotton, alfalfa, and citrus. It is less valuable than prime farmland but still plays an important role in the county's agriculture.

FARMLAND OF LOCAL IMPORTANCE
 Farmland of local importance is land that is important to the local community. It is typically found near urban areas or along major roads. This type of farmland is used for a variety of crops, including cotton, alfalfa, and citrus. It is less valuable than prime farmland but still plays an important role in the local economy.

UNCLASSIFIED STATE OF LAND
 Unclassified state of land is land that has not been classified as any of the other types of farmland. It is typically found in the northern and western parts of the county. This type of land is used for a variety of purposes, including agriculture, recreation, and conservation. It is less valuable than prime farmland but still plays an important role in the county's landscape.

Colorado River Indian Tribes of the Colorado River Indian Reservation
26600 Mohave Road
Parker, AZ 85344

RE: Invitation to Consult Under Section 106 – Seeley Fire Station and Cooling Center

Dennis Patch,

This letter formally invites you to request consultation pursuant to Section 106 of the National Historic Preservation Act (NHPA) regarding the proposed Seeley Fire Station and Cooling Center.

Section 106 requires consultation with federally-recognized Indian tribes when a project may affect a historic property of religious and cultural significance to the tribe. Section 106 covers a broad range of projects, including construction, renovation, repair, or rehabilitation; ground disturbances (e.g. sewer lines, utility lines [above and below ground], foundations; footings, grading, access roads) and changes to an area's visual characteristics. To this end, the County is contacting you to consult on this project.

The County of Imperial is committed to fulfilling the goals of Section 106 and believes that tribal participation in the planning process is crucial for the success of the proposed project. The Imperial County Workforce and Economic Development Department performed a search on HUD's Tribal Directory Assessment Tool (TDAT) to obtain a list of tribes who should be included in the planning consultation process regarding the proposed project and your name was included in the NAHC's response.

The Seeley Fire Station and Cooling Center is proposed on an 8.54-acre parcel (051-241-006) located at 1862 West Evan Hewes Highway, Seeley, CA 92273. The Colonia of Seeley is approximately 11 miles southwest of the City of Imperial, 8 miles west of the City of El Centro and 14 miles northwest of Heber. Attached please find the regional location, and project vicinity maps of the proposed project.

If your tribe would like to consult with the County of Imperial regarding this project, please respond in writing to Priscilla Lopez, County of Imperial, 2799 S. 4th, El Centro, CA 92243. Any sensitive information shared with the County regarding cultural places and/or sacred sites will be kept strictly confidential and will not be divulged to the public.

Respectfully,

Priscilla Lopez
Director of Workforce & Economic Development

RE: Invitation to Consult Under Section 106 – Seeley Fire Station and Cooling Center

Robert Pinto,

This letter formally invites you to request consultation pursuant to Section 106 of the National Historic Preservation Act (NHPA) regarding the proposed Seeley Fire Station and Cooling Center.

Section 106 requires consultation with federally-recognized Indian tribes when a project may affect a historic property of religious and cultural significance to the tribe. Section 106 covers a broad range of projects, including construction, renovation, repair, or rehabilitation; ground disturbances (e.g. sewer lines, utility lines [above and below ground], foundations; footings, grading, access roads) and changes to an area's visual characteristics. To this end, the County is contacting you to consult on this project.

The County of Imperial is committed to fulfilling the goals of Section 106 and believes that tribal participation in the planning process is crucial for the success of the proposed project. The Imperial County Workforce and Economic Development Department performed a search on HUD's Tribal Directory Assessment Tool (TDAT) to obtain a list of tribes who should be included in the planning consultation process regarding the proposed project and your name was included in the NAHC's response.

The Seeley Fire Station and Cooling Center is proposed on an 8.54-acre parcel (051-241-006) located at 1862 West Evan Hewes Highway, Seeley, CA 92273. The Colonia of Seeley is approximately 11 miles southwest of the City of Imperial, 8 miles west of the City of El Centro and 14 miles northwest of Heber. Attached please find the regional location, and project vicinity maps of the proposed project.

If your tribe would like to consult with the County of Imperial regarding this project, please respond in writing to Priscilla Lopez, County of Imperial, 2799 S. 4th, El Centro, CA 92243. Any sensitive information shared with the County regarding cultural places and/or sacred sites will be kept strictly confidential and will not be divulged to the public.

Respectfully,

Priscilla Lopez

PO Box 1302
Boulevard, CA 91905-1302

RE: Invitation to Consult Under Section 106 – Seeley Fire Station and Cooling Center

Angela Santos,

This letter formally invites you to request consultation pursuant to Section 106 of the National Historic Preservation Act (NHPA) regarding the proposed Seeley Fire Station and Cooling Center.

Section 106 requires consultation with federally-recognized Indian tribes when a project may affect a historic property of religious and cultural significance to the tribe. Section 106 covers a broad range of projects, including construction, renovation, repair, or rehabilitation; ground disturbances (e.g. sewer lines, utility lines [above and below ground], foundations; footings, grading, access roads) and changes to an area's visual characteristics. To this end, the County is contacting you to consult on this project.

The County of Imperial is committed to fulfilling the goals of Section 106 and believes that tribal participation in the planning process is crucial for the success of the proposed project. The Imperial County Workforce and Economic Development Department performed a search on HUD's Tribal Directory Assessment Tool (TDAT) to obtain a list of tribes who should be included in the planning consultation process regarding the proposed project and your name was included in the NAHC's response.

The Seeley Fire Station and Cooling Center is proposed on an 8.54-acre parcel (051-241-006) located at 1862 West Evan Hewes Highway, Seeley, CA 92273. The Colonia of Seeley is approximately 11 miles southwest of the City of Imperial, 8 miles west of the City of El Centro and 14 miles northwest of Heber. Attached please find the regional location, and project vicinity maps of the proposed project.

If your tribe would like to consult with the County of Imperial regarding this project, please respond in writing to Priscilla Lopez, County of Imperial, 2799 S. 4th, El Centro, CA 92243. Any sensitive information shared with the County regarding cultural places and/or sacred sites will be kept strictly confidential and will not be divulged to the public.

Respectfully,

Priscilla Lopez
Director of Workforce & Economic Development

Re: Lot Merger #00147 & Initial Study #20-0018 Seeley Fire Facility & Cooling Center Project

Dear Ms. Robinson,

Our department has reviewed the documents pertaining to the Lot Merger who proposes to construct a Seeley Fire Facility and Cooling Center at 1862 W. Evan Hewes Highway, Seeley, California.

The project description refers to construction that possibly could be considered commercial use under which Title 9 Division 3 Section 90302.4 – Landscaping Standards – Commercial Uses may apply. If applicable, individual projects are required to provide a minimum of ten percent landscaping cover. Should your office require this, the applicant must follow the requirements for movement of plant material into Imperial County from other counties or from out of state. The applicant can contact our Pest Detection and Eradication Division for any questions regarding the quarantines of movement of plant material, as there are several quarantines that must be observed.

Additionally, please be advised that if proposed to be used, any Point of Sale systems as well as commercial weighing and measuring devices must be registered, inspected and sealed by our office on an annual basis. The applicant can contact our Weights and Measure Division to register all devices.

If you or the applicant has any questions, please feel free to contact our office at (442) 265-1500.

Regards,

AIR POLLUTION CONTROL DISTRICT

October 28, 2020

Mr. Jim Minnick
Planning & Development Services Director
801 Main St.
El Centro, CA 92243

SUBJECT: Lot Merger 00147—Seeley Fire Facility and Cooling Center Project

Dear Mr. Minnick:

The Imperial County Air Pollution Control District ("Air District") would like to thank you for the opportunity to review proposed Lot Merger (LM) 00147 that would merge two lots for the construction of the proposed Seeley Fire Facility and Cooling Center at 1862 W. Evan Hewes Highway in Seeley, California (also described as Assessor's Parcel Number 051-241-006-000).

While the Air District has no comment on the lot merger, the Air District offers guidance as the applicant moves forward with Initial Study 20-0018. Such guidance can be found in the Imperial County California Environmental Quality Act (CEQA) Air Quality Handbook. This Project will likely be classified as Tier 1 in terms of air quality impacts. However, screening criteria strongly recommends consultation between the lead agency and the Air District for development projects that fall outside of Table 2 in Section 4.3 of the CEQA Air Quality Handbook. Doing so ensures that the lead agency understands the Air District's concerns of the Project's air quality impact. The greatest air quality impact related to this Project is from fugitive dust (PM₁₀) emissions during construction and earthmoving activities. The Air District evaluates projects on both size and activities when assessing potential emissions and determining mitigation controls. Adherence to Regulation VIII rules is required for construction and earthmoving activities to limit fugitive dust emissions to 20% opacity. However, pending review of the Initial Study, complete assurance of satisfactory mitigation will be contingent upon submission of an approved Construction Dust Control Plan.

Therefore, the Air District requests to review Draft Initial Study 20-0018 and provide guidance comments prior to dissemination to Environmental Evaluation Committee members.

The Air District's CEQA Handbook can be accessed online at <https://apcd.imperialcounty.org/>. Click on the "Planning" drop-down menu. The Rule Book rule book can be accessed by clicking on "Rules & Regulations." Should you have questions, please call our office at (442) 265-1800.

Sincerely,

Curtis Blondell

RECEIVED
OCT 20 2020
IMPERIAL COUNTY
PLANNING & DEVELOPMENT SERVICES

SUBJECT: Lot Merger No. 00147

Dear Ms. Robinson:

On October 15, 2020, the Imperial Irrigation District received from the Imperial County Planning & Development Services Dept., a request for agency comments on Lot Merger application no. 00147. The applicant, the County of Imperial, proposes to merge two (2) lots located at 1862 W. Evan Hewes Hwy. in Seeley, California (APN 051-241-006) for the construction of the Seeley Fire Station and Cooling Center project and the related parking, sidewalks and perimeter fencing.

The Imperial Irrigation District has reviewed the information and has the following comments:

1. To obtain electrical service for the Seeley Fire Station and Cooling Center project, the applicant should be advised to contact Ernie Benitez, IID Customer Project Development Planner, at (760) 482-3405 or e-mail Mr. Benitez at eibenitez@iid.com to initiate the customer service application process. In addition to submitting a formal application (available for download at the IID website <http://www.iid.com/home/showdocument?id=12923>), the applicant will be required to submit a complete set of approved plans (including CAD files), project schedule, estimated in-service date, one-line diagram of facilities, electrical loads, panel size, voltage, and the applicable fees, permits, easements and environmental compliance documentation pertaining to the provision of electrical service to the project. The applicant shall be responsible for all costs and mitigation measures related to providing electrical service to the project.
2. Any construction or operation on IID property or within its existing and proposed right of way or easements including but not limited to: surface improvements such as proposed new streets, driveways, parking lots, landscape; and all water, sewer, storm water, or any other above ground or underground utilities; will require an encroachment permit, or encroachment agreement (depending on the

circumstances). A copy of the IID encroachment permit application and instructions are available at <http://www.iid.com/departments/real-estate>. The IID Real Estate Section should be contacted at (760) 339-9239 for additional information regarding encroachment permits or agreements.

3. Any new, relocated, modified or reconstructed IID facilities required for and by the project (which can include but is not limited to electrical utility substations, electrical transmission and distribution lines, etc.) need to be included as part of the project's CEQA and/or NEPA documentation, environmental impact analysis and mitigation. Failure to do so will result in postponement of any construction and/or modification of IID facilities until such time as the environmental documentation is amended and environmental impacts are fully analyzed. **Any and all mitigation necessary as a result of the construction, relocation and/or upgrade of IID facilities is the responsibility of the project proponent.**

Should you have any questions, please do not hesitate to contact me at 760-482-3609 or at dvargas@iid.com. Thank you for the opportunity to comment on this matter.
